- (6) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

C. Contract Provisions for non-Federal Entity Contracts under Federal Awards

1. Equal Employment Opportunity. Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."
2. Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of \$2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

3. Rights to Inventions Made Under a Contract or Agreement. If the Federal award meets the definition of "funding agreement" under 37 CFR § 401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.
4. Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended - Contracts and subgrants of amounts in excess of \$150,000 must contain a provision that requires the non-Federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).
5. Debarment and Suspension (Executive Orders 12549 and 12689) - A contract award (see 2 CFR 180.220) must not be made to parties listed on the government wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR part 1986 Comp., p. 189) and 12689 (3 CFR part 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.
6. The Whistleblower Protection Act of 1989, 5 U.S.C. 2302b, Pub.L. 101-12 as amended, is a United States federal law that protects federal whistleblowers who work for the government and report the possible existence of an activity constituting a violation of law, rules, or regulations, or mismanagement, gross waste of funds, abuse of authority or a substantial and specific danger to public health and safety. A federal agency violates the Whistleblower Protection Act if agency authorities take retaliatory personnel action against any employee or applicant because of disclosure of information by that employee or applicant.

1. This purchase order ("purchase order" or "contract") is a legal, binding contract and may not be amended except in writing, signed by both parties, such as by formal, written change order from the County Purchasing Office.
2. The County of Henrico (the "County") shall not be bound in any manner for goods delivered or services rendered except on the basis of this purchase order including these terms and conditions. The terms "supplier" and "contractor" refer to the party providing goods or services to the County pursuant to this purchase order.
3. Goods and services must be delivered and rendered strictly in accordance with the applicable bid or quotation and shall not deviate in any way from the terms, conditions, prices, quality, quantity, delivery instructions, and specifications of the bid or quotation.
4. All goods and/or services delivered and/or rendered shall comply with all applicable federal, state, and local laws, and shall not infringe any valid patent or trademark.
5. The supplier shall indemnify, defend, and hold harmless the County (including Henrico County Public Schools), and the County's officers, agents, and employees from any claims, damages, suits, actions, liabilities, and costs of any kind or nature, including attorneys' fees, arising from or caused by the provision of any goods and/or services, the failure to provide any goods and/or services and/or the use of any services and/or goods furnished (or made available) arising from, growing out of, or in any way involved with the goods delivered or services rendered pursuant to this purchase order by the supplier, including but not limited to claims or allegations of intellectual property infringement, bodily harm, property damage, or wrongful death, provided that such liability is not attributable to the County's sole negligence. In the event that suit is brought against the County, its officers and/or its employees (either independently or jointly with the supplier), arising out of this purchase order and/or the goods and/or services that are the subject of this purchase order, the supplier shall defend the County, its officers and employees, in any such suit at no cost to them. In the event that final judgment is obtained against the County, its officers and/or its employees, either independently or jointly with the supplier, then the supplier shall pay such judgment, including costs and attorneys fees, if any, and hold the County, its officers and employees, harmless therefrom.
6. To the extent that any terms and conditions contained in the supplier's acknowledgement, bid, or other forms conflict with those contained in this purchase order, those contained in the purchase order shall prevail.
7. Except for subscription services, the County shall not pay for any goods or services until they have been delivered or rendered.
8. The County will pay for goods delivered or services rendered in compliance with the terms, conditions, and specifications of this purchase order either on the date on which payment is due under the terms of this purchase order or, if no date is set out in this purchase order, not more than 45 days after the goods or services are received in full by the County or not more than 45 days after the invoice is received by the County, whichever is later. **If this purchase order is for goods or services in excess of \$100,000, then the supplier must submit a signed Anti-Lobbying Certification with its invoice before the County will be obligated to make payment.** See the last page of these Terms and Conditions.
9. Unless otherwise provided in this purchase order, if the County fails to pay by the payment date, the County agrees to pay the finance charge assessed by the supplier, which shall not exceed one percent per month.

10. Unless otherwise provided in this purchase order, all prices must be F.O.B. delivered to the point as indicated on the front of the purchase order. The County will grant no allowance for boxing, crating, or delivery unless specifically provided for in the bid or quotation. When a specific purchase is quoted or negotiated F.O.B. shipping point, the supplier shall ship prepaid, add the charges to invoice, and attach the original receipted freight bill to the invoice.
11. The supplier shall indicate the purchase order number on the front of each invoice and on the outside of each package or shipping container.
12. The County is exempt from the payment of federal excise and state sales taxes. If any such tax is included on the invoice, it must be shown as a separate item. Tax exemption certificates will be furnished to the supplier upon request.
13. Cash discounts shall be deducted as indicated on the front of this purchase order or in accordance with the terms of the quotation or bid.
14. The supplier shall not, in its product literature or advertising, refer to this purchase order or the use of the supplier's goods or services by the County.
15. If this purchase order is over \$10,000:
 - (1) During the performance of this purchase order, the supplier agrees as follows:
 - a. The supplier will not discriminate against any employee or applicant for employment because of race, religion, color, sex, national origin, age, disability, or other basis prohibited by state law relating to discrimination in employment, except where there is a bona fide occupational qualification reasonably necessary to the normal operation of the supplier. The supplier agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.
 - b. The supplier, in all solicitations or advertisements for employees placed by or on behalf of the supplier, will state that such supplier is an equal opportunity employer.
 - c. Notices, advertisements, and solicitations placed in accordance with federal law, rule, or regulation shall be deemed sufficient for the purpose of meeting the requirements of this section.
 - (2) The supplier will include the provisions of the foregoing paragraphs a, b, and c in every subcontract or purchase order of over \$10,000, so that the provisions will be binding upon each subcontractor or supplier.

