RE: BAFO for RFP No. 22-2326-3EMF Library Databases for Henrico County Public Schools

Dear Ms. Falcone,

Thank you for the opportunity to present best and final pricing for Britannica's resources to Henrico County Public Schools (HCPS). Per your request, we have updated attachments "H" and "I" with pricing for Option 2: Britannica School and Britannica ImageQuest (currently subscribed to by HCPS). As these resources are K-12 and have been purchased by the district historically in this manner as a package offering, we have used an enrollment of 48,916 and multiplied by our greatly discounted price per user for each database.

- Option 2 prices:
Britannica School: \$16,274 (\$.33 per user)
Britannica ImageQuest: \$13,596 (\$.28 per user)
Total Package: \$29,870

Further, we have provided optional contracted pricing for Professional Learning, which is available "a la carte" on an as needed basis and not included in the proposed grand total. Lastly, we find that many of our customers have recently discovered the value in adding our natural Spanish language resources Britannica Escolar and Britannica Moderna (also known as the Spanish Reference Center), thus we have included optional pricing for those resources as well:

- Professional Learning Options:
Onsite - \$3500/day for a maximum of 25 participants (10% discount for consecutive days)
Virtual - \$2000/day for 6 hours of learning for a maximum of 25 participants
- Spanish Reference Center Option:
Britannica Escolar and Britannica Moderna: \$14,420 (\$.29 per user)
Total Package combined with Britannica School and ImageQuest: \$44,290

Feel free to contact me directly with questions regarding this submission. We appreciate your continued interest in supporting exceptional academic performance and inspiring curiosity through use of Britannica's resources.

Best regards,

EXHIBIT “C”

DEFINITIONS

Data Breach means an event in which Division Data is exposed to unauthorized disclosure, access, alteration or use.

Division Data includes all business, employment, operational and Personally Identifiable Information that Division provides to Provider and that is not intentionally made generally available by the Division on public websites or publications, including but not limited to business, administrative and financial data, intellectual property, and student, employees, and personnel data, user generated content and metadata but specifically excludes Provider Data (as defined in the Contract).

De-Identifiable Information (DII): De-Identification refers to the process by which the Provider removes or obscures any Personally Identifiable Information (“PII”) from student records in a way that removes or minimizes the risk of disclosure of the identity of the individual and information about them. Anonymization or de-identification should follow guidance equivalent to that provided by U.S Department of Education publication “Data De-identification: An Overview of Basic Terms” or NISTIR Special Publication (SP) 8053 De-Identification of Personally Identifiable Information. The Provider’s specific steps to de-identify the data will depend on the circumstances, but should be appropriate to protect students. Some potential disclosure limitation methods are blurring, masking, and perturbation. De-identification should ensure that any information when put together cannot indirectly identify the student, not only from the viewpoint of the public, but also from the vantage of those who are familiar with the individual. Information cannot be de-identified if there are fewer than twenty (20) students in the samples of a particular field or category, *i.e.*, twenty students in a particular grade or less than twenty students with a particular disability.

Indirect Identifiers: Any information that, either alone or in aggregate, would allow a reasonable person to be able to identify a student to a reasonable certainty

Personally Identifiable Information (PII): The terms “Personally Identifiable Information” or “PII” shall include, but are not limited to, student data, staff data, parent data, metadata, and user or pupil-generated content obtained by reason of the use of Provider’s software, website, service, or app, including mobile apps, whether gathered by Provider or provided by Division or its users, students, or students’ parents/guardians, including “directory information” as defined by §22.1-287.1 of the Code of Virginia“.

Per your request, we have updated attachments "H" and "I" with pricing for Option 2: Britannica School and Britannica ImageQuest (currently subscribed to by HCPS). - Option 2 prices:
Britannica School: \$16,274 (\$.33 per user)
Britannica ImageQuest: \$13,596 (\$.28 per user)
Total Package: \$29,870

Further, we have provided optional contracted pricing for Professional Learning, which is available "a la carte" on an as needed basis and not included in the proposed grand total. RE: RFP No. 22-2326-3EMF Library Databases

Dear Mr. Knott and Ms. Falcone,

Henrico County Public Schools (HCPS) seeks school library research databases to support research and inquiry by its nearly 50,000 students, across all grade levels. Resources must be easy to use, accessible, and support multiple reading levels.

As the district's database provider for more than ten years, Encyclopaedia Britannica (Britannica) is pleased to submit a proposal that includes multiple Britannica Digital Learning resources to support HCPS learners of all ages. Our proposal includes the district's currently subscribed resources—Britannica School and Britannica ImageQuest—as well as two Spanish language resources—Britannica Escolar and Britannica Moderna.

Britannica has been empowering the way the world teaches and learns for over 250 years. We have become a powerhouse multimedia educational brand at the forefront of the information revolution, with proven digital learning solutions that meet the evolving needs of lifelong learners today. Our mission is to encourage discovery, spur exceptional academic performance, and inspire curiosity and the joy of learning.

There is no comparable solution that has the amount of trusted content and multimedia that Britannica offers HCPS, or our frequency of updates. Britannica provides daily content updates and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media annually across our three easy-to-use, age-appropriate Britannica School interfaces. Our resources support the Virginia Standards of Learning, provide leveled articles, and meet requirements for accessibility.

We look forward to a continued partnership with HCPS. By integrating Britannica's rigorous academic content, millions of rights-cleared images for educational use, and native Spanish resources, HCPS will be providing world-class digital resources to HCPS educators and students. Feel free to contact me directly with questions regarding this submission.

Best regards,

Tab 2 – Statement of the Scope

In this tab, Offerors, in concise terms, shall state their understanding of the Scope of Services requested by this RFP in Section II.

II. Scope of Services

A. General Requirements

1. A solution for PK-12 coverage for general encyclopedia databases including, but not limited to dictionary, thesaurus, almanac and atlas.

We are pleased to propose four databases for access by Henrico County Public Schools (HCPS) staff, teachers, and students. These resources include:

- Britannica Online School Edition (Britannica School) – Digital encyclopedia for K–12 audience
- ImageQuest – Database of 3.4 million rights-cleared images for K–12 education use
- Britannica Escolar – Digital encyclopedia for K–8 audience, in native Spanish
- Britannica Moderna – Digital encyclopedia for High School audiences, in native Spanish

We describe each of these resources on the following pages.

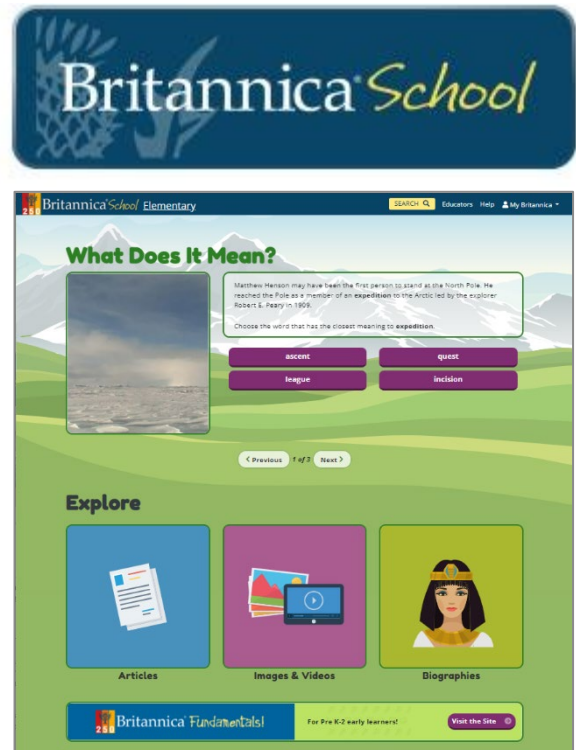

Britannica School

Britannica School includes unique encyclopedia content for HCPS elementary, middle, and high school students. More than 133,000 full-text encyclopedia articles are complemented by full-text magazine articles, student-friendly web sites, and rich multimedia (photos, illustrations, videos, animations, infographics, maps, and more).

Content is differentiated at four levels:

- K–2 Fundamentals
- 3–5 Elementary Level
- 6–8 Middle School Level
- 9–12 High School Level

This resource was created to meet HCPS students where they are on the learning spectrum. The Fundamentals level is a self-contained database that offers text, games, and activities for the youngest learners. The interface is colorful and engaging. The Elementary, Middle, and High School levels are all part of a single site with each having its own age-appropriate interface. Students can access lower and higher reading-level content without leaving the interface.

Britannica School provides many features that support teaching and learning in HCPS. Database articles have been aligned to the Virginia Standards of Learning so educators can search for a standard and see content that will support that standard. Our Quick-Click Dictionary allows students to click on any word to retrieve its definition, audio pronunciation, and Spanish translation. The included translation tool can translate any article into over 80 different languages. The articles include Lexile levels, and search results can be filtered by Lexile range. Users also can increase or decrease font size on any article or have the article read aloud. Additional functions include a variety of search methodologies, the ability to print and save documents, classroom activities, research support, specific features that provide instructional support, etc.

Britannica School integrates with classroom tools such as Google Drive and/or Google Classroom as well as One Drive. Britannica School also integrates with many popular school and library technologies including:

- Single Sign On (SSO) tools like Clever and ClassLink
- Learning Management Systems like Canvas and Schoology
- Library Management and Discovery services like Follett Destiny, Mackin Via, and EBSCO Discovery Services

There is no comparable resource that has the amount of content and multimedia that Britannica offers or our frequency of updates. Britannica provides daily content updates, and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media annually.

Britannica ImageQuest

Britannica ImageQuest provides HCPS students, educators, and staff with access to more than 3.4 million rights-cleared images from one convenient site. More than 55 of the best image providers in the world—including the Bridgeman Art Library, DK Images, Getty Images, the National Portrait Gallery of London, and the Natural History Museum of London—have joined with Britannica to provide the best and broadest collection of proprietary educational imagery (not freely available on the web).

All images in Britannica ImageQuest are rights-cleared for non-commercial, educational use—great for HCPS school curriculum materials, teacher lesson plans, assignments, activities, and whiteboards; student reports and projects; or school websites, newsletters, newspapers, flyers, and bulletins. As a fully searchable resource, Britannica ImageQuest provides a unique collection from trustworthy sources. With images of every topic in one convenient site, users don't have to spend time combing through multiple Web sites looking for reliable images.

Each image comes with complete metadata, including the source, the copyright holder, caption, and keywords. Each image is downloadable and includes proper citations in MLA, APA, Harvard, and Chicago Manual of Style formats.

Britannica Escolar

Britannica Escolar is the leading knowledge-building resource that is universally trusted for accurate and age-appropriate content in Spanish. Britannica Escolar has two distinct levels of unique content for HCPS students and educators—Primaria (Elementary) and Secundaria (Middle School)—offering information of interest to every age. The program’s features make it an invaluable resource to add for HCPS’s native Spanish speakers, bilingual students, and students learning Spanish.

Features and benefits include:

- engaging home pages at each level that are entry points to thousands of articles, images, videos, maps, and tables, many of which are added daily.
- Reino Animal (Animal Kingdom) and Sabías que...? (Did You Know?) features, which pique students’ curiosity and the desire to dig deeper.
- Mi Britannica (My Britannica), which offers a convenient place to save, organize, and share collections of content that users find in Britannica Escolar.
- a responsive design that provides access to the site anytime, anywhere, and on any device, including tablets, smartphones, and laptops.

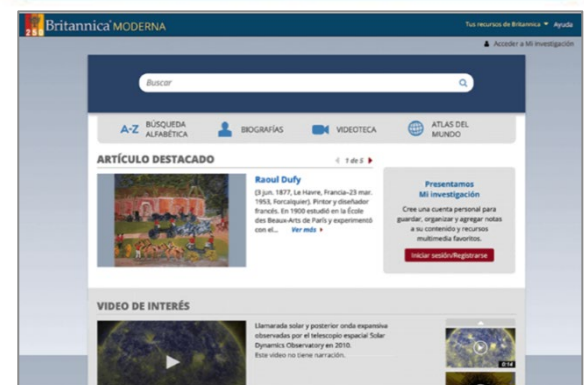

Britannica Escolar also offers HCPS students a bank of interactive learning activities where they can practice basic math and language skills, Spanish grammar and reading skills, geography, history, and math.

Britannica Moderna

Britannica Moderna is the definitive Spanish-language resource, complete with age-appropriate content for older HCPS students and their teachers. Britannica Moderna provides access to nearly 47,000 articles, as well as more than 13,000 images, maps, audiovisual materials, a dictionary, and atlas. Articles from BBC World News provide patrons with international news, features, and analysis within the same platform. The program’s features make it an invaluable addition for HCPS’s older native Spanish speakers, bilingual students, and students learning Spanish.

Like the other editions described above, Britannica Moderna offers the ability to save resources for quick access again in the future. The program’s responsive design provides an optimal viewing experience across a variety of devices (e.g., smartphone, tablet, computer) and is accessible via web browser from wherever HCPS teachers and student seek to connect.

2. The ability to print and/or email and/or transfer to Google Drive accounts of full text, abstracts, and graphics and does not require email access on the searching computer.

HCPS teachers and students can print articles and graphics, email links to articles and graphics (without email logging into email to send) and save full-text articles to Google Drive accounts. Saving to Google Drive requires logging into Google.

3. Lesson plans and/or resources tied to Virginia SOL.

The Teaching Tools (**Figure 1**) section of Britannica School includes a space where HCPS educators can browse for content aligned to Virginia Standards of Learning and create and save lesson plans.

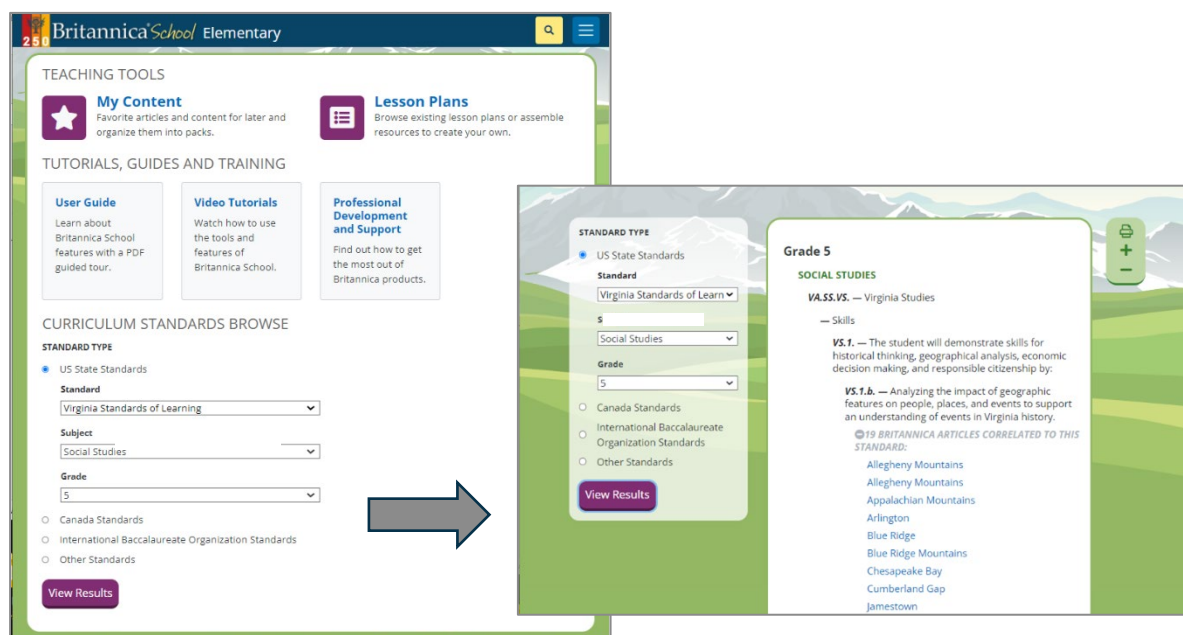

Figure 1. Search for articles aligned to Virginia state standards.