17. Henrico County does not discriminate against faith-based organizations as that term is defined in Virginia Code § 2.2-4343.1.
18. In the event that the supplier fails to deliver the goods or services within the time specified, or if the supplier otherwise defaults, the County may, after reasonable notice, procure such goods or services from other sources. In such event, the supplier shall be liable to the County for any additional cost occasioned by such failure to deliver or other default.
19. The County welcomes and encourages the participation of small businesses, businesses owned by women and minorities, businesses owned by service disabled veterans and employment service organizations in procurement transactions made by the County.
20. The supplier expressly agrees; both directly and through its subcontractors, to take every precaution at all times for the protection of persons and property who or which may come on County property or be affected by the supplier's operation in connection with the performance of the purchase order.
21. The supplier shall be solely responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the performance of the purchase order.

23. This purchase order shall be governed by and interpreted under the laws of the Commonwealth of Virginia without regard to its conflict of law rules. Any dispute arising out of this purchase order, its performance, or its interpretation, shall be initiated and tried only in the courts of the County of Henrico, Virginia.
24. Authorization to Transact Business in the Commonwealth
 - (1) A business entity organized as a stock or nonstock corporation, limited liability company, business trust, or limited partnership or registered as a registered limited liability partnership shall be authorized to transact business in the Commonwealth as a domestic or foreign business entity if so required by Title 13.1 or Title 50 of the Code of Virginia or as otherwise required by law.
 - (2) Any business entity described in subsection (1) that enters into a contract with a public body shall not allow its existence to lapse or allow its certificate of authority or registration to transact business in the Commonwealth if so required by Title 13.1 or Title 50 of the Code of Virginia to be revoked or cancelled at any time during the term of the contract.
25. The supplier does not, and shall not during the performance of this purchase order for goods and services in the Commonwealth, knowingly employ an unauthorized alien as defined in the federal Immigration Reform and Control Act of 1986.
26. Payment Clauses Required by Va. Code § 2.2-4354

 - (4) Pursuant to Virginia Code § 2.2-4354, unless otherwise provided under the terms of the Contract interest shall accrue at the rate of one percent per month.
 - (5) The supplier shall include in each of its subcontracts a provision requiring each subcontractor to include or otherwise be subject to the same payment and interest requirements with respect to each lower-tier subcontractor.
 - (6) The supplier's obligation to pay an interest charge to a subcontractor pursuant to the payment clause in Virginia Code § 2.2-4354 shall not be construed to be an obligation of the County. A purchase order modification shall not be made for the purpose of providing reimbursement for the interest charge. A cost reimbursement claim shall not include any amount for reimbursement for the interest charge.
27. It is understood and agreed that this contract shall be subject to annual appropriations by the County of Henrico, Board of Supervisors. Should the Board fail to appropriate funds for this contract, the contract shall be terminated when existing funds are exhausted. The supplier shall not be entitled to seek redress from the County of Henrico, Virginia should the Board of Supervisors fail to make annual appropriations for this contract.

8. Equal Employment Opportunity Clause (2 C.F.R. PAR 200 APPENDIX II(C))

During the performance of this contract, the contractor agrees as follows:

- (1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:

Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

- (2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for

employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

- (3) The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.
- (4) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.
- (5) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.
- (6) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.
- (7) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.
- (8) The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance:

Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted

construction work: *Provided*, That if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive Order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings.

1. GENERAL SPECIFICATIONS

The proposed solution must have a single integrated platform with customizable configurations to support the typical workflows of the day-to-day collaborative system data system virtually. The proposed solution must have portals that are designed to support and segment multiple stakeholders such as customers, staff, internal partners and external partners. This data system will be used as a portal to our customers but not as the main system of record for our service delivery. Information collected in this system must be downloadable for transfer to Virginia State System of record. Therefore, the following requested system portals must at a minimum, have the following capabilities:

REQUIREMENT	HOW WE MEET THE REQUIREMENT
1) Customer Portal	
a) Provide the customer the ability to securely self-register and complete documents for eligibility and ongoing case management services that include two-point verification of signature and/or sign in. AdobeSign is the preferred signature provider.	myOneFlow provides the ability for customers to create an account and complete forms assigned to them, upload requested documents (which can be based on the answers to questions, and can include different document types). myOneFlow also provides the ability to require signature by the customer and optionally by staff members on certain "outputs" (documents produced from combining data collected in the registration process and during form completion). Customers can sign these outputs (similar to Adobe sign or Docusign).
b) Provide a request queue for the customer and case manager to schedule appointments, send reminders and requests for additional information including documentation.	All requests from customers will go the request queue for staff (like their "to-do list") where the action required is shown and when clicked on, takes staff straight to the item to be reviewed/signed/approved etc. The request queue will also show requests for appointments, and verification requests for documentation.
2) Events and Training Portal	
a) Provide staff the ability to upload training for customers, employers, and partners to view live or recorded information.	myOneFlow enables staff to embed videos in sequence and track the viewing of these videos (training) by customers, staff, partners and employers to ensure that they are able to go to the next step. In addition, myOneFlow offers the ability to create events for training (or other purposes), open registration for customers, and track attendance at events offered in person training (offered at centers) or virtually.
b) The proposed solution shall be able to track attendance for the individuals reviewing of such recordings.	myOneFlow tracks the viewing ("attendance") of videos (Training) by users.

REQUIREMENT	HOW WE MEET THE REQUIREMENT
3) Documents Management Portal	
a) As part of the collaborative flow, the current customer forms being used by CRWP must be able to be stored and be protected under a configurable unique identification code.	myOneFlow offers the ability for authorized staff to create forms, form workflows and visibility. Security of forms that can be modified by staff is set based on the security roles assigned to the staff member.
b) Document management shall be searchable, auditable, and easy to retrieve.	Customers can upload documents into myOneFlow. Staff can search for documents uploaded by or on behalf of a customer based on the document type. Documents can be viewed by staff and verified or approved as appropriate.
4) Communications Portal	
a) Shall link to Outlook, text messaging, and email.	myOneFlow enables staff to integrate their myOneFlow calendar with their Office 365 Calendar. This prevents the creation of overlapping appointments between the two calendars.
b) The proposed solution must also have the ability to send surveys, notifications, reminders and approval/denial notifications and other service related notifications back to sender.	myOneFlow offers the ability to send out surveys (using forms), send reminders to customers of an upcoming appointment or event or when a form has not been completed, or other actions that were supposed to be completed have not been completed, or notifications regarding approval, denial or information required. These reminders can be sent via email or text (or both).
5) Reporting – Ad-hoc Reporting and Analytics Portal	
a) This portal must provide a funnel for the other portals data collection, including demographics, forms completed, duration of time between each registration, form completion, and eligibility determination for reporting and analytics.	<p>myOneFlow offers the ability to create ad-hoc reports (Group Reports) that enables authorized users to use any of these report types.</p> <p>Group Reporting: To enable staff to build reports to select who they want to report on, what they want to display and how to display it (graphical form/text). Data generated can be exported to excel or to working lists for action on the clients. This can be used, for example, to provide client demographics for all those who applied for program X, viewed in a pie chart.</p> <p>Pipeline Reporting: Pipeline reports enable authorized staff to define the stages of the process that customers go through, and for each stage, define the conditions that indicate if the customer finished the stage or not. Those who meet the criteria for one stage are moved to the next stage, and staff can see counts of the numbers who are moving from one stage</p>

REQUIREMENT	HOW WE MEET THE REQUIREMENT																				
	<p>to the next and those who are not. An example of a pipeline report is shown below:</p> <div><p>Sample Pipeline</p><p>The funnel chart shows three stages: 'Created account' (2202), '2- Completed Enrollment Form' (1719), and '3- Complete CS App' (1458). 2- Completed Enrollment Form	1719	78.07%		Details																	
3- Complete CS App	1458	66.21%		Details																	
6) Mobile Application																					
a) The proposed solution shall offer a mobile app available in the app stores at no additional cost.	myOneFlow has a mobile app available in the app stores for both iOS and Android. The connector will be included as a part of this solution at no additional cost.																				
b) Allow customers to register for services, view upcoming appointments, upload documents for staff, such as, personal protected information, receipts, attendance records, etc.	The myOneFlow customer portal is mobile responsive and can be used to fill forms, make appointment, upload documents, register for events, etc. The Mobile app has an added advantage in that it also allows customers to take pictures of their requested documents/receipts, etc. using their smart phone.																				

REQUIREMENT	HOW WE MEET THE REQUIREMENT
7) Activity Tracking & Security	
a) Must be able to provide a tracking log of dates and time by all users, (customers, staff, partners, internal and external customers) for administrative use.	myOneFlow's audit tracking tracks user logins and additional information to ensure that any suspicious activity can trigger account lockout or notifications to appropriate staff. Authorized user can review user usage information and additional information can be provided by Empyra if a more detailed investigation needs to be performed.
b) Have an automated time out feature when system idle and not in use.	myOneFlow offers a standard 15-minute timeout (this can be changed if desired) for all users to protect user data.
c) Provide notification of breaches or suspected breaches.	We will provide notification to our point of contact if any breaches or suspected are detected.
d) Forms & Surveys	
a) Shall allow for the configuration of forms which are typically completed in person, to be completed virtually.	myOneFlow provides the ability for staff to create and manage forms, questions and security related to forms. Staff can also configure the outputs that will be generated by a user completing the form. The form can be assigned to users either by staff or automated through workflow based on a trigger (such as account created). Customers can complete forms assigned to them and can do this from any location, using their laptop, tablet or phone.
b) Allow forms to be downloadable and/or printed in its original format with time/date stamp.	Outputs for forms can be printed /downloaded with the data completed by the customer. This can be printed by staff or customer and can include the time stamp of when the customer completed the form or signed the output.
e) Work Experience Tracking and Time Reporting	
a) Shall provide a place for documents to be completed and approved.	myOneFlow provides the ability to connect a customer with an employer through a work experience placement. This placement can then trigger the customer to be assigned forms related to the work experience and request for documents to be uploaded and submitted.
f) Ongoing Configuration Support and Training	
a) Must include a help desk, break-fix, workflow mapping, form integration, a user focus group for system enhancements and reporting.	myOneFlow offers an online support portal that users can raise tickets 24X7X365. Issues are responded to in accordance with the criticality of the issue. Critical issues will be reviewed and best efforts will be made to resolve the issue within business hours. Lower priority issues will be reviewed and addressed /responded to in order.