4. Copy ready citations, format tools, compatible with citation builder such as Noodle Tools.

Britannica’s resources have copy ready citations in MLA, APA, Harvard, and Chicago Manual of Style formats that can be copied and pasted. Citations do not export to Noodle Tools.

5. Translation for ELL students and language classes and audio for students.

Britannica School’s translation tool can translate any article text into over 80 different languages. We have also proposed Britannica Escolar and Britannica Moderna which are databases developed in Spanish with Spanish audio.

6. A variety of formats (video, audio, ebook, reference, periodical, transcript, etc.) which include primary and secondary source documents.

The resources we propose will provide HCPS students and teachers with resources in a variety of formats including more than 133,000 full-text encyclopedia articles in Britannica School complemented by primary sources such as access to letters, and speeches; full-text magazine articles; student-friendly web site links; rich

multimedia (photos, illustrations, videos, animations, infographics, maps, and more). Our solution also includes more than 60,000 articles in Spanish and more than 3.4 million rights-cleared images for educational use.

7. Reading, vocabulary, and conceptual level appropriate for age level of students.

Britannica School includes articles at multiple levels and delivered in interfaces appropriate to students' age levels as described below:

- K–2 Fundamentals
- 3–5 Elementary Level
- 6–8 Middle School Level
- 9–12 High School Level

8. Articles that can be linked to Schoology and/or other district platform programs.

Articles from Britannica articles can be cut and pasted for sharing elsewhere.

9. Searches multiple encyclopedias/articles/etc.

Britannica School allows users to search three databases of content at different levels (elementary, middle, and high school). Britannica Escolar searches Spanish articles from our Spanish elementary and middle school databases, while Moderna searches our high school level Spanish database.

10. Ease of access. No more than 3 clicks from initial search to get to information.

Britannica's proposed databases are easy to use and generally do not require more than 3 clicks from initial search to get to information.

11. Multiple reading levels preferred (single articles that can be leveled for reading ability).

Britannica School includes articles at three different ranges of reading level and articles can be filtered by Lexile Level.

12. Graphic friendly, colorful interface, and are ADA compliant and comply with the Information Technology Accessibility Act Code of Virginia- 2-2-3500)

Each proposed resource has its own graphic-friendly, colorful interface that is ADA compliant (described later in this tab) and complies with the Information Technology Accessibility Act Code of Virginia- 2-2-3500.

As described above, Britannica School has three user-friendly interfaces to serve the needs of all HCPS students. After navigating to the Britannica School homepage, students select to enter or search one of the following three interface options (**Figure 2**, on the next page):

Figure 2. Guide students to the best interface and resources for them based on their desired content level or use-case.

Once users have selected their interface, they will access the content and tools associated with that level of experience as shown in **Figure 3**. In every interface, users can search using keywords in the search bar at the top of the page or can explore by reference type (e.g., articles, media, biographies) or subject.

Figure 3. Engage users with user interfaces and leveled content that meets their needs and interests.

Below is a brief summary of each interface. Please note that content at different reading levels is available throughout these interfaces as noted below.

- **Fundamentals** – Designed for early learners, grades Pre-K–2, this interface (**Figure 4**, below) keeps kids on a single page with all navigation occurring within a single pane. It combines bright colors and active animations to engage younger students and provide a fun introduction to online learning.
- **Elementary**– The Elementary interface for grades 3–5 includes bright colors and visual browsing options for students. From the Elementary interfaces, students can search all content levels and choose to move up to the Middle interface.
- **Middle** – The Middle interface provides a more grown-up look and feel and allows students to change the content to lower and higher reading levels while staying in the interface that is right for them. Searching is done across all levels with a default at Level 2 (middle school).
- **High** – A still more mature look is combined with more advanced features and content sets in the High interface. As with the middle school level, students can adjust the reading level of the content displayed as needed without having to move to a page with a younger look and feel.

Figure 4. Provide Pre-K–2 students with a fun introduction to online learning with Fundamentals like biomes, read-aloud informational stories, math and literacy games, and a creative space.

Britannica Escolar

After accessing the Britannica Escolar website, HCPS users can choose between two interface levels: Primaria (Elementary) or Secundaria (Middle) as shown in **Figure 5**, next page. Once users have selected their interface, they will access the content and tools associated with that level of experience. In every interface, users can search using keywords (in Spanish) in the search bar at the top of the page or can explore by reference type (e.g., articles, media, biographies) or subject.

Figure 5. Allow users to select the interface that delivers age-appropriate content and features.

Britannica Moderna

Upon accessing Britannica Moderna, HCPS users can use the search bar to search using a word written in Spanish (Figure 6). Users can also search alphabetically, browse through biographies of prominent figures, check out the video library or use the Atlas del Mundo (World Atlas) to explore different regions of the world. At the bottom of the homepage users will see the latest news from the BBC Mundo newsfeed. Clicking on the phrase Mi investigación in the top right corner of the interface allows users to quickly access the Britannica Moderna content they have previously saved by favoriting (clicking on the star) an article.

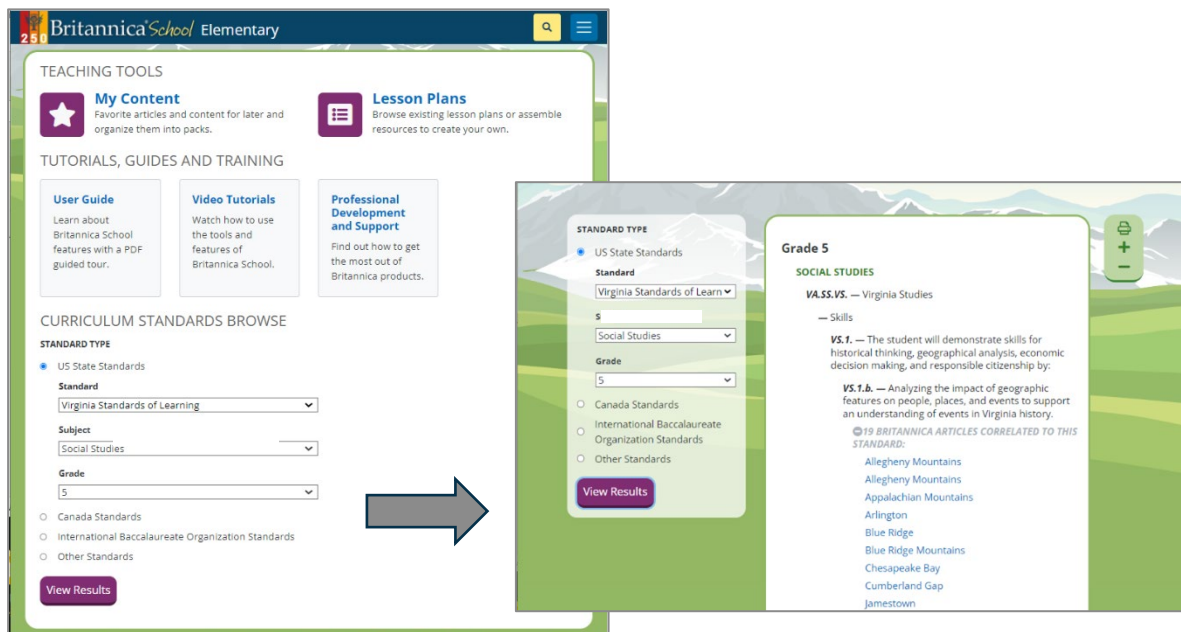

Figure 8. Search for articles aligned to Virginia state standards.

C. Reporting

The proposed solution should provide a monthly data metric systems usage report, in a format to be agreed upon.

We describe our metrics and provide sample reports in *Tab 7 – Reporting and Monitoring*.

D. Training and Support

1. Offerors should include a description of the optional or required training for implementation of programs as well as options for continued training (on-site, webinar, and printed materials) for all users. Offerors should provide pricing for training and Professional Development.

Our optional paid professional learning is described in *Tab 8 – Training and Professional Development*.

2. The Successful Offeror shall offer a toll-free service number for help desk support to HCPS at a minimum from 8:00 am to 5 pm EST, Monday-Friday.

Toll-free customer support is available during the hours of 9 AM to 6 PM Eastern Standard Time, Monday–Friday.

III. Technology Requirements

A. User Interface

1. Browser Support – the proposed solution shall:

a. Have compatibility with the current versions of multiple browsers- at minimum, current versions of Edge, Safari, and Chrome browsers.

Our products are available to use on demand, on any device using a standard browser. Britannica's online products are built with a responsive design, so content adjusts to fit the user's display without losing content or degrading the user experience. Whether HCPS teachers and students need to work at school, at home, or from another remote location, our educational products will be accessible wherever they have Internet.

To maximize performance, we recommend using an up-to-date version of Google Chrome, Apple Safari, Mozilla Firefox, or Microsoft Edge.

b. Maintain compatibility with listed browsers and future versions/updates/releases of the listed browsers for the duration of the contract.

Britannica will maintain compatibility with the listed browsers and any future versions/updates/releases of these browsers for the duration of the contract.

c. Only require standard browser plugins.

The proposed databases may contain resources that require a PDF reader to view. A default viewer is included with most operating systems and web browsers. If missing, your browser may prompt you to download one to view certain content. We advise using an up-to-date version, and Adobe Acrobat Reader can be downloaded for free.

2. The proposed solution will be compliant with the Americans with Disabilities Act requirements for accessibility.

To fulfill the objectives of our accessibility commitment, we have adopted as our primary guidelines the Section 508 website accessibility standards set forth by the U.S. General Services Administration and also the Web

Content Accessibility Guidelines (WCAG) 2.0 recommended by the World Wide Web Consortium (W3C). We continuously test Britannica sites for compliance with the accessibility standards set forth above and try our very best to remain compliant.

The accessibility of Britannica sites, however, depends on third-party technologies provided by the operating systems, hardware platforms, and assistive technologies, all of which can affect the level of accessibility of Britannica sites.

We will continue to enhance the accessibility of our online products as greater functionality becomes available to ensure ongoing usefulness to all users, including those with different abilities.

We also are committed to addressing issues that prevent the use of our software by people with different abilities. We welcome user feedback and suggestions. If HCPS users have any comments or questions about our online products and the accessibility thereof, they can contact Britannica Customer Support at 1-800-621-3900, ext. 7160 or go to the Britannica Customer Support form.

3. The proposed solution shall be cloud-based and delivered via the Internet over wireless LANs to the client's browser.

Our proposed solution is cloud-based and accessed via an internet browser.

4. The proposed solution shall provide an intuitive user interface that allows for ease of use by teachers and students.

As described in response to general requirement number 12, above, Britannica's solutions provide intuitive user interfaces for ease of use by teachers and students.

5. The proposed solution shall support mobile technology including but not limited to the specific mobile devices currently used in HCPS (iOS, Chromebooks and Android Platforms).

Our products are available to use on demand, on any device using a standard browser. Britannica's online products are built with a responsive design, so content adjusts to fit the user's display without losing content or degrading the user experience.

B. Integration

1. The proposed solution shall provide methods for user account administration that are easy to use and maintain.

Britannica's proposed solutions do not require user accounts, authentication takes place at the district or building level.

2. The proposed solution shall support a single sign-on solution that does not require staff or students to have a separate account or password for accessing the vendor's application.

Our proposed solution does not require staff or students to have an account and password. Optionally, should the district desire, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

3. The proposed solution shall allow for LTI, Azure Active Directory or LDAP as a method of authentication and authorization.

Currently the district uses IP authentication to access Britannica solutions. Britannica School also supports LTI authentication through Schoology, Classlink, Canvas, Safari Montage. Britannica ImageQuest, Britannica Escolar, and Britannica Moderna also support those same authentication methods with the current exception of not supporting Schoology.

4. The proposed solution shall provide a means to identify the individual or client using the application, authenticate the individual and determine the authorities and rights granted to that individual as well as a reporting engine for tracking usage and progress.

Through the offered authentication methods, the proposed Britannica resources identify users as belonging to a HCPS account and provide access to the subscribed-to resources.

Britannica usage can be reported down to the building level if authentication methods are set up to support such reporting. Currently HCPS usage is set up to report all elementary schools together as one category and the remainder of schools as a separate category.

5. Any requirements for student, staff, course, roster or school information must be supported through a common specification. The exchange of data must be through a common protocol and not require the installation of vendor-specific software in the HCPS internal infrastructure. HCPS currently supports the following means of exchanging student information in order of preference but will accept other non-vendor specific protocols:

- a) LTI integration as a Tool Provider (TP) with our LMS Solution (Schoology)
- b) SIF - Student Information framework
- c) Exchange of information through Clever - a third party vendor for exchanging common data for school systems; the Successful Offeror is responsible for any costs incurred with Clever implementation.
- d) File exchange via the IMS OneRoster format to a vendor supported sFTP server
- e) File exchange to a vendor-supported sFTP server. If this option is used the vendor must provide all specifications for file requirements in their proposal.

Student, staff, course, roster or school information is not required for use of the proposed Britannica resources, but, optionally, should the district desire, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

Britannica School supports LTI authentication through Schoology, Classlink, Canvas, Safari Montage. Britannica ImageQuest, Britannica Escolar, and Britannica Moderna also support those same authentication methods with the current exception of not supporting Schoology.

6. No additional fees may be charged to HCPS for data integration

Britannica acknowledges this requirement.

7. The proposed data exchange solution must be described in detail in the Offeror's response. The proposed solution must also include limitations the Offeror has such as the number of teachers for a class and the number of schools associated with teachers and students.

We describe data exchange in *Tab 5 - Technical Administration, User Interface, and Integration*.

8. Solutions that allow for seamless integration of their product through the IMS Global interoperability standards are preferred. The proposal shall provide a detailed description of the implementation and support the solution has for LTI version 1.1 ® or higher certified as a Tool Provider (TP) with our LMS Solution (Schoology).

We describe data exchange in *Tab 5 - Technical Administration, User Interface, and Integration*.

C. Infrastructure and System Administration

1. The proposed solution will provide a secure, web-based system for data in transit and at rest.

The proposed solution includes secure, web-based databases hosted on the AWS platform.

2. Successful Offeror(s) will document compliance with all local, state, and federal laws related to student data privacy.

Britannica is dedicated to ensuring the security and privacy of our customer data, we describe the administrative and technical safeguards we maintain in *Tab 6 – Infrastructure and System*.

The subscribed-to products are compliant with laws regarding child and student privacy and protection including provisions of the Children's Online Privacy Protection Act (COPPA), the Family Educational Rights and Privacy Act (FERPA), and the Protection of Pupil Rights Amendment (PPRA).