REQUIREMENT	HOW WE MEET THE REQUIREMENT
g) User Authentication	
a) All users , customers, staff and partners, must have a secured and encrypted way of logging in using industry best practices.	All users will only be able to access the system using a secure encrypted authenticated login. All users will be able to login using their password. Password rules can be set to control password strength, password reset frequency requirements, and more. Accounts are locked after n (default set to 5) sequenced incorrect logins. Empyra uses industry best practices and continues to make improvements based on the direction and offerings for security available in the industry.
b) Overall Security	
a) The proposed solution must handle best modern security practices in presenting, storing, downloading and transmitting any data in and out of the system.	<p>myOneFlow offers fine grained security so staff can be assigned as many security roles as needed to do their job. Roles can be created/managed by authorized staff to have the security functions needed. Roles control access to user types, security functions, document type access, report access and ability to assign security. Access to functionality is controlled by the security roles a user is assigned. Access to data is controlled by the organizations to which a user has access. This provides the required control for access to data and functionality. Certain data, such as passwords and SSNs are masked and not displayed to prevent visual interception.</p> <p>The system is accessed via a secure site with HTTPS, which assures:</p> <p>Authenticity. The server presenting the certificate is in possession of the private key that matches the public key in the certificate.</p> <p>Integrity. Documents signed by the certificate (e.g. web pages) have not been altered in transit by a man in the middle.</p> <p>Encryption. Communications between the client and server are encrypted.</p> <p>Because of these properties, SSL/TLS and HTTPS allow users to securely transmit confidential information, and be sure that the website they are sending them to is authentic.</p> <p>The data centers for Empyra are all based on the Continental United States. Empyra's myOneFlow is hosted in a data center that is SSAE 16 – SOC Type 2 and FISMA High Physical and Environmental (PE) and PL2 certified. Documentation for both of these certifications can be provided to CRWP, if awarded. Empyra is also ISO 27001 certified and ISO 27701 for privacy and information security management certified. All the above certification documents will be provided upon request, if selected.</p>

2. WORKFLOW SPECIFICATIONS

The proposed solution will have preferred Work-Flows that will have the ability to provide several layers of approval, notifications and completion dates.

1. Approvers – (Person(s) who may approve or reject submittals based on this form), Optional (Person(s) who may approve or reject submittals based on this form – a second level of approval).

2. Copy recipients – (Persons who are copied when the originator submits the form; Approvers are automatically notified, so do not include them in this list).

1. Action notices – (Originator and Approvers and Completers are automatically notified of approval action; do not include them in Action Notice list; use this only for other persons to be notified).

2. Completers – (Completers are authorized to mark the form as completed [fulfilled]. They are automatically notified when a form is approved (or approved with conditions). Not all forms need a "completer"; use a completer only if something has to be done after approval, such as issuing a check, purchasing an item, filing a document, etc.)

3. Approvals or Declines can be submitted with or without comments.

4. The Workflow Forms system will have an easy-to-use form development tool so the staff can generate new forms as needs arise.

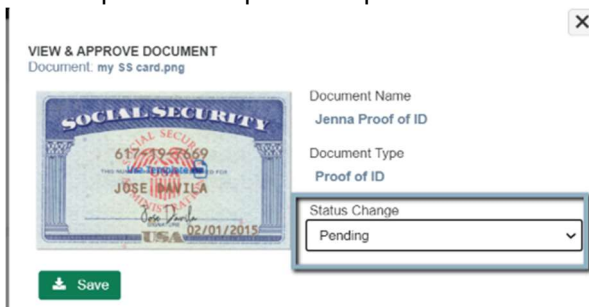

5. The Workflow Forms system must be integrated with the Outlook/Exchange e-mail/text messaging system.

6. The Workflow Forms system must be able to update other parts of the system upon the approval process to eliminate rekeying of data.

7. The Workflow Forms system will provide several standard reports by User and Statuses of the Form submitted.

8. The Workflow Forms system will provide a standard History Report of Forms that have been Approved or Declined.

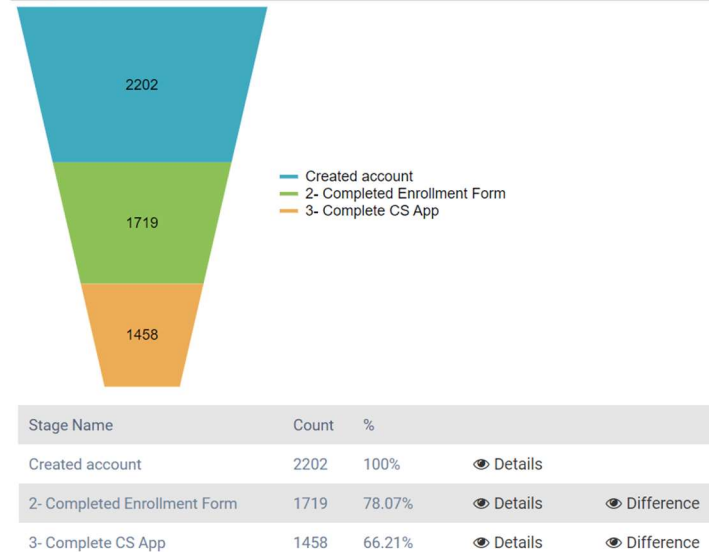

REQUIREMENT	HOW WE MEET THE REQUIREMENT
The proposed solution will have configured workflows that will provide the required number of layers of approval, notifications, and completion dates.	
1. Approvers – (Person(s) who may approve or reject submittals based on this form), Optional (Person(s) who may approve or reject submittals based on this form – a second level of approval).	<p>Requirement: When a form is submitted and can be directly sent to an approver, gathered until all documents are submitted, at which point the approver can take action by suggesting changes, approving, or declining the document.</p> <p>Optional: If desired the document can go to additional approvers based on the workflow.</p>
2. Copy recipients – (Persons who are copied when the originator submits the form; Approvers are automatically notified, so do not include them in this list).	<p>Requirement: Depending on how the workflow is built, multiple people can receive the notification such as: case worker, employer, administrator. If a copy receipt needs to be sent to an individual, then that can be built in to the workflow and it will automatically be triggered.</p>

<p>3. Empyra Response:

Empyra is excited to engage with the Capital Region Workforce through this RFP No. 22-2330-4EMF_HENRICO – Customer Case Management and Data Collection System for Workforce Services for Virginia's Capital Region Workforce Partnership (CRWP).

Our founding mission is to improve equitable service delivery to all in the community by providing actionable connections to relevant resources. Empyra is celebrating 20 years of providing services to its customers in this mission. We are a minority-owned, woman-owned company. We have two main divisions in the company – a product group focusing on building and implementing case management, process flow platforms for customers, and the other focused on consulting. Within these divisions, we employ 85 approximately individuals with 3 physical offices and an ever-increasing number of employees that work remote.

We look forward to a discussion on how our forward facing, interoperable, cost-efficient customer case management solution and data collection solution will enhance the CRWP's efforts in providing a secure and simple virtual cloud-based solution with access to workforce development services. Additionally, we will show how our system streamlines and simplifies case management and automation, provides a network for community partners to engage with, and allows for easy transparent reporting to ease the experience for staff, partners and participants.

Virtual Collaboration Through Networking:

Furthermore, myOneFlow creates the kind of organizational network that is crucial to client service. Our system is fundamentally rooted in the network concept, with community agencies and partner organizations working in concert for clients. myOneFlow's staff portal allows for staff across organizations to document services and follow each client's individual journey. Staff may monitor roadmaps, send communications, update service plans, upload documents, document services and case notes, make referrals, close the loop on referrals, and a great deal more. Security configurations govern access to client data, and the integrity of PII is maintained. Staff have their own dashboards which prompt them to complete important tasks, and their own system of notifications helps them access myOneFlow when needed.

Transparent Reporting

CRWP can harness the power of myOneFlow's reporting muscle to manage data and reporting needs. Preset reports can update stakeholders on a variety of elements, whether it be outcomes, demographics, services rendered, funds spent, or various employment statistics. Administrators will have easy access to WIPS/PIRL elements, and staff will have reporting permissions that reflect their proper use of the system.

Reports may also take the form of configurable grant scorecards. With this functionality, scorecards can be configured for each program/grant to focus on the performance measures that matter most. myOneFlow ensures that managers can swiftly gain an understanding of how their programs are performing in terms of the measures defined – examples include placements, funding, skill gains, retention, etc. Not only are performance measures indicated, but financial allocations to grant outcomes also populate to scorecards.

Powerful scorecards provide real time performance metrics and allow the user to drill down to see who is in the numerator or denominator or in the measure that is displayed. This feature applies to both high-level state efforts as well as local programs.

Beyond predefined reports, staff may create and share ad hoc reports on any data element the system collects or look at pipeline funnels to gain key insights into their client's progress. Pipeline reporting is crucial to the myOneFlow experience, as it gives tremendous insight into how clients are moving between milestones. Not only will pipelines show you where your transitions are effective, they will also give you data driven clues into where your clients are most likely to fall through the cracks. This translates into actionable information for your team and a phenomenal opportunity to strengthen your programs.

We are confident the synergy between state and local data elements will provide CRWP administrators with the richest possible picture of services provided in the Capital Region.

myOneFlow offers CRWP a unique opportunity to adopt a system that simultaneously considers the needs of the region as well as various localities, provides clients with clear and focused guidance based on their own programming needs and eligibility, unites staff efforts cross organizationally to maximize service outcomes, sponsors unparalleled transparency into data, and properly manages multiple financial aspects. We would be honored to work with CRWP and appreciate your time in evaluating our offering.

Sincerely,

Shanthi Subramanyam

President and CEO, Empyra.com Inc.

B. PROGRAM PARTNERSHIPS

Identify Program Partnerships used to produce:

- i. Business Partnership
- ii. Workforce and community partnerships
- iii. Other partners

Empyra Response:

Empyra's myOneFlow solution has a catch phrase of "Are You in the Network?" which drives the ability to have one solution for multiple organizations to log into to stay connected and complete tasks. In this manner, the system has been designed and built from the ground up to meet the needs of the community from one organization all the way to multiple agencies, partner organizations, and the local businesses. myOneFlow supports connected community agencies and their business partnerships with the members involved in the system and decreases the processing time of program seekers and staff.

myOneFlow has one portal designed for each type of stakeholder (specific restricted role-based access as needed)– applicant, workforce agencies, employers and other communities to engage with the system based on role. The solution is configured in a short time to meet your needs – in terms of workflows, communication templates, events, services, etc.

With one log in site, connected organizations can take action they need within the system to such as indicate time tracking of a trainee, close a referral loop, make a referral to another agency, add notes and more.

We fully support using the CRWP myOneFlow system as the hub allowing other organizations to easily partner and engage with customers.