Britannica obtains consent from the subscribing school/district. as permitted by law, by entering into a subscription license agreement for each subscribed-to product with the consenting school/district. The agreement permits Britannica to collect certain personal information solely for the use and benefit of the subscribing institution and for no other commercial purpose.

Types of personal information that may be collected by use of the products (as permitted by agreement with the subscribing institution) include: IP addresses of users; meta data on user interaction with the subscribed-to product; student grade level; homeroom; student school enrollment; student scheduled courses; teacher names; local and state school ID numbers; assigned student ID number; student app username; student first and/or last name; student responses to surveys or questionnaires; and student generated content. This data is stored for the length of time permitted by and agreed upon in our agreements (including data protection agreements) with the subscribing institution and at the direction of the subscribing institution or as otherwise required by applicable laws. Certain data may be shared solely with a Britannica-approved third-party service provider solely as may be necessary to deliver the product and its services in the manner described and as contracted for by the subscribing institution.

Our accredited and experienced data privacy team oversees the policies, procedures, and systems that ensure security and privacy. This would be happy to answer specific questions related to compliance with specific local, state, and federal laws related to student data privacy.

3. The proposed solution shall contain neither commercial content nor serve as a vehicle to market goods and services.

Our proposed solutions are developed specifically for K–12 school use and do not contain commercial content nor do they serve as a vehicle to market goods and services to students.

4. Web Accessibility

a. The solution shall be accessible to persons with disabilities, including: i. Blindness, color blindness, visual impairment

ii. Deafness, hearing impairment

iii. Speech impairment

iv. Mobility, strength, dexterity or reach impairment

b. The solution shall support the use of commonly available screen readers.

c. The solution shall comply with Federal Web Accessibility Standards (part of Section 508 of the Rehabilitation Act).

d. The solution shall meet Level A and Level AA guidelines as specified by the W3C's WCAG 2.0 guidelines.

To fulfill the objectives of our accessibility commitment, we have adopted as our primary guidelines the Section 508 website accessibility standards set forth by the U.S. General Services Administration and also the Web Content Accessibility Guidelines (WCAG) 2.0 recommended by the World Wide Web Consortium (W3C). We continuously test Britannica sites for compliance with the Level AA accessibility standards set forth above and try our very best to remain compliant.

The accessibility of Britannica sites, however, depends on third-party technologies provided by the operating systems, hardware platforms, and assistive technologies, all of which can affect the level of accessibility of Britannica sites.

We will continue to enhance the accessibility of our online products as greater functionality becomes available to ensure ongoing usefulness to all users, including those with different abilities.

We also are committed to addressing issues that prevent the use of our software by people with different abilities. We welcome user feedback and suggestions. If HCPS users have any comments or questions about our online products and the accessibility thereof, they can contact Britannica Customer Support at 1-800-621-3900, ext. 7160 or go to the Britannica Customer Support form.

5. The proposed solution shall be able to handle at least 60,000+ concurrent HCPS users with less than 30 ms latency. Offeror(s) must provide comprehensive documentation to evidence the ability to accommodate concurrent users based on data collected from a similar environment.

As the nature and content of our databases generally do not require the full student population of a school district to log on at the same time, Britannica does not currently have any evidence from which we can draw to specifically demonstrate support for 60,000 concurrent users. As far as we are aware, HCPS has not experienced latency or bandwidth issues resulting from current usage.

6. If the solution is reliant on LDAP authentication, HCPS will only accept a defined external IP address to allow Firewall transactions and will not accept the allowance of entire network segments.

LDAP authentication is not applicable to our solution.

7. HCPS shall have the ability to submit requests for an alteration of the digital content (including additional supporting data, modification of current data, or removal of data deemed inappropriate by HCPS) via email or web-based forms embedded in the digital content.

There is no comparable resource that has the amount of content and multimedia that Britannica offers or our frequency of updates. Britannica provides daily content updates, and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media to the Britannica School databases annually. HCPS is welcome to send requests for additional supporting data or modifications of current data via email and our editorial team will review and consider if such requests meet our editorial policies and content guidelines.

All Britannica School content that was developed by our editorial team aligns with Britannica's editorial policies and guidelines for developing and providing content at appropriate audience levels. Should HCPS contest the appropriateness of specific content for a specific age or audience, Britannica will review the material in question to ensure it aligns with our editorial policies and guidelines. Whether or not the material will be edited or removed will be dependent on the extent to which we find the material aligns to our policies, the findings of which will be explained in our response to HCPS. Should Britannica find the material in question does not meet our policies and guidelines, we will edit the content to meet our guidelines.

For Britannica School content provided by our 3rd party content providers, the following controls may apply (dependent of the type and source of content):

1. An account setting may be offered that allows us to turn off content entirely at the individual account level, as long as they've been set up in our system as independent accounts.
2. We may ask the content provider to delete an entire title from our collection
3. We may entirely remove an individual website link from our database.

D. Computer, Software, and Network Specifications

The proposed solution shall meet all performance requirements defined in this document and be currently compatible with the following minimum computer specifications as well as maintaining compatibility with updates/patches/versions of listed software for the duration of the contract (at a minimum beginning with the versions listed below).

THE SERVICES AND ALL INFORMATION, PRODUCTS AND OTHER BRITANNICA CONTENT INCLUDED IN OR ACCESSIBLE FROM THE SERVICES ARE PROVIDED “AS IS” AND WITHOUT WARRANTIES OF ANY KIND, (EXPRESS, IMPLIED AND STATUTORY, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE), ALL OF WHICH BRITANNICA EXPRESSLY DISCLAIMS TO THE FULLEST EXTENT PERMITTED BY LAW.

11. Limitation of Liability. EXCEPT WHERE PROHIBITED BY APPLICABLE LAW, IN NO EVENT SHALL BRITANNICA, ITS DIRECTORS, OFFICERS, SHAREHOLDERS, PARENTS, SUBSIDIARIES, AFFILIATES, AGENTS AND LICENSORS, OR CONTENT PROVIDERS BE LIABLE: (I) FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR CONSEQUENTIAL DAMAGES ARISING OUT OF, OR RELATED TO THIS AGREEMENT OR THE USE, INABILITY TO USE, PERFORMANCE OR NON-PERFORMANCE OF THE SERVICES, SUCH AS, BUT NOT LIMITED TO, LOSS OF REVENUE, ANTICIPATED PROFITS OR BUSINESS, OR THE COST OF PROCURING SUBSTITUTE PRODUCTS OR SERVICES, EVEN IF BRITANNICA WAS PREVIOUSLY ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND REGARDLESS OF WHETHER SUCH DAMAGES ARISE IN CONTRACT, TORT, UNDER STATUTE, IN EQUITY, AT LAW OR OTHERWISE; OR (II) FOR ANY DAMAGES, LOSSES AND/OR CAUSES OF ACTION EXCEEDING ONE THOUSAND DOLLARS (\$1,000) IN THE AGGREGATE.

12. Indemnification. If permitted by Applicable Law and in addition to indemnification obligations set forth in Section 4 above, to the fullest extent permitted by law, Subscriber agrees to indemnify and hold Britannica, its directors, officers, shareholders, parents, subsidiaries, affiliates, agents and licensors harmless from and against all losses, expenses, damages and costs including reasonable attorneys’ fees, arising out of (a) the information or material Subscriber submits to Britannica, including, but not limited to, liability for violation of copyrights, trademark rights, trade secret rights, or any other intellectual property rights, or the privacy or publicity rights of others, or liability for information or material Subscriber provides that is obscene, defamatory, threatening, harassing, abusive, hateful or embarrassing to any other person or entity, or is fraudulent or deceptive, (b) Subscriber’s use or unauthorized copying of the Services or the Britannica Content, or (c) Subscriber’s violation of any applicable laws, rules, or

regulations, including Applicable Laws.

- 13. Termination.** If Subscriber should breach any material provision in this Agreement and fail to remedy such default within thirty (30) days after receipt of written notice from Britannica, this Agreement shall terminate effective as of the expiration of said thirty (30)-day period. In the event of termination of this Agreement by either party, Subscriber shall have no claims against Britannica or its affiliates. Termination of this Agreement automatically terminates Subscriber's and Users' licenses to use the Services, and any Britannica Content or any other materials contained in the Services.
- 14. Assignment.** Subscriber may not assign any of its rights or delegate any of its obligations under this Agreement without Britannica's prior written consent.
- 15. Dispute Resolution; Governing Law.**
- a) **Dispute Resolution.** If permitted by Applicable Laws, Britannica and Subscriber each agree to meet and negotiate in good faith in order to resolve any controversy or claim arising out of or relating to this Agreement or the Services that may arise between them (each a "dispute"). Except where prohibited by Applicable Laws, the parties agree that any disputes that cannot be settled shall be submitted first to voluntary mediation at the American Arbitration Association ("AAA") in Chicago, Illinois USA. The Parties will share the cost of mediation equally. If the dispute(s) is not resolved within fifteen (15) days of being referred by either Party for mediation, the dispute shall be resolved before a neutral arbitrator. Arbitration shall be (1) initiated in Chicago, Illinois USA, and (2) conducted by the AAA under its Commercial Arbitration Rules. Except where prohibited by Applicable Law, Britannica and Subscriber each agree to submit to the personal jurisdiction of the federal or state courts located there, in order to compel arbitration, stay proceedings pending arbitration, or confirm, modify, vacate or enter judgment on the award entered by the arbitrator. The language of arbitration shall be English, and the arbitral award shall be final and binding on both the Parties. Any court with jurisdiction over the parties may enforce the arbitrator's award. Any proceedings to resolve or litigate any dispute in any forum will be conducted solely on an individual basis. Neither Subscriber nor Britannica will seek to have any dispute heard as a class action, private attorney general action, or in any other proceeding in which either party acts or proposes to act in a representative capacity. No arbitration or proceeding will be combined with another without the prior written consent of all parties to all affected arbitrations or proceedings. If any provision of this Agreement is held to be overly broad in scope or duration by a court of competent jurisdiction, such provision shall be deemed modified to the broadest extent permitted under the law applicable to such proceeding. In addition, if any provision of this Agreement shall be held to be illegal, invalid or unenforceable by a court of competent jurisdiction, the validity, legality and enforceability of the remaining provisions shall not, in any way, be affected or impaired thereby. No waiver by either party of any breach or default hereunder shall be deemed to be a waiver of any preceding or subsequent breach or default
- b) **Governing Law.** This Agreement (including those terms related to indemnification) will be governed by and construed in accordance with the Applicable Laws. Such laws shall govern without reference to the conflicts-of-laws rules thereof. In addition, each party agrees that any claim, action or dispute arising under or relating to this Agreement will be brought exclusively in (and the parties will be subject to the exclusive jurisdiction of) the local courts of the county in which the main campus of Public Institution is located, or the administrative tribunal having exclusive jurisdiction over disputes involving Public Institution, as applicable.
- 16. Notices.** All notices provided in accordance with this Agreement shall be in writing and shall be sent to the parties at their respective address set forth in this Agreement. Notices shall be sent by certified mail, return receipt requested, and shall be considered given three days after the date mailed.
- 17. Entire Agreement.** This License Agreement, including all schedules, exhibits and addenda hereto, and the applicable Order Form(s) constitute the entire agreement between the Parties, and supersede all prior and contemporaneous agreements, proposals or representations, written or oral, concerning its subject matter. No modification, amendment, or waiver of any provision of this Agreement shall be effective unless in writing and signed by the Party against whom the modification, amendment or waiver is to be asserted. To the extent of any conflict or inconsistency between the provisions in the body of this License Agreement and any schedule, exhibit or addendum hereto, and an Order Form, the terms of this License Agreement shall prevail.

Tab 5 - Technical Administration, User Interface, and Integration

In this tab, offerors should describe, in detail, how the proposed solution meets the technical requirement of the RFP. Offerors shall provide, at a minimum, documentation to support:

a. Evidence of their ability to accommodate concurrent users based on data collected from a similar environment;

As the nature and content of our databases generally do not require whole school districts of students to log on at the same time, Britannica does not currently have any evidence from which we can draw to specifically demonstrate support for 60,000 concurrent users. As far as we are aware, HCPS has not experienced latency or bandwidth issues resulting from current usage.

b. How accounts are maintained in their system and how they support automated provisioning of users and accounts;

Britannica's proposed solutions do not require user accounts, authentication takes place at the district or building level. Optionally, should the district want users to have individual user accounts for saving resources, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

c. Describe the data exchange process in detail;

Our proposed solution does not require rostering. Currently, HCPS's authentication happens through IP address. Optionally, should the district want users to have individual user accounts for saving resources, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

d. Describe any limitations the proposed solution may have such as the number of teachers for a class and the number of schools associated with teachers and students;

There are no such limitations.

e. Provide per user bandwidth requirements for the proposed solution;

About 10 Mbps per user for best performance.

f. Provide the average bandwidth per student required; and,

A page weight of a Britannica School site is around 2 Mbytes compressed, with ImageQuest, Moderna, and Escolar being lighter.

g. Provide a detailed description of the implementation and support the solution has for LTI version 1.1 or higher certified as a toll Provider (TP) with our LMS Solution (Schoolology).

Britannica School is a certified Schoolology app and supports LTI version 1.1. Britannica ImageQuest, Britannica Moderna, and Britannica Escolar are not currently certified.

10. Provide all documentation for each piece of software equipment, or software, including copyright information, all operator and user manual, training materials necessary for the proper and successful use of the software where an installation or configuration on HCPS network or devices are required.

The proposed solutions are websites hosted by Britannica on the AWS cloud. As such, no installation on the HCPS network or devices will be required.

This page intentionally left blank.

Tab 6 – Infrastructure and System Administration

In this tab, offerors shall provide information regarding infrastructure and system administration as described in the Scope of Services as well as the following information:

a. Details of the hosting environment including hosting provider, service level agreements between the offeror and the hosting provider, and length of the relationship between the offeror and the hosting provider.

Britannica's solutions and related data are hosted on the Amazon Web Services (AWS) cloud and have been since 2020. AWS is the most popular, powerful, and secure public cloud hosting service. As a cloud-hosted solution, Britannica manages all matters related to hosting. Product patches and updates are automatically applied, freeing HCPS staff from having to manually manage these updates. We have a standard AWS Service level agreement.

b. Specifics of structures in place to ensure high availability including redundant Internet paths, hardware failover, scalability, and protection against denial of service attacks or other network threats.

Britannica's applications are available 24 hours a day, 365 days per year. Updates do not typically involve downtime for customer access. Britannica's applications reported more than 99.9% availability over the past twelve months. In addition, all application solutions have full redundancies and Britannica provides for the backup/recovery, data retention, and disaster recovery of such application solutions using strategies available to us within AWS (our cloud-services provider) and internal policies and procedures. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly. We also employ Cloudflare, which is a DDoS protection tool. Britannica performs vulnerability assessments across its products and digital environment on no less than a quarterly basis and performs penetration testing across its products and digital environment on a daily basis.

c. Specifics of security measures in place to ensure that district data is secure during both storage and transit.

Britannica is dedicated to ensuring the security and privacy of our customer data. We maintain administrative and technical safeguards for protection of the security, confidentiality, and integrity of customer data. These safeguards include, but are not limited to, measures for preventing access, use, modification, or disclosure of customer data by Britannica personnel, except to provide services and prevent or address service or technical problems; as compelled by law; or as expressly permitted by the customer in advance, in writing. Britannica uses best efforts to adopt data security and privacy policies and controls that align with NIST 800-171 Rev. 1, including the use of access and storage controls, privacy and security awareness training, audits, authentication, maintenance, risk assessments, and various other controls. Our documented security and privacy policies provide a framework for maintaining effective and efficient internal security and privacy controls and practices as described below.