Brief Description of Project	
<p>[REDACTED] Adult Education, which encompasses 29 locations providing programs such as HSE, IET programs, ESL, Bridge Digital Academies and more, utilize myOneFlow as their student case management system. They use the system to provide an easy entry point of intake, tracking for all engagement, course offerings, and reporting and tracking for outcomes. Their programs are funded from various local programs and federal grants amounting to close to 5 million dollars.</p> <p>Their programs transitioned from a paper process to a fully automated process to make their process move from Transactional to Transformational very quickly. Through myOneFlow the transformation enabled them to go from a stable operation to future ready offering additional programs such as apprenticeships. Through an API configuration data is pulled into the system from the PeopleSoft and Banner programs at the college to populate student files automatically.</p> <p>Through myOneFlow, [REDACTED] assigns and manages their students based on individual preferences. For instance, as the individual answers specific questions on the intake form, such as a Spanish speaker, the workflow will by default place them with a Spanish speaking counselor. The configurable workflow that myOneFlow offers streamlines and automates the intake process, the services they are provided, and the communications that take place.</p> <p>Currently because myOneFlow tracks engagement action items such as texts and emails are automatically sent, [REDACTED] is seeing an increase in their retention. Through the notifications (emails and texts) [REDACTED] would be able to reach out to the individuals that have fallen through the gaps provide them the continued help and encouragement to reach their goals.</p> <p>Additionally, they are able to track and make visible to the student and case manager what activity the individuals have completed within their unique workflow such as assessment testing, form completion, class enrollment and course hours completed. From these milestones the system can track where each</p>	

person is in the process as well as what student has completed course hours and needs to take additional testing to assess MSG's.

MyOneFlow is used as an end-to-end solution addressing all needs of the [REDACTED] Adult Education programs. They continue to add programs expanding their use of myOneFlow across additional departments in the college system.

TAB 4 – SERVICE APPROACH AND IMPLEMENTATION

In the tab offerors shall provide information on the following:

A. STAFFING SUPPORT TEAM/PLAN

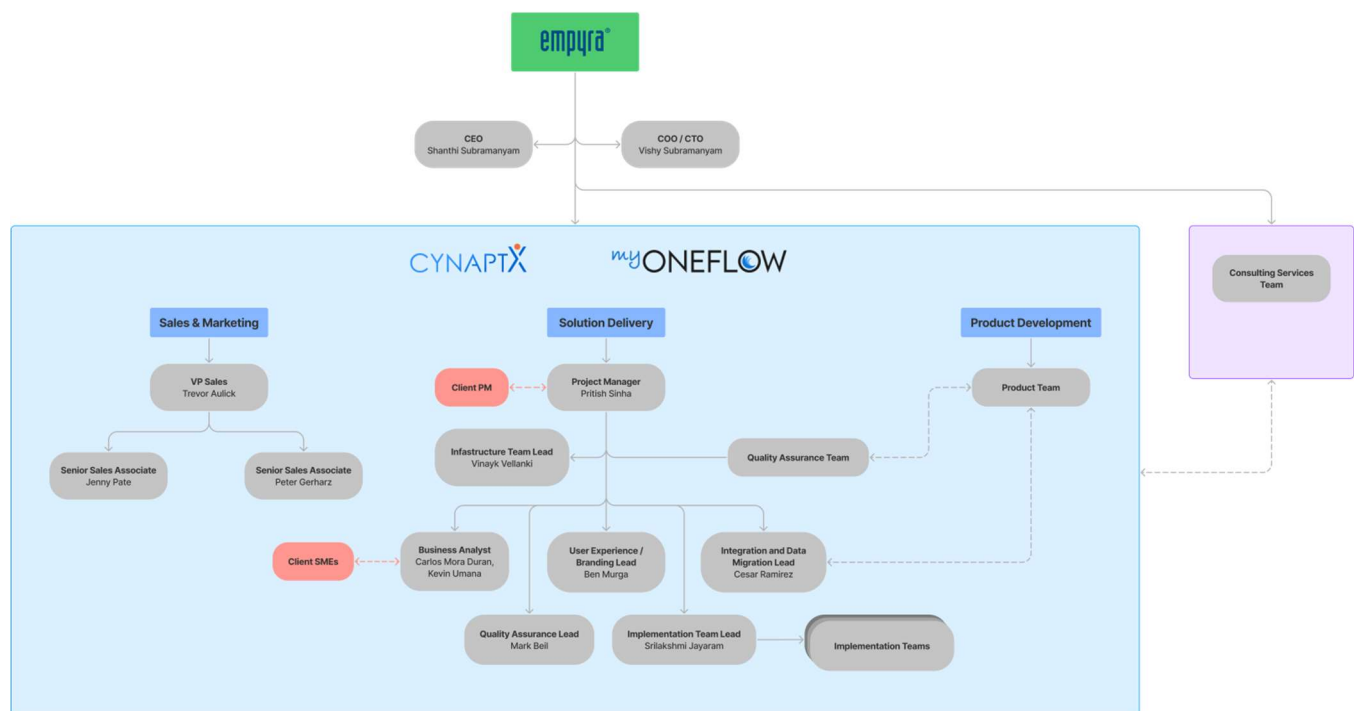

- Describe your staffing support team/plan. Include positions and staff areas of responsibility as related to the required Scope of Services. Include a copy of your current organization chart showing all major functions and components and the names of persons occupying named positions.