Employee Training, Policies, and Procedures

All Britannica employees receive data security and privacy training materials upon onboarding. In addition, Britannica employees are required to attend an annual, in-person privacy and security awareness training session, and complete monthly, third-party provided and verifiable privacy or security training modules and related

assessments. Britannica's IT policies and procedures, including its information and network security and data breach notification policies (among others) are posted for access and reference by Britannica's U.S. employees and representatives on Britannica's intranet site and shared with all Britannica employees and representatives globally during onboarding and in connection with Britannica's annual security and privacy awareness training sessions. In addition, all employees and representatives sign confidentiality agreements by which they commit to maintain and continuously ensure the confidentiality, both during and after their engagement with the Britannica, of all data or information learned, received or otherwise processed by such employee or representative that relates to or is controlled by Britannica or its customers and that is non-public, contains personally identifiable information, or pertains to confidential or proprietary business matters.

Britannica maintains role-based, least-privileged access to our customer data. Only those individuals with direct responsibilities for creating/deleting user accounts, providing technical support or otherwise providing the subscribed-to services as requested by a customer have access to this data and we use a ticketing system with extensive audit trails to follow through. Britannica ensures that any of its employees who have access to personally identifiable information (PII) receive training on the federal and state laws governing confidentiality of such information. For those who have privileged access, they must use an individual VPN connection to access customer data when working remotely. All transactions are performed on TLS with secure authentication. Our Information Security policies contain strict policies for employees who need to transport customer data on portable devices. If an employee is switching to a new (non-privileged) role at Britannica, or are leaving the company, we revoke their access on the same day.

Building and Physical Security

Our building entrance is staffed with 24x7 security guards. Beyond that, our office entrance doors are always locked with receptionist(s) attending to the entrances. Every employee must use a security pass (fob) to unlock the door to enter the premises. We also maintain security cameras and monitor all the entrances and hallways. Our internal data center has an additional lock with a separate security access card—issued only to a few IT staff, along with an additional security camera. We use a cloud-based inventory control software to keep close inventory of our company technology assets. When needed, we wipe all the hard disks using DoD 3-pass technique. When hardware reaches the end of life, we use a 3rd party professional firm to destroy disks in a secure way.

User security and privacy

Britannica is dedicated to maintaining user privacy and a link to our privacy policy appears on every page of our websites. As specifically stated in our privacy policy and confirmed in applicable data protection and licensing agreements, Britannica guarantees the confidentiality of our institutional customers' (e.g., libraries, educational institutions) individual users (e.g., patrons, students, staff), including that no user's personal data is used or sold without the user's permission except as may be required by law.

Britannica's posted privacy policy is located at <https://corporate.britannica.com/privacy-policy/>.

At the transaction level all data is transmitted over secure transmission (TLS) protocol and data is encrypted while in transit. At the database level, data is protected by firewall and username/password and other access control requirements. Personal data is stored in a secure encrypted database behind web applications protected by strong firewalls. Britannica conducts ongoing reviews in an effort to ensure the maintenance of its database security and conducts ongoing vulnerability management scanning, among other processes.

Audit and Risk Assessment

Britannica conducts internal risk assessment and audits periodically to discover any information security gaps and test our policies and procedures. This includes:

- Reviewing web server access and error logs, and internal process logs stored in AWS CloudWatch.
- Using TrustedSite (Qualys Security Scan) to check security of our websites daily and review the results.
- Using OneTrust software to run an internal security and privacy assessment on our company regularly, at least once a year.
- Using Netsparker for pen testing on our websites on a regular interval.
- Running Vipre on all the devices to protect malwares.
- Using up-to-date and secure system configurations, and regularly apply necessary security patches when they become available.

Our accredited and experienced data privacy team oversees the policies, procedures, and systems that ensure this security and privacy.

d. SOC 2 compliance status (certification documentation should be provided)

Britannica is not SOC 2 certified.

e. Specifics of structures in place to ensure acceptable disaster recovery including backup schedules and redundancy.

As described above, we use redundant AWS services for every Britannica website at every level. Britannica solutions maintain 99.9% availability. The database has a high-availability warm standby with automatic failover. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly.

f. Internet Bandwidth requirements and provide a per-user bandwidth usage specification of the software product.

The proposed solutions require about 10 Mbps per user for best performance. A page weight of a Britannica School site is around 2 Mbytes compressed, and Britannica ImageQuest, Britannica Escolar, and Britannica Modera are lighter.

g. Specifics of the availability of remote access to the district's data outside of the web-based application.

Britannica's solutions are only available as web-based applications.

h. Specifics on the frequency and duration of operating system and application updates including the procedures used to inform the district of maintenance windows and system downtime for these tasks.

For more than 250 years, Britannica has been a leading innovator in education and educational technology, creating engaging and effective solutions for educators, students, and learners whether they are at the library, in a classroom, or at home. Our cloud-based solutions deliver continual editorial updates that ensure our database articles are reliable, factual, and up to date. Our editorial team provides daily content updates using our push to publish technology that publishes without interrupting service access. We post approximately 13,000 new and updated encyclopedia articles and media annually and major events in history are chronicled in real time.

Our product and system architecture teams deliver regular product, accessibility, and security updates, as needed, to ensure that our solutions stay functional, accessible, responsive, and secure. Additionally, the

Britannica team regularly seeks feedback from customers to understand where our products can provide additional value and responds by developing new functionality where possible. Examples of this sort of update in the past have included adding support for integrations with single sign-on and learning management systems. In the unlikely event of scheduled downtime, Britannica subscribers are notified in advance via email. We update customers on new product features using our listserv.

i. Any tools available to measure system responsiveness.

Britannica uses CatchPoint to measure website performance, and AWS CloudWatch to monitor system responsiveness

j. Any limits on data storage (i.e. user quotas, access to previous year data, database size, etc.).

There are no limits on storage.

k. Details about how visitor operations and student check-in/check-out can continue in the event of an internet or system outage. The proposed solution shall be deployed on servers and equipment hosted or administered by the Successful Offeror. Hosting the solution on a 3rd party, such as Amazon or Azure, is acceptable.

As described above, Britannica solutions maintain 99.9% availability. Our stringent disaster recovery policy and procedure provide backups and tests disaster recovery in regular intervals. The database has a high-availability warm standby with automatic failover. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly.

Britannica's solutions are hosted by Amazon Web Services.

Tab 7 – Reporting and Monitoring

In this tab, offerors shall provide the following information regarding reports and monitoring

a. Provide samples and descriptions of reports offered and the ability to customize content and reports.

HCPS will access standard reporting on-demand through our Britannica Usage Statistics website. Britannica statistics count each text-based resource viewed in the “Documents” category and each multimedia resource in the “Multimedia” category. Together, these two usage categories will provide the total number of assets viewed. Multimedia statistics are recorded only when a user selects a specific image, map, video, or interactive lesson for viewing. It does not include the rich multimedia embedded in articles and feature pages.

We provide a sample of this standard report for HCPS’s last calendar year of usage on the following page. The district has currently chosen to report elementary level access as one segment, and all other school levels as another. Britannica statistics and reporting can be granular to the institution level, depending on authentication methods used by the district.

Britannica’s statistics also comply with the COUNTER Codes of Practice, currently COUNTER5. Britannica statistics are counter compliant with some derivations. All statistics reports include Queries, Documents and Sessions as required by the Counter Protocol. In addition, Britannica provides separate reporting on multimedia when it is viewed on its own. This includes video and audio files, interactive lessons, and images when not embedded in a document.

Britannica COUNTER5 reports include statistics and reporting granular to the institution level, depending on authentication methods used by the district. Counter5 reports are not standard for our district level customers but are available if required and would be delivered monthly via email.

The following pages provide a sample of a standard report and COUNTER5 report.

We use COUNTER5 metrics as following:

Total Item Investigations: all activities engaged by user.

Total Item Requests: views of full text, video, and image.

Searches Regular: searches conducted by a user on our product

website where the user searches against database used by our product.

Tab 8 – Training and Professional Development

In this tab, offerors shall describe training and professional development that is included with the proposed solution. Offerors shall include a description of the required training for implementation of the program as well as options for continued professional development at either the district or school level. Pricing shall be clearly defined in the proposal submission. Include pricing for county-wide, train-the-trainer model as well as resources and professional development options available to schools at no additional cost.

Britannica solutions are easy to use and require minimal training for educators to begin using the databases with their students. As experienced users of Britannica School and ImageQuest, HCPS educators are already familiar with the interfaces of our solutions and the tools available to maximize value to both teachers and students. As such, we have not included any required training or professional development with our proposed pricing in Tab 9. HCPS staff are always welcome to access the free asynchronous and live webinar trainings our educational consultants host monthly.

Should HCPS seek additional professional development to further expand usage and value, or to support the addition of the Spanish resources option we have proposed, we have provided pricing for such services in Tab 9. Britannica professional learning consultants are experienced facilitators and bring with them best practices in facilitating in-person, virtual, and asynchronous professional learning. Paid options available to Henrico County Public Schools include:

- **In-Person Workshops** – Britannica’s highly engaging workshops empower educators to build competencies in specified areas to impact their teaching and improve student outcomes. Using a variety of collaborative and hands-on learning experiences, educators develop research-based instructional practices and have the opportunity to apply and reflect on what they’ve learned.
- **Virtual Sessions** – Britannica’s virtual sessions provide interactivity for participants through the facilitation of best practices in online learning. Virtual sessions can be recorded for viewing later.
- **Asynchronous Training** – Britannica provides asynchronous training modules to support the knowledge building for resources. The training modules are self-paced, and educators can complete them in a sequential path or use them to better understand specific features of resources by interacting with specific modules.

Tab 9 – Pricing

In this tab, offerors shall provide a detailed pricing schedule. The price shall include all costs associated with providing the services and materials outlined in Sec. II of this RFP.

a. List all categories separately, itemized for evaluation such as license per student, teacher, classroom and site, material cost, training of County staff, projected man-hours, hourly rates, and reimbursable expenses

b. Provide all costs as it relates to the proposed solution for the Scenario on Attachment H and the breakdown of pricing on Attachment I.

Britannica is pleased to provide HCPS with a comprehensive database solution including the district's currently subscribed resources, Britannica School and ImageQuest as well as two Spanish resources that would be new to the district, Britannica Escolar and Britannica Moderna. We believe HCPS will find value in adding these resources which can be leveraged by native Spanish speakers, bilingual students, and students learning Spanish. There are two separate pricing options and scenario forms attached, one to account for our complete proposed solution inclusive of Spanish, and a second reflecting the district's current Britannica resources.

Subject: Reference for Britannica

Frederick County Public Schools has been using Britannica Schools and Britannica Image Quest since the 2013 school year. We made the switch when we realized that Britannica offered our high school students' content at a higher reading level compared to what we were currently subscribing too. That, combined with their Image Library provided our district with a nice solution that has proven over time to be a valuable digital solution for us. There are also other products included with our subscription that just make it an incredible value.

We have had very consistent performance from Britannica with this digital product. It has rarely, if ever, given us trouble. I remember one time finding an image in the product that didn't seem school appropriate and after questioning the image it was removed from the platform. I also inquired if Britannica would consider adding Clip Art to their image library and within a year they did so. This was a very valuable asset to be added for our front office staff's convenience when building school newsletters.

Staff at Britannica has been very easy to work with for almost a decade. Please reach out to me at the contact information in the header of this memo if you have any questions.

Tab 11 – Exceptions

Britannica respectfully submits the following exceptions for review by HCPS.

Clause Location	Concern	Proposed Verbiage
<p>RFP, Section V(R) General Terms and Conditions, Ownership of Deliverable and Related Products</p>	<p>Ownership of Deliverable and Related Products</p> <p>1. The County shall have all rights, title, and interest in or to all specified or unspecified interim and final products, work plans, project reports and/or presentations, data, documentation, computer programs and/or applications, and documentation developed or generated during the completion of this project, including, without limitation, unlimited rights to use, duplicate, modify, or disclose any part thereof, in any manner and for any purpose, and the right to permit or prohibit any other person, including the Successful Offeror, from doing so. To the extent that the Successful Offeror may be deemed at any time to have any of the foregoing rights, the Successful Offeror agrees to irrevocably assign and does hereby irrevocably assign such rights to the County.</p> <p>2. The Successful Offeror is expressly prohibited from receiving additional payments or profit from the items referred to in this paragraph, other than that which is provided for in the general terms and conditions of the Contract.</p> <p>3. This shall not preclude Offerors from submitting proposals, which may include innovative ownership approaches, in the best interest of the County.</p> <p>however, Contractor licenses its Contractor Intellectual Property for use for educational purposes only, including as permitted by the fair use doctrine of the Copyright Act.</p>	<p>The services covered by the RFP are not work-made-for-hire services. Rather, If Britannica is chosen as a Successful Offeror, the County will purchase a license to access and use (on a subscription basis) the subscribed-to, proprietary and Britannica-owned applications, including the content contained therein, for educational purposes only, including as permitted by the fair use doctrine of the Copyright Act.</p> <p>In other words, Britannica’s applications, including the content contained therein, are proprietary to Britannica and if selected as a Successful Offeror, ownership by Britannica (or its licensors) of the same will not and cannot be implied to transfer to the County.</p> <p>Vendor requests that this provision be revised to make clear that Contractor Intellectual Property means “work, ideas, that have been or will be in the future created by Contractor prior to, during, and after entering into this Contract (“Contractor Intellectual Property”).”</p> <p>Please note that the Contractor Intellectual Property is licensed for educational purposes/fair use only - no commercial use. If awarded the contract it will not entitle the County to own pre-existing Contractor Intellectual Property or Contractor Intellectual Property developed (a) outside of this Contract with no assistance from County or (b) by Contractor in its normal course of business operations.</p>
<p>RFP, Attachment D, Section 7.2(i)</p>	<p>In general.</p>	<p>Please note, Vendor’s e-resource solutions are provided as is.</p>
<p>RFP, Attachment D, Section 7.2(ii)</p>	<p>Access and use is confirmed provided the services are paid for and used by the State in accordance with the contract.</p>	<p>Provided the State has paid for access to the services, Contractor will use best efforts to not interfere with the State’s access to and use thereof</p>

A contractor organized as a stock or nonstock corporation, limited liability company, business trust, or limited partnership or registered as a registered limited liability partnership or other business form must be authorized to transact business in the Commonwealth as a domestic or foreign business entity if so required by Title 13.1 or Title 50 of the Code of Virginia or as otherwise required by law. 2. An Offeror organized or authorized to transact business in the Commonwealth pursuant to Title 13.1 or Title 50 of the Code of Virginia must include in its proposal the identification number issued to it by the State Corporation Commission (Attachment C). Any Offeror that is not required to be authorized to transact business in the Commonwealth as a foreign business entity under Title 13.1 or Title 50 of the Code of Virginia or as otherwise required by law must include in its proposal a statement describing why the Offeror is not required to be so authorized. 3. An Offeror described in subsection 2 that fails to provide the required information shall not receive an award unless a written waiver is granted by the Purchasing Director, his designee, or the County Manager. 4. Any falsification or misrepresentation contained in the statement submitted by the Offeror pursuant to Title 13.1 or Title 50 of the Code of Virginia may be cause for debarment by the County. 5. Any business entity described in subsection 1 that enters into a contract with a public body must not allow its existence to lapse or allow its certificate of authority or registration to transact business in the Commonwealth if so required by Title 13.1 or Title 50 of the Code of Virginia to be revoked or cancelled at any time during the term of the contract. 	<p>Britannica does not require an SCC Identification Number. Also please note:</p> <p><i>Britannica is not required to be authorized to transact business in the Commonwealth as a foreign business entity under Title 13.1 or Title 50 because (1) Britannica is not "transacting business in Virginia" per VA Code Section 13.1-757(B)(6), which states as follows: "The following activities, among others, do <u>not</u> constitute transacting business within the meaning of subsection A: ... (6) Soliciting or obtaining orders, whether by mail or through employees or agents or otherwise, if the orders require acceptance outside this Commonwealth before they become contracts...;" and (2) Title 50 does not apply to EB, Inc. because EB, Inc. is a corporation and not a partnership</i></p>

RE: BAFO for RFP No. 22-2326-3EMF Library Databases for Henrico County Public Schools

Dear Ms. Falcone,

Thank you for the opportunity to present best and final pricing for Britannica's resources to Henrico County Public Schools (HCPS). Per your request, we have updated attachments "H" and "I" with pricing for Option 2: Britannica School and Britannica ImageQuest (currently subscribed to by HCPS). As these resources are K-12 and have been purchased by the district historically in this manner as a package offering, we have used an enrollment of 48,916 and multiplied by our greatly discounted price per user for each database.