Empyra Response: Empyra deploys a consultative account management approach that spans the sales, implementation, and post implementation support phases of the relationship. Throughout the sales process, Empyra takes care to ensure that our partner organizations are contracting for the appropriate products and solutions for their business needs.

This consultative philosophy persists throughout the implementation phase, as Empyra gathers requirements, designs and configures the system, develops enhancements, tests, trains staff, and brings the service to life. Our project management philosophy brings us back to review requirements as the project matures so that considerate iterations may develop as our partner organizations gain familiarity with myOneFlow.

At the completion of the development and delivery stage, Empyra team will continue to work with the program team to ensure the solution is working well for users. We will review user satisfaction metrics with CRWP team. This includes user group sessions and communications, technical support, and stakeholder education and engagement. Our focus here is to ensure that what is delivered is on track to achieving your business objectives.

E. ONGOING STAFF DEVELOPMENT

Describe your organization's plan to provide ongoing staff development throughout the life of the contract award.

Empyra Response:

Empyra is preparing a library of training resources for myOneFlow which will be available to staff to review when needed. In addition, we will work with your team to put together collections of these for each job role, so that when you have a new staff member, you will be able to assign/him or her the task of reviewing all the training recordings that they need for their job role. ***These recordings will be updated every quarter as needed.***

We can also provide up to 10 two-hour training sessions as soon as the processes that are defined through requirements are fully implemented. A sample list of training is provided in Appendix 1

Every year, we will also include up to 10 two-hour trainings that can be requested as needed.

A. FLOWCHART OF SYSTEM SETUP

Provide a flowchart that best depicts how services will be provided over the course of the data system setup and ongoing.

Empyra Response:

We will use our implementation process to gather requirements. A part of this process is to understand and define the current and desired business processes and workflows. We often find that as we continue to gather these requirements and flows, we discover optimizations to the process that can be more effectively performed, once users understand the capabilities of our platform. Our process is summarized below:

OneFlow Implementation Process

Please see TAB 4- F (Implementation Plan) to see explanation of phases.

DEFINE (REQUIREMENTS)

We will understand and document/clarify requirements for the program requirements, user flows, programs, data conversion, interfaces, and operations. Jointly with your project manager, we will create an initial project plan, milestones, and the critical path to achieving your objectives.

We will also prepare multiple process flow diagrams starting with the high-level flow. The boxes in the high-level flow will be expanded out as needed in additional diagrams. Any detailed requirements will be linked to confluence pages where the detailed requirement can be documented. As we work through the process flow documentation, any change requests that are not part of the original requirements will be classified for further discussion of whether and when they will be implemented. (see change tab 4- section H).

We will document requirements through a combination of using user flow diagrams and Confluence, a collaborative documentation tool. Confluence will contain the details that cannot be placed on the diagram in the detail required (for example, if the requirement is that the job seeker completes a form X, the linked Confluence page will contain

the form as well as details about who completes the form, does it need signature, etc.). As the final step in requirements elicitation, we will go through the user flows and details and ensure that they are fully representative of the desired process, and will use this final review to clarify any vagueness. Where applicable, the requirements will also reference the flow diagrams. We will also have sessions to understand:

- current systems and ensure that we document all the details of current systems and systems we need to interface with – this will include purpose, scope of connection to that system, system owners, security implications, etc.
- current and desired workflows
- information required to configure myOneFlow (organizations, staff, security requirements, roles, workflows, services, documents, events, sites, forms, screens, dropdowns, etc.)
- partner flows and permissions

As we have a base implementation, we will use this opportunity to understand the requirements and what changes are required to existing flows, permissions and more.

The project plan will be reviewed and updated if needed based on the requirements.

DESIGN (CONFIGURATION OF SOLUTION)

There are two main aspects that will be covered by this phase

Solution mapping – mapping the requirements to features in myOneFlow, so we know exactly how the solution will be implemented (eg will this be a service or an event? How best will workflows be setup? Impact of changes to the workflows, etc). A high-level outline may also be configured at this stage for items that are solidified to optimize use of time.

Branding and design – Our UI/UX team will work with you to understand your branding requirements, work on designs / look and feel, get feedback and implement a final branding and website theme for CRWP. As the branding and design has been established, we will be seeking any change requirements for this phase.

DEVELOP, DATA MIGRATION & VERIFY

At the completion of the OFSD Design stage, the Empyra team will have identified any enhancements needed for your solution, and data migration and integration requirements are clear.

This phase will focus on Empyra team working on the development of enhancements and working on the data migrations and integrations required.

Each of these main activities will go through its own Review and UAT cycle.

DEPLOY/ PREPARE FOR GO-LIVE

The outcome of this stage occurs when user acceptance testing is passed and the completed site is launched in production. This phase involves preparation for go-live, training and help updates, end user training, technical support, and onboarding management to ensure that all stakeholders are able to successfully use the system to its full advantage.

POST GO LIVE SUPPORT & SOLUTION OPTIMIZATION

At the completion of the development and delivery stage, Empyra team will continue to work with the program team to ensure the solution is working well for users. We will review user satisfaction metrics with CRWP team. This includes user group sessions and communications, technical support, and stakeholder education and engagement. Our focus here is to ensure that what is delivered is on track to achieving your business objectives.

B. USERS

Describe the number of job seekers, staff, partners and employers that will be available to use the system annually.

Empyra Response: Empyra will provide access based on the RFP requirements of 300 job seekers, 100 employers, 80 staff and 20 partners.

C. HELP DESK

Describe your organization's help desk and implementation strategy for its data system and program.

Empyra Response: The Empyra team will train CRWP and partner staff and myOneFlow administrator to raise support tickets as needed.

Empyra will provide technical support using JIRA Service Desk on a 24x7 basis. This provides an online portal where issues can be raised anytime.

Staff determined to need access will be provided access to Empyra's online ticketing system, JIRA Service Desk. Staff may enter issues needing attention and enhancements directly, view the status or all issues/enhancements entered by program staff and Empyra staff, and produce performance reports for issues/enhancements by resolution stage and time to resolution. Empyra will also provide the main point of contact (project manager) staff with emergency cell phone numbers of the PM, Support manager on call at Empyra for critical issues.

Staff determined to need access will be provided access to Empyra's online ticketing system, JIRA Service Desk. This will be used to manage the issues / help desk requests raised by the district staff with Empyra. In addition, users can call Empyra's Help Desk, which is manned between 8 AM – 6 PM CST/ 6AM -4PM PST all weekdays except national holidays. Empyra has offices in Ohio and also in Dallas, Texas. Empyra's help desk also monitors JIRA for issues that are being raised and any and all issues, phone calls, emails etc. are tracked in JIRA. These tickets are automatically assigned to a queue and based on the severity of the tickets, they are triaged and resolved.

We prefer that all issues are logged through the ticketing system to enable our team to process them efficiently. All calls received are logged and can be reported on. If first level support is not able to assist, they will escalate to the second level (the Project Manager), who will investigate and assign the issue to the appropriate technical resource and manage it through resolution, ensuring that customers are kept informed. Our support system will send email notifications when issues are resolved.

If a critical issue is reported, we will resolve the issue and will install an update as soon as practically possible with minimum disruption. When there are a set of issues of high priority resolved, we will work with the CRWP PM to decide on the appropriate point for an upgrade.

The Empyra Project Manager will work with the staff to coordinate off-hours support that may be needed for specific upgrades and patch management related to the application. Planned maintenance windows will always be outside of business hours and will always be coordinated with the district project management team well in advance.

F. DISPLAY OPTIONS

Offeror must indicate what data cannot be queried and the various display options.

Empyra Response:

myOneFlow is a configurable system, which provides a comprehensive ad-hoc reporting system that allows for the group to be restricted based on conditions that span the data collected in the system. There are also a number of group reporting types that provide data for:

jobseekers, services, events, outcomes, placements, program enrollment and more.

We also have operational reports that provide our customers with an option for a custom report of to use one from a common set of useful reports that we have built over the years.

Report data can be viewed in table form, and where applicable, with a chart, such as a pie chart, bar chart or line graph. Data from ad-hoc reports can be exported to Excel, or printed to PDF. Operational reports can be exported to pdf, excel, image (TIFF) etc.

G. SECURITY

H. IMPLEMENTATION AND WORKFLOW

Describe the number of implementation and workflow development hours and ongoing support cost annually.

Empyra Response:

Post go-live we include 100 hours of continued implementation support per year. These hours can be utilized for implementation of new workflows or changes to existing workflows, configuration, and other system changes.

I. UPLOAD OPTIONS

Describe how customer and staff will upload or complete documents through mobile app versus the desktop.

Empyra Response: myOneFlow supports the process of requested documents for approval.

Desktop: To complete the process on a computer, the client will have to take a picture or scan their document and email or send it to their computer. Once it is on the desktop, the client can log into the myOneFlow system and go to the document request and click "upload". They will be prompted to "select and attach" a file from the desktop. At that point they choose upload document and "submit".

Mobile App: To upload the document from the mobile app, they can log into their myOneFlow account from their phone, go to the document request and take a picture of their document. It will automatically go to their file in myOneFlow.

In either case, the document is then in the system and the staff can complete the approval or decline of the document.

Clients can change a document uploaded until it is locked. When staff reviews a document, it is locked in order to be able to ensure that it is saved as a part of the auditable record. Both staff and clients have the ability to upload documents. Staff may verify client documents as per their roles and responsibilities. Clients can upload other documents such as resumes or cover letters at any time.

J. RELIABILITY

Describe the host site outage and reliability information.

TAB 6 – PRICING

In this tab, offerors shall provide an itemized list of all costs associated with providing the services outlined in Sec. III of this RFP. Offerors shall use

Attachment G to provide pricing over the seven (7) year period. **Attachment G is provided as a separate Excel attachment.** Price shall be evaluated on total cost for year 1-7.

See attachment G in the SharePoint [Attachment G Price Sheet.xlsx](#)

TAB 7 – EXCEPTIONS

In this tab, Offerors shall list any exceptions taken to the Scope of Services and General Terms and Conditions of this Request for Proposals. The County intends to make the RFP and the Successful Offeror's proposal a part of the contract between the parties, so Offerors should list any exceptions for purposes of negotiating the contract

Empyra Response: When asked about the ability to decline a document without providing a reason we had to answer no. This is intentional because we found that if answer is not provided, then typically more time via email clarification ends up happening. If this is a criteria that is needed we can discuss the possibilities of this development.

TAB 8 – ASSUMPTIONS

In this tab, offerors shall list any assumptions made when responding to this Request for Proposals.

Empyra Response: We assume the availability of CRWP staff as needed for meetings and clarifications, especially during the initial few weeks where requirements gathering and clarifications are taking place.

We have made some assumptions about multiple phases, but the actual decision about phases and what will be released in these phases is for the joint CRWP and Empyra team to work out.