- Option 2 prices:
Britannica School: \$16,274 (\$.33 per user)
Britannica ImageQuest: \$13,596 (\$.28 per user)
Total Package: \$29,870

Further, we have provided optional contracted pricing for Professional Learning, which is available "a la carte" on an as needed basis and not included in the proposed grand total. Lastly, we find that many of our customers have recently discovered the value in adding our natural Spanish language resources Britannica Escolar and Britannica Moderna (also known as the Spanish Reference Center), thus we have included optional pricing for those resources as well:

- Professional Learning Options:
Onsite - \$3500/day for a maximum of 25 participants (10% discount for consecutive days)
Virtual - \$2000/day for 6 hours of learning for a maximum of 25 participants
- Spanish Reference Center Option:
Britannica Escolar and Britannica Moderna: \$14,420 (\$.29 per user)
Total Package combined with Britannica School and ImageQuest: \$44,290

Feel free to contact me directly with questions regarding this submission. We appreciate your continued interest in supporting exceptional academic performance and inspiring curiosity through use of Britannica's resources.

Best regards,

EXHIBIT “C”

DEFINITIONS

Data Breach means an event in which Division Data is exposed to unauthorized disclosure, access, alteration or use.

Division Data includes all business, employment, operational and Personally Identifiable Information that Division provides to Provider and that is not intentionally made generally available by the Division on public websites or publications, including but not limited to business, administrative and financial data, intellectual property, and student, employees, and personnel data, user generated content and metadata but specifically excludes Provider Data (as defined in the Contract).

De-Identifiable Information (DII): De-Identification refers to the process by which the Provider removes or obscures any Personally Identifiable Information (“PII”) from student records in a way that removes or minimizes the risk of disclosure of the identity of the individual and information about them. Anonymization or de-identification should follow guidance equivalent to that provided by U.S Department of Education publication “Data De-identification: An Overview of Basic Terms” or NISTIR Special Publication (SP) 8053 De-Identification of Personally Identifiable Information. The Provider’s specific steps to de-identify the data will depend on the circumstances, but should be appropriate to protect students. Some potential disclosure limitation methods are blurring, masking, and perturbation. De-identification should ensure that any information when put together cannot indirectly identify the student, not only from the viewpoint of the public, but also from the vantage of those who are familiar with the individual. Information cannot be de-identified if there are fewer than twenty (20) students in the samples of a particular field or category, *i.e.*, twenty students in a particular grade or less than twenty students with a particular disability.

Indirect Identifiers: Any information that, either alone or in aggregate, would allow a reasonable person to be able to identify a student to a reasonable certainty

Limitation of Liability. IN NO EVENT SHALL BRITANNICA, ITS DIRECTORS, OFFICERS, SHAREHOLDERS, PARENTS, SUBSIDIARIES, AFFILIATES, AGENTS AND LICENSORS, OR CONTENT PROVIDERS BE LIABLE TO YOU: (i) FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR RELATED TO THE USE, INABILITY TO USE, PERFORMANCE OR NONPERFORMANCE OF THE SERVICES, EVEN IF BRITANNICA WAS PREVIOUSLY ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND REGARDLESS OF WHETHER SUCH DAMAGES ARISE IN CONTRACT, TORT, UNDER STATUTE, IN EQUITY, AT LAW, OR OTHERWISE; AND (ii) FOR ANY DAMAGES, LOSSES AND/OR CAUSES OF ACTION EXCEEDING ONE THOUSAND U.S. DOLLARS (US \$1,000) IN THE AGGREGATE.

NEITHER YOU NOR BRITANNICA WILL SEEK TO HAVE ANY DISPUTE HEARD AS A CLASS ACTION, PRIVATE ATTORNEY GENERAL ACTION, OR IN ANY OTHER PROCEEDING IN WHICH EITHER PARTY ACTS OR PROPOSES TO ACT IN A REPRESENTATIVE CAPACITY. Nothing in this paragraph limits your right or Britannica's right to bring a lawsuit against each other as an individual plaintiff.

Claims or Disputes Must be Filed within One Year. To the extent permitted by law, any claim or dispute arising out of or related to use of the Services or these Terms of Use must be filed within one year after such claim or dispute arose. The one-year period begins when the notice of such claim or dispute first could be filed. If such a claim or dispute is not filed within one year, it shall be permanently barred. Any claim by you that may arise in connection with these Terms of Use will be compensable by monetary damages and you will in no event be entitled to injunctive or other equitable relief.

Not Advice. Information contained in the Services is not intended to be medical, legal, tax, financial or other advice and should not be considered medical, legal, tax, financial or other advice, nor is it intended to replace consultation with a qualified physician, attorney or other professional.

Severability. If any provision of these Terms of Use shall be unlawful, void or for any reason unenforceable, then that provision shall be deemed severable from these Terms of Use and shall not affect the validity and enforceability of any remaining provisions.

RE: BAFO for RFP No. 22-2326-3EMF Library Databases for Henrico County Public Schools

Dear Ms. Falcone,

Thank you for the opportunity to present best and final pricing for Britannica's resources to Henrico County Public Schools (HCPS). Per your request, we have updated attachments "H" and "I" with pricing for Option 2: Britannica School and Britannica ImageQuest (currently subscribed to by HCPS). As these resources are K-12 and have been purchased by the district historically in this manner as a package offering, we have used an enrollment of 48,916 and multiplied by our greatly discounted price per user for each database.

- Option 2 prices:
Britannica School: \$16,274 (\$.33 per user)
Britannica ImageQuest: \$13,596 (\$.28 per user)
Total Package: \$29,870

Further, we have provided optional contracted pricing for Professional Learning, which is available "a la carte" on an as needed basis and not included in the proposed grand total. Lastly, we find that many of our customers have recently discovered the value in adding our natural Spanish language resources Britannica Escolar and Britannica Moderna (also known as the Spanish Reference Center), thus we have included optional pricing for those resources as well:

- Professional Learning Options:
Onsite - \$3500/day for a maximum of 25 participants (10% discount for consecutive days)
Virtual - \$2000/day for 6 hours of learning for a maximum of 25 participants
- Spanish Reference Center Option:
Britannica Escolar and Britannica Moderna: \$14,420 (\$.29 per user)
Total Package combined with Britannica School and ImageQuest: \$44,290

Feel free to contact me directly with questions regarding this submission. We appreciate your continued interest in supporting exceptional academic performance and inspiring curiosity through use of Britannica's resources.

Best regards,

RE: RFP No. 22-2326-3EMF Library Databases

Dear Mr. Knott and Ms. Falcone,

Henrico County Public Schools (HCPS) seeks school library research databases to support research and inquiry by its nearly 50,000 students, across all grade levels. Resources must be easy to use, accessible, and support multiple reading levels.

As the district's database provider for more than ten years, Encyclopaedia Britannica (Britannica) is pleased to submit a proposal that includes multiple Britannica Digital Learning resources to support HCPS learners of all ages. Our proposal includes the district's currently subscribed resources—Britannica School and Britannica ImageQuest—as well as two Spanish language resources—Britannica Escolar and Britannica Moderna.

Britannica has been empowering the way the world teaches and learns for over 250 years. We have become a powerhouse multimedia educational brand at the forefront of the information revolution, with proven digital learning solutions that meet the evolving needs of lifelong learners today. Our mission is to encourage discovery, spur exceptional academic performance, and inspire curiosity and the joy of learning.

There is no comparable solution that has the amount of trusted content and multimedia that Britannica offers HCPS, or our frequency of updates. Britannica provides daily content updates and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media annually across our three easy-to-use, age-appropriate Britannica School interfaces. Our resources support the Virginia Standards of Learning, provide leveled articles, and meet requirements for accessibility.

We look forward to a continued partnership with HCPS. By integrating Britannica's rigorous academic content, millions of rights-cleared images for educational use, and native Spanish resources, HCPS will be providing world-class digital resources to HCPS educators and students. Feel free to contact me directly with questions regarding this submission.

Best regards,

Tab 2 – Statement of the Scope

In this tab, Offerors, in concise terms, shall state their understanding of the Scope of Services requested by this RFP in Section II.

II. Scope of Services

A. General Requirements

1. A solution for PK-12 coverage for general encyclopedia databases including, but not limited to dictionary, thesaurus, almanac and atlas.

We are pleased to propose four databases for access by Henrico County Public Schools (HCPS) staff, teachers, and students. These resources include:

- Britannica Online School Edition (Britannica School) – Digital encyclopedia for K–12 audience
- ImageQuest – Database of 3.4 million rights-cleared images for K–12 education use
- Britannica Escolar – Digital encyclopedia for K–8 audience, in native Spanish
- Britannica Moderna – Digital encyclopedia for High School audiences, in native Spanish

We describe each of these resources on the following pages.

Britannica School

Britannica School includes unique encyclopedia content for HCPS elementary, middle, and high school students. More than 133,000 full-text encyclopedia articles are complemented by full-text magazine articles, student-friendly web sites, and rich multimedia (photos, illustrations, videos, animations, infographics, maps, and more).

Content is differentiated at four levels:

- K–2 Fundamentals
- 3–5 Elementary Level
- 6–8 Middle School Level
- 9–12 High School Level

This resource was created to meet HCPS students where they are on the learning spectrum. The Fundamentals level is a self-contained database that offers text, games, and activities for the youngest learners. The interface is colorful and engaging. The Elementary, Middle, and High School levels are all part of a single site with each having its own age-appropriate interface. Students can access lower and higher reading-level content without leaving the interface.

Britannica School provides many features that support teaching and learning in HCPS. Database articles have been aligned to the Virginia Standards of Learning so educators can search for a standard and see content that will support that standard. Our Quick-Click Dictionary allows students to click on any word to retrieve its definition, audio pronunciation, and Spanish translation. The included translation tool can translate any article into over 80 different languages. The articles include Lexile levels, and search results can be filtered by Lexile range. Users also can increase or decrease font size on any article or have the article read aloud. Additional functions include a variety of search methodologies, the ability to print and save documents, classroom activities, research support, specific features that provide instructional support, etc.

Britannica School integrates with classroom tools such as Google Drive and/or Google Classroom as well as One Drive. Britannica School also integrates with many popular school and library technologies including:

- Single Sign On (SSO) tools like Clever and ClassLink
- Learning Management Systems like Canvas and Schoology
- Library Management and Discovery services like Follett Destiny, Mackin Via, and EBSCO Discovery Services

There is no comparable resource that has the amount of content and multimedia that Britannica offers or our frequency of updates. Britannica provides daily content updates, and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media annually.

Britannica ImageQuest

Britannica ImageQuest provides HCPS students, educators, and staff with access to more than 3.4 million rights-cleared images from one convenient site. More than 55 of the best image providers in the world—including the Bridgeman Art Library, DK Images, Getty Images, the National Portrait Gallery of London, and the Natural History Museum of London—have joined with Britannica to provide the best and broadest collection of proprietary educational imagery (not freely available on the web).

All images in Britannica ImageQuest are rights-cleared for non-commercial, educational use—great for HCPS school curriculum materials, teacher lesson plans, assignments, activities, and whiteboards; student reports and projects; or school websites, newsletters, newspapers, flyers, and bulletins. As a fully searchable resource, Britannica ImageQuest provides a unique collection from trustworthy sources. With images of every topic in one convenient site, users don't have to spend time combing through multiple Web sites looking for reliable images.

Each image comes with complete metadata, including the source, the copyright holder, caption, and keywords. Each image is downloadable and includes proper citations in MLA, APA, Harvard, and Chicago Manual of Style formats.

Britannica Escolar

Britannica Escolar is the leading knowledge-building resource that is universally trusted for accurate and age-appropriate content in Spanish. Britannica Escolar has two distinct levels of unique content for HCPS students and educators—Primaria (Elementary) and Secundaria (Middle School)—offering information of interest to every age. The program’s features make it an invaluable resource to add for HCPS’s native Spanish speakers, bilingual students, and students learning Spanish.

Features and benefits include:

- engaging home pages at each level that are entry points to thousands of articles, images, videos, maps, and tables, many of which are added daily.
- Reino Animal (Animal Kingdom) and Sabías que...? (Did You Know?) features, which pique students’ curiosity and the desire to dig deeper.
- Mi Britannica (My Britannica), which offers a convenient place to save, organize, and share collections of content that users find in Britannica Escolar.
- a responsive design that provides access to the site anytime, anywhere, and on any device, including tablets, smartphones, and laptops.

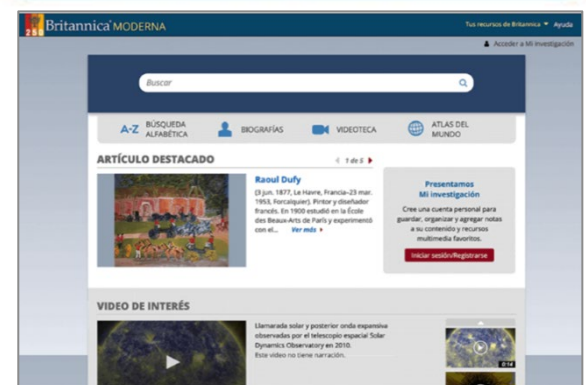

Britannica Escolar also offers HCPS students a bank of interactive learning activities where they can practice basic math and language skills, Spanish grammar and reading skills, geography, history, and math.

Britannica Moderna

Britannica Moderna is the definitive Spanish-language resource, complete with age-appropriate content for older HCPS students and their teachers. Britannica Moderna provides access to nearly 47,000 articles, as well as more than 13,000 images, maps, audiovisual materials, a dictionary, and atlas. Articles from BBC World News provide patrons with international news, features, and analysis within the same platform. The program’s features make it an invaluable addition for HCPS’s older native Spanish speakers, bilingual students, and students learning Spanish.

Like the other editions described above, Britannica Moderna offers the ability to save resources for quick access again in the future. The program’s responsive design provides an optimal viewing experience across a variety of devices (e.g., smartphone, tablet, computer) and is accessible via web browser from wherever HCPS teachers and student seek to connect.

2. The ability to print and/or email and/or transfer to Google Drive accounts of full text, abstracts, and graphics and does not require email access on the searching computer.

HCPS teachers and students can print articles and graphics, email links to articles and graphics (without email logging into email to send) and save full-text articles to Google Drive accounts. Saving to Google Drive requires logging into Google.

3. Lesson plans and/or resources tied to Virginia SOL.

The Teaching Tools (**Figure 1**) section of Britannica School includes a space where HCPS educators can browse for content aligned to Virginia Standards of Learning and create and save lesson plans.

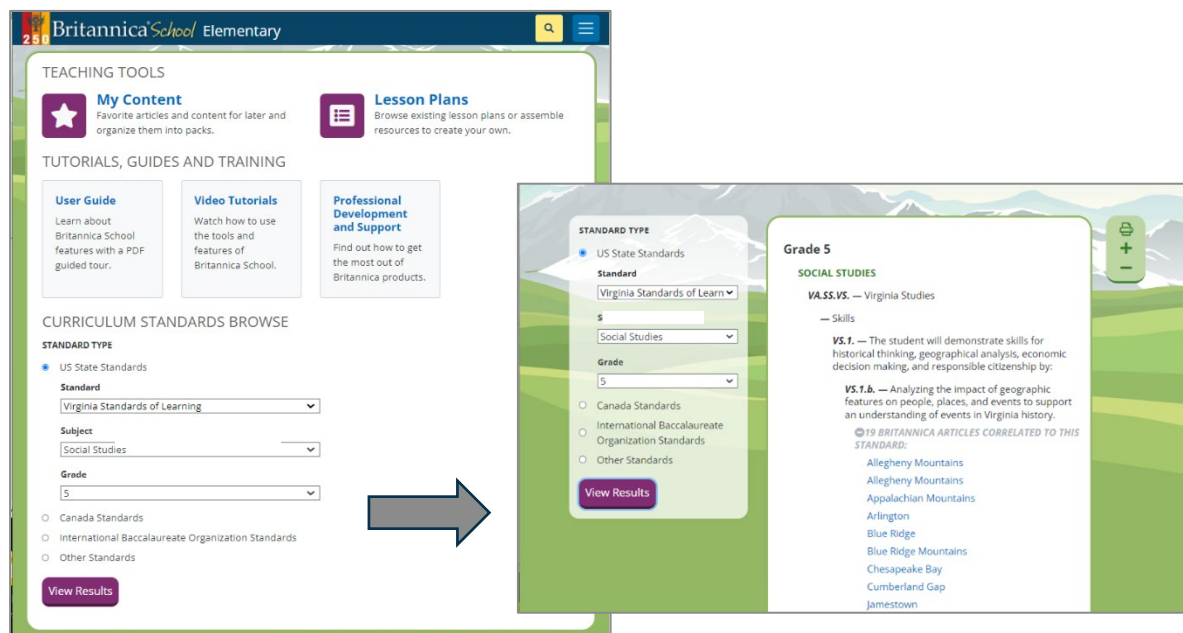

Figure 1. Search for articles aligned to Virginia state standards.

4. Copy ready citations, format tools, compatible with citation builder such as Noodle Tools.

Britannica’s resources have copy ready citations in MLA, APA, Harvard, and Chicago Manual of Style formats that can be copied and pasted. Citations do not export to Noodle Tools.

5. Translation for ELL students and language classes and audio for students.

Britannica School’s translation tool can translate any article text into over 80 different languages. We have also proposed Britannica Escolar and Britannica Moderna which are databases developed in Spanish with Spanish audio.

6. A variety of formats (video, audio, ebook, reference, periodical, transcript, etc.) which include primary and secondary source documents.

The resources we propose will provide HCPS students and teachers with resources in a variety of formats including more than 133,000 full-text encyclopedia articles in Britannica School complemented by primary sources such as access to letters, and speeches; full-text magazine articles; student-friendly web site links; rich

multimedia (photos, illustrations, videos, animations, infographics, maps, and more). Our solution also includes more than 60,000 articles in Spanish and more than 3.4 million rights-cleared images for educational use.

7. Reading, vocabulary, and conceptual level appropriate for age level of students.

Britannica School includes articles at multiple levels and delivered in interfaces appropriate to students' age levels as described below:

- K–2 Fundamentals
- 3–5 Elementary Level
- 6–8 Middle School Level
- 9–12 High School Level

8. Articles that can be linked to Schoology and/or other district platform programs.

Articles from Britannica articles can be cut and pasted for sharing elsewhere.

9. Searches multiple encyclopedias/articles/etc.

Britannica School allows users to search three databases of content at different levels (elementary, middle, and high school). Britannica Escolar searches Spanish articles from our Spanish elementary and middle school databases, while Moderna searches our high school level Spanish database.

10. Ease of access. No more than 3 clicks from initial search to get to information.

Britannica's proposed databases are easy to use and generally do not require more than 3 clicks from initial search to get to information.

11. Multiple reading levels preferred (single articles that can be leveled for reading ability).

Britannica School includes articles at three different ranges of reading level and articles can be filtered by Lexile Level.

12. Graphic friendly, colorful interface, and are ADA compliant and comply with the Information Technology Accessibility Act Code of Virginia- 2-2-3500)

Each proposed resource has its own graphic-friendly, colorful interface that is ADA compliant (described later in this tab) and complies with the Information Technology Accessibility Act Code of Virginia- 2-2-3500.

As described above, Britannica School has three user-friendly interfaces to serve the needs of all HCPS students. After navigating to the Britannica School homepage, students select to enter or search one of the following three interface options (**Figure 2**, on the next page):

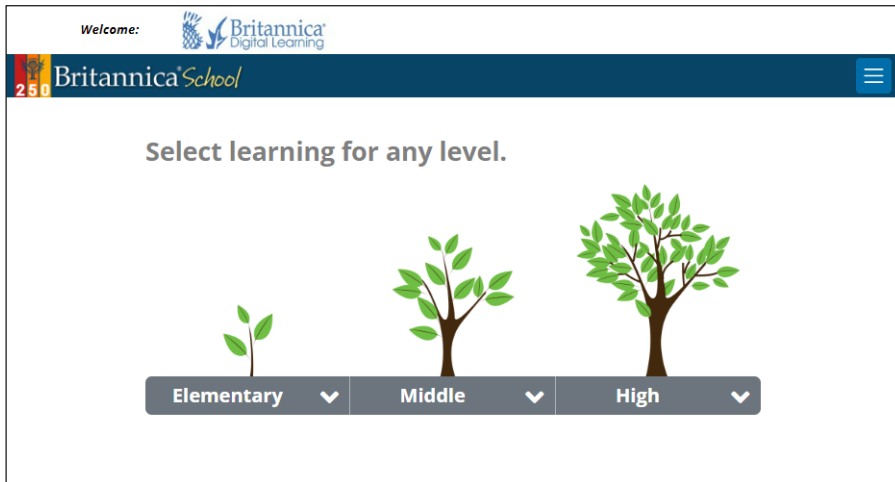

Figure 2. Guide students to the best interface and resources for them based on their desired content level or use-case.

Once users have selected their interface, they will access the content and tools associated with that level of experience as shown in **Figure 3**. In every interface, users can search using keywords in the search bar at the top of the page or can explore by reference type (e.g., articles, media, biographies) or subject.

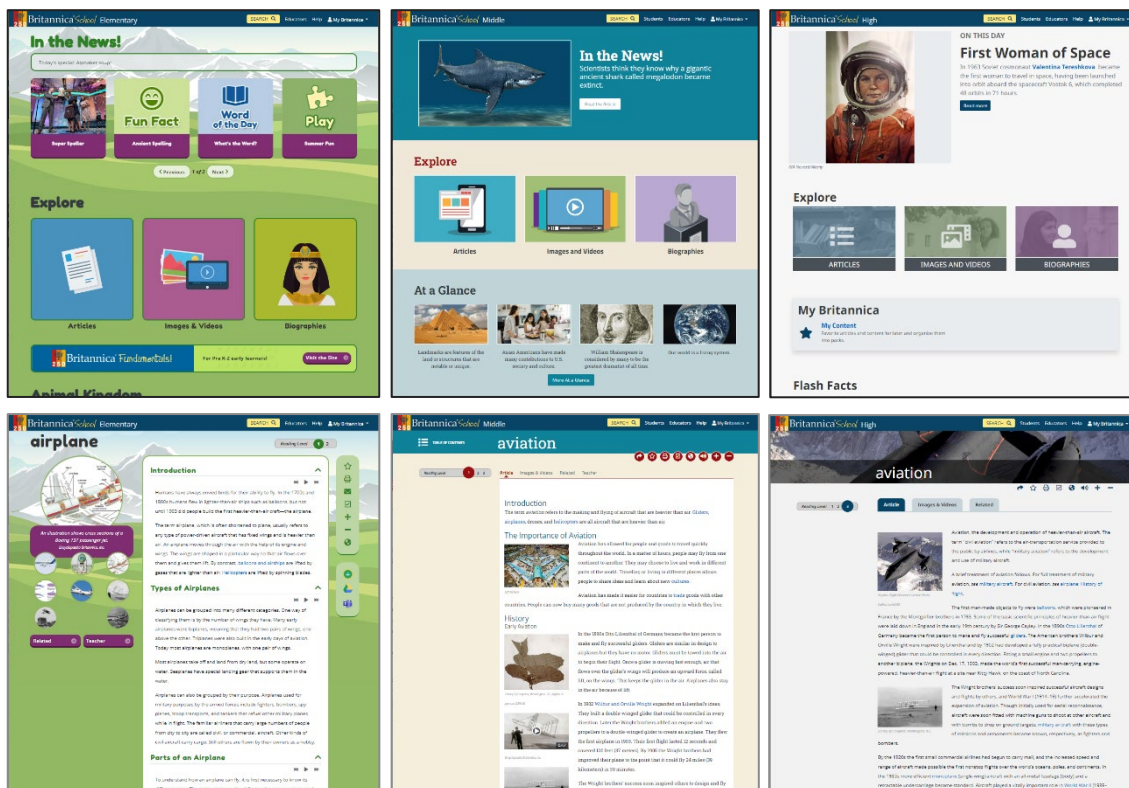

Figure 3. Engage users with user interfaces and leveled content that meets their needs and interests.

Below is a brief summary of each interface. Please note that content at different reading levels is available throughout these interfaces as noted below.

- **Fundamentals** – Designed for early learners, grades Pre-K–2, this interface (**Figure 4**, below) keeps kids on a single page with all navigation occurring within a single pane. It combines bright colors and active animations to engage younger students and provide a fun introduction to online learning.
- **Elementary**– The Elementary interface for grades 3–5 includes bright colors and visual browsing options for students. From the Elementary interfaces, students can search all content levels and choose to move up to the Middle interface.
- **Middle** – The Middle interface provides a more grown-up look and feel and allows students to change the content to lower and higher reading levels while staying in the interface that is right for them. Searching is done across all levels with a default at Level 2 (middle school).
- **High** – A still more mature look is combined with more advanced features and content sets in the High interface. As with the middle school level, students can adjust the reading level of the content displayed as needed without having to move to a page with a younger look and feel.

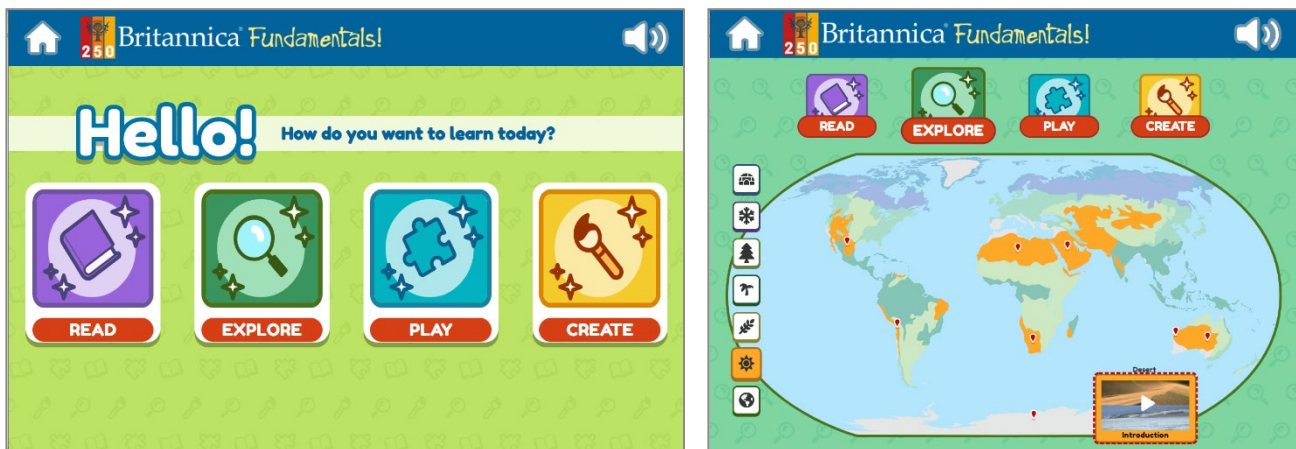

Figure 4. Provide Pre-K–2 students with a fun introduction to online learning with Fundamentals like biomes, read-aloud informational stories, math and literacy games, and a creative space.

Britannica Escolar

After accessing the Britannica Escolar website, HCPS users can choose between two interface levels: Primaria (Elementary) or Secundaria (Middle) as shown in **Figure 5**, next page. Once users have selected their interface, they will access the content and tools associated with that level of experience. In every interface, users can search using keywords (in Spanish) in the search bar at the top of the page or can explore by reference type (e.g., articles, media, biographies) or subject.

Figure 5. Allow users to select the interface that delivers age-appropriate content and features.

Britannica Moderna

Upon accessing Britannica Moderna, HCPS users can use the search bar to search using a word written in Spanish (Figure 6). Users can also search alphabetically, browse through biographies of prominent figures, check out the video library or use the Atlas del Mundo (World Atlas) to explore different regions of the world. At the bottom of the homepage users will see the latest news from the BBC Mundo newsfeed. Clicking on the phrase Mi investigación in the top right corner of the interface allows users to quickly access the Britannica Moderna content they have previously saved by favoriting (clicking on the star) an article.

Figure 6. Provide Spanish speaking users an interface and articles in Spanish.

a. Have compatibility with the current versions of multiple browsers- at minimum, current versions of Edge, Safari, and Chrome browsers.

Our products are available to use on demand, on any device using a standard browser. Britannica's online products are built with a responsive design, so content adjusts to fit the user's display without losing content or degrading the user experience. Whether HCPS teachers and students need to work at school, at home, or from another remote location, our educational products will be accessible wherever they have Internet.

To maximize performance, we recommend using an up-to-date version of Google Chrome, Apple Safari, Mozilla Firefox, or Microsoft Edge.

b. Maintain compatibility with listed browsers and future versions/updates/releases of the listed browsers for the duration of the contract.

Britannica will maintain compatibility with the listed browsers and any future versions/updates/releases of these browsers for the duration of the contract.

c. Only require standard browser plugins.

The proposed databases may contain resources that require a PDF reader to view. A default viewer is included with most operating systems and web browsers. If missing, your browser may prompt you to download one to view certain content. We advise using an up-to-date version, and Adobe Acrobat Reader can be downloaded for free.

2. The proposed solution will be compliant with the Americans with Disabilities Act requirements for accessibility.

To fulfill the objectives of our accessibility commitment, we have adopted as our primary guidelines the Section 508 website accessibility standards set forth by the U.S. General Services Administration and also the Web

Content Accessibility Guidelines (WCAG) 2.0 recommended by the World Wide Web Consortium (W3C). We continuously test Britannica sites for compliance with the accessibility standards set forth above and try our very best to remain compliant.

The accessibility of Britannica sites, however, depends on third-party technologies provided by the operating systems, hardware platforms, and assistive technologies, all of which can affect the level of accessibility of Britannica sites.

We will continue to enhance the accessibility of our online products as greater functionality becomes available to ensure ongoing usefulness to all users, including those with different abilities.

We also are committed to addressing issues that prevent the use of our software by people with different abilities. We welcome user feedback and suggestions. If HCPS users have any comments or questions about our online products and the accessibility thereof, they can contact Britannica Customer Support at 1-800-621-3900, ext. 7160 or go to the Britannica Customer Support form.

3. The proposed solution shall be cloud-based and delivered via the Internet over wireless LANs to the client's browser.

Our proposed solution is cloud-based and accessed via an internet browser.

4. The proposed solution shall provide an intuitive user interface that allows for ease of use by teachers and students.

As described in response to general requirement number 12, above, Britannica's solutions provide intuitive user interfaces for ease of use by teachers and students.

5. The proposed solution shall support mobile technology including but not limited to the specific mobile devices currently used in HCPS (iOS, Chromebooks and Android Platforms).

Our products are available to use on demand, on any device using a standard browser. Britannica's online products are built with a responsive design, so content adjusts to fit the user's display without losing content or degrading the user experience.

B. Integration

1. The proposed solution shall provide methods for user account administration that are easy to use and maintain.

Britannica's proposed solutions do not require user accounts, authentication takes place at the district or building level.

2. The proposed solution shall support a single sign-on solution that does not require staff or students to have a separate account or password for accessing the vendor's application.

Our proposed solution does not require staff or students to have an account and password. Optionally, should the district desire, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

3. The proposed solution shall allow for LTI, Azure Active Directory or LDAP as a method of authentication and authorization.

Currently the district uses IP authentication to access Britannica solutions. Britannica School also supports LTI authentication through Schoology, Classlink, Canvas, Safari Montage. Britannica ImageQuest, Britannica Escolar, and Britannica Moderna also support those same authentication methods with the current exception of not supporting Schoology.

4. The proposed solution shall provide a means to identify the individual or client using the application, authenticate the individual and determine the authorities and rights granted to that individual as well as a reporting engine for tracking usage and progress.

Through the offered authentication methods, the proposed Britannica resources identify users as belonging to a HCPS account and provide access to the subscribed-to resources.

Britannica usage can be reported down to the building level if authentication methods are set up to support such reporting. Currently HCPS usage is set up to report all elementary schools together as one category and the remainder of schools as a separate category.

5. Any requirements for student, staff, course, roster or school information must be supported through a common specification. The exchange of data must be through a common protocol and not require the installation of vendor-specific software in the HCPS internal infrastructure. HCPS currently supports the following means of exchanging student information in order of preference but will accept other non-vendor specific protocols:

- a) LTI integration as a Tool Provider (TP) with our LMS Solution (Schoology)***
- b) SIF - Student Information framework***
- c) Exchange of information through Clever - a third party vendor for exchanging common data for school systems; the Successful Offeror is responsible for any costs incurred with Clever implementation.***
- d) File exchange via the IMS OneRoster format to a vendor supported sFTP server***
- e) File exchange to a vendor-supported sFTP server. If this option is used the vendor must provide all specifications for file requirements in their proposal.***

Student, staff, course, roster or school information is not required for use of the proposed Britannica resources, but, optionally, should the district desire, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

Britannica School supports LTI authentication through Schoology, Classlink, Canvas, Safari Montage. Britannica ImageQuest, Britannica Escolar, and Britannica Moderna also support those same authentication methods with the current exception of not supporting Schoology.

6. No additional fees may be charged to HCPS for data integration

Britannica acknowledges this requirement.

7. The proposed data exchange solution must be described in detail in the Offeror's response. The proposed solution must also include limitations the Offeror has such as the number of teachers for a class and the number of schools associated with teachers and students.

We describe data exchange in *Tab 5 - Technical Administration, User Interface, and Integration*.

8. Solutions that allow for seamless integration of their product through the IMS Global interoperability standards are preferred. The proposal shall provide a detailed description of the implementation and support the solution has for LTI version 1.1 ® or higher certified as a Tool Provider (TP) with our LMS Solution (Schoology).

We describe data exchange in *Tab 5 - Technical Administration, User Interface, and Integration*.

C. Infrastructure and System Administration

1. The proposed solution will provide a secure, web-based system for data in transit and at rest.

The proposed solution includes secure, web-based databases hosted on the AWS platform.

2. Successful Offeror(s) will document compliance with all local, state, and federal laws related to student data privacy.

Britannica is dedicated to ensuring the security and privacy of our customer data, we describe the administrative and technical safeguards we maintain in *Tab 6 – Infrastructure and System*.

The subscribed-to products are compliant with laws regarding child and student privacy and protection including provisions of the Children's Online Privacy Protection Act (COPPA), the Family Educational Rights and Privacy Act (FERPA), and the Protection of Pupil Rights Amendment (PPRA).

Britannica obtains consent from the subscribing school/district. as permitted by law, by entering into a subscription license agreement for each subscribed-to product with the consenting school/district. The agreement permits Britannica to collect certain personal information solely for the use and benefit of the subscribing institution and for no other commercial purpose.

Types of personal information that may be collected by use of the products (as permitted by agreement with the subscribing institution) include: IP addresses of users; meta data on user interaction with the subscribed-to product; student grade level; homeroom; student school enrollment; student scheduled courses; teacher names; local and state school ID numbers; assigned student ID number; student app username; student first and/or last name; student responses to surveys or questionnaires; and student generated content. This data is stored for the length of time permitted by and agreed upon in our agreements (including data protection agreements) with the subscribing institution and at the direction of the subscribing institution or as otherwise required by applicable laws. Certain data may be shared solely with a Britannica-approved third-party service provider solely as may be necessary to deliver the product and its services in the manner described and as contracted for by the subscribing institution.

Our accredited and experienced data privacy team oversees the policies, procedures, and systems that ensure security and privacy. This would be happy to answer specific questions related to compliance with specific local, state, and federal laws related to student data privacy.

3. The proposed solution shall contain neither commercial content nor serve as a vehicle to market goods and services.

Our proposed solutions are developed specifically for K–12 school use and do not contain commercial content nor do they serve as a vehicle to market goods and services to students.

4. Web Accessibility

a. The solution shall be accessible to persons with disabilities, including: i. Blindness, color blindness, visual impairment

ii. Deafness, hearing impairment

iii. Speech impairment

iv. Mobility, strength, dexterity or reach impairment

b. The solution shall support the use of commonly available screen readers.

c. The solution shall comply with Federal Web Accessibility Standards (part of Section 508 of the Rehabilitation Act).

d. The solution shall meet Level A and Level AA guidelines as specified by the W3C's WCAG 2.0 guidelines.

To fulfill the objectives of our accessibility commitment, we have adopted as our primary guidelines the Section 508 website accessibility standards set forth by the U.S. General Services Administration and also the Web Content Accessibility Guidelines (WCAG) 2.0 recommended by the World Wide Web Consortium (W3C). We continuously test Britannica sites for compliance with the Level AA accessibility standards set forth above and try our very best to remain compliant.

The accessibility of Britannica sites, however, depends on third-party technologies provided by the operating systems, hardware platforms, and assistive technologies, all of which can affect the level of accessibility of Britannica sites.

We will continue to enhance the accessibility of our online products as greater functionality becomes available to ensure ongoing usefulness to all users, including those with different abilities.

We also are committed to addressing issues that prevent the use of our software by people with different abilities. We welcome user feedback and suggestions. If HCPS users have any comments or questions about our online products and the accessibility thereof, they can contact Britannica Customer Support at 1-800-621-3900, ext. 7160 or go to the Britannica Customer Support form.

5. The proposed solution shall be able to handle at least 60,000+ concurrent HCPS users with less than 30 ms latency. Offeror(s) must provide comprehensive documentation to evidence the ability to accommodate concurrent users based on data collected from a similar environment.

As the nature and content of our databases generally do not require the full student population of a school district to log on at the same time, Britannica does not currently have any evidence from which we can draw to specifically demonstrate support for 60,000 concurrent users. As far as we are aware, HCPS has not experienced latency or bandwidth issues resulting from current usage.

6. If the solution is reliant on LDAP authentication, HCPS will only accept a defined external IP address to allow Firewall transactions and will not accept the allowance of entire network segments.

LDAP authentication is not applicable to our solution.

7. HCPS shall have the ability to submit requests for an alteration of the digital content (including additional supporting data, modification of current data, or removal of data deemed inappropriate by HCPS) via email or web-based forms embedded in the digital content.

There is no comparable resource that has the amount of content and multimedia that Britannica offers or our frequency of updates. Britannica provides daily content updates, and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media to the Britannica School databases annually. HCPS is welcome to send requests for additional supporting data or modifications of current data via email and our editorial team will review and consider if such requests meet our editorial policies and content guidelines.

All Britannica School content that was developed by our editorial team aligns with Britannica's editorial policies and guidelines for developing and providing content at appropriate audience levels. Should HCPS contest the appropriateness of specific content for a specific age or audience, Britannica will review the material in question to ensure it aligns with our editorial policies and guidelines. Whether or not the material will be edited or removed will be dependent on the extent to which we find the material aligns to our policies, the findings of which will be explained in our response to HCPS. Should Britannica find the material in question does not meet our policies and guidelines, we will edit the content to meet our guidelines.

For Britannica School content provided by our 3rd party content providers, the following controls may apply (dependent of the type and source of content):

1. An account setting may be offered that allows us to turn off content entirely at the individual account level, as long as they've been set up in our system as independent accounts.
2. We may ask the content provider to delete an entire title from our collection
3. We may entirely remove an individual website link from our database.

D. Computer, Software, and Network Specifications

The proposed solution shall meet all performance requirements defined in this document and be currently compatible with the following minimum computer specifications as well as maintaining compatibility with updates/patches/versions of listed software for the duration of the contract (at a minimum beginning with the versions listed below).

If any provision of this Agreement is held to be overly broad in scope or duration by a court of competent jurisdiction, such provision shall be deemed modified to the broadest extent permitted under the law applicable to such proceeding. In addition, if any provision of this Agreement shall be held to be illegal, invalid or unenforceable by a court of competent jurisdiction, the validity, legality and enforceability of the remaining provisions shall not, in any way, be affected or impaired thereby. Tab 5 - Technical Administration, User Interface, and Integration

In this tab, offerors should describe, in detail, how the proposed solution meets the technical requirement of the RFP. Offerors shall provide, at a minimum, documentation to support:

a. Evidence of their ability to accommodate concurrent users based on data collected from a similar environment;

As the nature and content of our databases generally do not require whole school districts of students to log on at the same time, Britannica does not currently have any evidence from which we can draw to specifically demonstrate support for 60,000 concurrent users. As far as we are aware, HCPS has not experienced latency or bandwidth issues resulting from current usage.

b. How accounts are maintained in their system and how they support automated provisioning of users and accounts;

Britannica's proposed solutions do not require user accounts, authentication takes place at the district or building level. Optionally, should the district want users to have individual user accounts for saving resources, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

c. Describe the data exchange process in detail;

Our proposed solution does not require rostering. Currently, HCPS's authentication happens through IP address. Optionally, should the district want users to have individual user accounts for saving resources, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

d. Describe any limitations the proposed solution may have such as the number of teachers for a class and the number of schools associated with teachers and students;

There are no such limitations.

e. Provide per user bandwidth requirements for the proposed solution;

About 10 Mbps per user for best performance.

f. Provide the average bandwidth per student required; and,

A page weight of a Britannica School site is around 2 Mbytes compressed, with ImageQuest, Moderna, and Escolar being lighter.

g. Provide a detailed description of the implementation and support the solution has for LTI version 1.1 or higher certified as a toll Provider (TP) with our LMS Solution (Schoolology).

Britannica School is a certified Schoolology app and supports LTI version 1.1. Britannica ImageQuest, Britannica Moderna, and Britannica Escolar are not currently certified.

10. Provide all documentation for each piece of software equipment, or software, including copyright information, all operator and user manual, training materials necessary for the proper and successful use of the software where an installation or configuration on HCPS network or devices are required.

The proposed solutions are websites hosted by Britannica on the AWS cloud. As such, no installation on the HCPS network or devices will be required.

This page intentionally left blank.

Tab 6 – Infrastructure and System Administration

In this tab, offerors shall provide information regarding infrastructure and system administration as described in the Scope of Services as well as the following information:

a. Details of the hosting environment including hosting provider, service level agreements between the offeror and the hosting provider, and length of the relationship between the offeror and the hosting provider.

Britannica's solutions and related data are hosted on the Amazon Web Services (AWS) cloud and have been since 2020. AWS is the most popular, powerful, and secure public cloud hosting service. As a cloud-hosted solution, Britannica manages all matters related to hosting. Product patches and updates are automatically applied, freeing HCPS staff from having to manually manage these updates. We have a standard AWS Service level agreement.

b. Specifics of structures in place to ensure high availability including redundant Internet paths, hardware failover, scalability, and protection against denial of service attacks or other network threats.

Britannica's applications are available 24 hours a day, 365 days per year. Updates do not typically involve downtime for customer access. Britannica's applications reported more than 99.9% availability over the past twelve months. In addition, all application solutions have full redundancies and Britannica provides for the backup/recovery, data retention, and disaster recovery of such application solutions using strategies available to us within AWS (our cloud-services provider) and internal policies and procedures. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly. We also employ Cloudflare, which is a DDoS protection tool. Britannica performs vulnerability assessments across its products and digital environment on no less than a quarterly basis and performs penetration testing across its products and digital environment on a daily basis.

c. Specifics of security measures in place to ensure that district data is secure during both storage and transit.

Britannica is dedicated to ensuring the security and privacy of our customer data. We maintain administrative and technical safeguards for protection of the security, confidentiality, and integrity of customer data. These safeguards include, but are not limited to, measures for preventing access, use, modification, or disclosure of customer data by Britannica personnel, except to provide services and prevent or address service or technical problems; as compelled by law; or as expressly permitted by the customer in advance, in writing. Britannica uses best efforts to adopt data security and privacy policies and controls that align with NIST 800-171 Rev. 1, including the use of access and storage controls, privacy and security awareness training, audits, authentication, maintenance, risk assessments, and various other controls. Our documented security and privacy policies provide a framework for maintaining effective and efficient internal security and privacy controls and practices as described below.

Employee Training, Policies, and Procedures

All Britannica employees receive data security and privacy training materials upon onboarding. In addition, Britannica employees are required to attend an annual, in-person privacy and security awareness training session, and complete monthly, third-party provided and verifiable privacy or security training modules and related

assessments. Britannica's IT policies and procedures, including its information and network security and data breach notification policies (among others) are posted for access and reference by Britannica's U.S. employees and representatives on Britannica's intranet site and shared with all Britannica employees and representatives globally during onboarding and in connection with Britannica's annual security and privacy awareness training sessions. In addition, all employees and representatives sign confidentiality agreements by which they commit to maintain and continuously ensure the confidentiality, both during and after their engagement with the Britannica, of all data or information learned, received or otherwise processed by such employee or representative that relates to or is controlled by Britannica or its customers and that is non-public, contains personally identifiable information, or pertains to confidential or proprietary business matters.

Britannica maintains role-based, least-privileged access to our customer data. Only those individuals with direct responsibilities for creating/deleting user accounts, providing technical support or otherwise providing the subscribed-to services as requested by a customer have access to this data and we use a ticketing system with extensive audit trails to follow through. Britannica ensures that any of its employees who have access to personally identifiable information (PII) receive training on the federal and state laws governing confidentiality of such information. For those who have privileged access, they must use an individual VPN connection to access customer data when working remotely. All transactions are performed on TLS with secure authentication. Our Information Security policies contain strict policies for employees who need to transport customer data on portable devices. If an employee is switching to a new (non-privileged) role at Britannica, or are leaving the company, we revoke their access on the same day.

Building and Physical Security

Our building entrance is staffed with 24x7 security guards. Beyond that, our office entrance doors are always locked with receptionist(s) attending to the entrances. Every employee must use a security pass (fob) to unlock the door to enter the premises. We also maintain security cameras and monitor all the entrances and hallways. Our internal data center has an additional lock with a separate security access card—issued only to a few IT staff, along with an additional security camera. We use a cloud-based inventory control software to keep close inventory of our company technology assets. When needed, we wipe all the hard disks using DoD 3-pass technique. When hardware reaches the end of life, we use a 3rd party professional firm to destroy disks in a secure way.

User security and privacy

Britannica is dedicated to maintaining user privacy and a link to our privacy policy appears on every page of our websites. As specifically stated in our privacy policy and confirmed in applicable data protection and licensing agreements, Britannica guarantees the confidentiality of our institutional customers' (e.g., libraries, educational institutions) individual users (e.g., patrons, students, staff), including that no user's personal data is used or sold without the user's permission except as may be required by law.

Britannica's posted privacy policy is located at <https://corporate.britannica.com/privacy-policy/>.

At the transaction level all data is transmitted over secure transmission (TLS) protocol and data is encrypted while in transit. At the database level, data is protected by firewall and username/password and other access control requirements. Personal data is stored in a secure encrypted database behind web applications protected by strong firewalls. Britannica conducts ongoing reviews in an effort to ensure the maintenance of its database security and conducts ongoing vulnerability management scanning, among other processes.

Audit and Risk Assessment

Britannica conducts internal risk assessment and audits periodically to discover any information security gaps and test our policies and procedures. This includes:

- Reviewing web server access and error logs, and internal process logs stored in AWS CloudWatch.
- Using TrustedSite (Qualys Security Scan) to check security of our websites daily and review the results.
- Using OneTrust software to run an internal security and privacy assessment on our company regularly, at least once a year.
- Using Netsparker for pen testing on our websites on a regular interval.
- Running Vipre on all the devices to protect malwares.
- Using up-to-date and secure system configurations, and regularly apply necessary security patches when they become available.

Our accredited and experienced data privacy team oversees the policies, procedures, and systems that ensure this security and privacy.

d. SOC 2 compliance status (certification documentation should be provided)

Britannica is not SOC 2 certified.

e. Specifics of structures in place to ensure acceptable disaster recovery including backup schedules and redundancy.

As described above, we use redundant AWS services for every Britannica website at every level. Britannica solutions maintain 99.9% availability. The database has a high-availability warm standby with automatic failover. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly.

f. Internet Bandwidth requirements and provide a per-user bandwidth usage specification of the software product.

The proposed solutions require about 10 Mbps per user for best performance. A page weight of a Britannica School site is around 2 Mbytes compressed, and Britannica ImageQuest, Britannica Escolar, and Britannica Modera are lighter.

g. Specifics of the availability of remote access to the district's data outside of the web-based application.

Britannica's solutions are only available as web-based applications.

h. Specifics on the frequency and duration of operating system and application updates including the procedures used to inform the district of maintenance windows and system downtime for these tasks.

For more than 250 years, Britannica has been a leading innovator in education and educational technology, creating engaging and effective solutions for educators, students, and learners whether they are at the library, in a classroom, or at home. Our cloud-based solutions deliver continual editorial updates that ensure our database articles are reliable, factual, and up to date. Our editorial team provides daily content updates using our push to publish technology that publishes without interrupting service access. We post approximately 13,000 new and updated encyclopedia articles and media annually and major events in history are chronicled in real time.

Our product and system architecture teams deliver regular product, accessibility, and security updates, as needed, to ensure that our solutions stay functional, accessible, responsive, and secure. Additionally, the

Britannica team regularly seeks feedback from customers to understand where our products can provide additional value and responds by developing new functionality where possible. Examples of this sort of update in the past have included adding support for integrations with single sign-on and learning management systems. In the unlikely event of scheduled downtime, Britannica subscribers are notified in advance via email. We update customers on new product features using our listserv.

i. Any tools available to measure system responsiveness.

Britannica uses CatchPoint to measure website performance, and AWS CloudWatch to monitor system responsiveness

j. Any limits on data storage (i.e. user quotas, access to previous year data, database size, etc.).

There are no limits on storage.

k. Details about how visitor operations and student check-in/check-out can continue in the event of an internet or system outage. The proposed solution shall be deployed on servers and equipment hosted or administered by the Successful Offeror. Hosting the solution on a 3rd party, such as Amazon or Azure, is acceptable.

As described above, Britannica solutions maintain 99.9% availability. Our stringent disaster recovery policy and procedure provide backups and tests disaster recovery in regular intervals. The database has a high-availability warm standby with automatic failover. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly.

Britannica's solutions are hosted by Amazon Web Services.

Tab 7 – Reporting and Monitoring

In this tab, offerors shall provide the following information regarding reports and monitoring

a. Provide samples and descriptions of reports offered and the ability to customize content and reports.

HCPS will access standard reporting on-demand through our Britannica Usage Statistics website. Britannica statistics count each text-based resource viewed in the “Documents” category and each multimedia resource in the “Multimedia” category. Together, these two usage categories will provide the total number of assets viewed. Multimedia statistics are recorded only when a user selects a specific image, map, video, or interactive lesson for viewing. It does not include the rich multimedia embedded in articles and feature pages.

We provide a sample of this standard report for HCPS’s last calendar year of usage on the following page. The district has currently chosen to report elementary level access as one segment, and all other school levels as another. Britannica statistics and reporting can be granular to the institution level, depending on authentication methods used by the district.

Britannica’s statistics also comply with the COUNTER Codes of Practice, currently COUNTER5. Britannica statistics are counter compliant with some derivations. All statistics reports include Queries, Documents and Sessions as required by the Counter Protocol. In addition, Britannica provides separate reporting on multimedia when it is viewed on its own. This includes video and audio files, interactive lessons, and images when not embedded in a document.

Britannica COUNTER5 reports include statistics and reporting granular to the institution level, depending on authentication methods used by the district. Counter5 reports are not standard for our district level customers but are available if required and would be delivered monthly via email.

The following pages provide a sample of a standard report and COUNTER5 report.

Tab 8 – Training and Professional Development

In this tab, offerors shall describe training and professional development that is included with the proposed solution. Offerors shall include a description of the required training for implementation of the program as well as options for continued professional development at either the district or school level. Pricing shall be clearly defined in the proposal submission. Include pricing for county-wide, train-the-trainer model as well as resources and professional development options available to schools at no additional cost.

Britannica solutions are easy to use and require minimal training for educators to begin using the databases with their students. As experienced users of Britannica School and ImageQuest, HCPS educators are already familiar with the interfaces of our solutions and the tools available to maximize value to both teachers and students. As such, we have not included any required training or professional development with our proposed pricing in Tab 9. HCPS staff are always welcome to access the free asynchronous and live webinar trainings our educational consultants host monthly.

Should HCPS seek additional professional development to further expand usage and value, or to support the addition of the Spanish resources option we have proposed, we have provided pricing for such services in Tab 9. Britannica professional learning consultants are experienced facilitators and bring with them best practices in facilitating in-person, virtual, and asynchronous professional learning. Paid options available to Henrico County Public Schools include:

- **In-Person Workshops** – Britannica’s highly engaging workshops empower educators to build competencies in specified areas to impact their teaching and improve student outcomes. Using a variety of collaborative and hands-on learning experiences, educators develop research-based instructional practices and have the opportunity to apply and reflect on what they’ve learned.
- **Virtual Sessions** – Britannica’s virtual sessions provide interactivity for participants through the facilitation of best practices in online learning. Virtual sessions can be recorded for viewing later.
- **Asynchronous Training** – Britannica provides asynchronous training modules to support the knowledge building for resources. The training modules are self-paced, and educators can complete them in a sequential path or use them to better understand specific features of resources by interacting with specific modules.

Tab 9 – Pricing

In this tab, offerors shall provide a detailed pricing schedule. The price shall include all costs associated with providing the services and materials outlined in Sec. II of this RFP.

a. List all categories separately, itemized for evaluation such as license per student, teacher, classroom and site, material cost, training of County staff, projected man-hours, hourly rates, and reimbursable expenses

b. Provide all costs as it relates to the proposed solution for the Scenario on Attachment H and the breakdown of pricing on Attachment I.

Britannica is pleased to provide HCPS with a comprehensive database solution including the district's currently subscribed resources, Britannica School and ImageQuest as well as two Spanish resources that would be new to the district, Britannica Escolar and Britannica Moderna. We believe HCPS will find value in adding these resources which can be leveraged by native Spanish speakers, bilingual students, and students learning Spanish. There are two separate pricing options and scenario forms attached, one to account for our complete proposed solution inclusive of Spanish, and a second reflecting the district's current Britannica resources.

Subject: Reference for Britannica

Frederick County Public Schools has been using Britannica Schools and Britannica Image Quest since the 2013 school year. We made the switch when we realized that Britannica offered our high school students' content at a higher reading level compared to what we were currently subscribing too. That, combined with their Image Library provided our district with a nice solution that has proven over time to be a valuable digital solution for us. There are also other products included with our subscription that just make it an incredible value.

We have had very consistent performance from Britannica with this digital product. It has rarely, if ever, given us trouble. I remember one time finding an image in the product that didn't seem school appropriate and after questioning the image it was removed from the platform. I also inquired if Britannica would consider adding Clip Art to their image library and within a year they did so. This was a very valuable asset to be added for our front office staff's convenience when building school newsletters.

Staff at Britannica has been very easy to work with for almost a decade. Please reach out to me at the contact information in the header of this memo if you have any questions.

Tab 11 – Exceptions

Britannica respectfully submits the following exceptions for review by HCPS.

Clause Location	Concern	Proposed Verbiage
<p>RFP, Section V(R) General Terms and Conditions, Ownership of Deliverable and Related Products</p>	<p>Ownership of Deliverable and Related Products</p> <p>1. The County shall have all rights, title, and interest in or to all specified or unspecified interim and final products, work plans, project reports and/or presentations, data, documentation, computer programs and/or applications, and documentation developed or generated during the completion of this project, including, without limitation, unlimited rights to use, duplicate, modify, or disclose any part thereof, in any manner and for any purpose, and the right to permit or prohibit any other person, including the Successful Offeror, from doing so. To the extent that the Successful Offeror may be deemed at any time to have any of the foregoing rights, the Successful Offeror agrees to irrevocably assign and does hereby irrevocably assign such rights to the County.</p> <p>2. The Successful Offeror is expressly prohibited from receiving additional payments or profit from the items referred to in this paragraph, other than that which is provided for in the general terms and conditions of the Contract.</p> <p>3. This shall not preclude Offerors from submitting proposals, which may include innovative ownership approaches, in the best interest of the County.</p> <p>however, Contractor licenses its Contractor Intellectual Property for use for educational purposes only, including as permitted by the fair use doctrine of the Copyright Act.</p>	<p>The services covered by the RFP are not work-made-for-hire services. Rather, If Britannica is chosen as a Successful Offeror, the County will purchase a license to access and use (on a subscription basis) the subscribed-to, proprietary and Britannica-owned applications, including the content contained therein, for educational purposes only, including as permitted by the fair use doctrine of the Copyright Act.</p> <p>In other words, Britannica’s applications, including the content contained therein, are proprietary to Britannica and if selected as a Successful Offeror, ownership by Britannica (or its licensors) of the same will not and cannot be implied to transfer to the County.</p> <p>Vendor requests that this provision be revised to make clear that Contractor Intellectual Property means “work, ideas, that have been or will be in the future created by Contractor prior to, during, and after entering into this Contract (“Contractor Intellectual Property”).”</p> <p>Please note that the Contractor Intellectual Property is licensed for educational purposes/fair use only - no commercial use. If awarded the contract it will not entitle the County to own pre-existing Contractor Intellectual Property or Contractor Intellectual Property developed (a) outside of this Contract with no assistance from County or (b) by Contractor in its normal course of business operations.</p>
<p>RFP, Attachment D, Section 7.2(i)</p>	<p>In general.</p>	<p>Please note, Vendor’s e-resource solutions are provided as is.</p>
<p>RFP, Attachment D, Section 7.2(ii)</p>	<p>Access and use is confirmed provided the services are paid for and used by the State in accordance with the contract.</p>	<p>Provided the State has paid for access to the services, Contractor will use best efforts to not interfere with the State’s access to and use thereof</p>

BB. Authorization to Transact Business in the Commonwealth	<p>Authorization to Transact Business in the Commonwealth</p> <ol style="list-style-type: none"> 1. A contractor organized as a stock or nonstock corporation, limited liability company, business trust, or limited partnership or registered as a registered limited liability partnership or other business form must be authorized to transact business in the Commonwealth as a domestic or foreign business entity if so required by Title 13.1 or Title 50 of the Code of Virginia or as otherwise required by law. 2. An Offeror organized or authorized to transact business in the Commonwealth pursuant to Title 13.1 or Title 50 of the Code of Virginia must include in its proposal the identification number issued to it by the State Corporation Commission (Attachment C). Any Offeror that is not required to be authorized to transact business in the Commonwealth as a foreign business entity under Title 13.1 or Title 50 of the Code of Virginia or as otherwise required by law must include in its proposal a statement describing why the Offeror is not required to be so authorized. 3. An Offeror described in subsection 2 that fails to provide the required information shall not receive an award unless a written waiver is granted by the Purchasing Director, his designee, or the County Manager. 4. Any falsification or misrepresentation contained in the statement submitted by the Offeror pursuant to Title 13.1 or Title 50 of the Code of Virginia may be cause for debarment by the County. 5. Any business entity described in subsection 1 that enters into a contract with a public body must not allow its existence to lapse or allow its certificate of authority or registration to transact business in the Commonwealth if so required by Title 13.1 or Title 50 of the Code of Virginia to be revoked or cancelled at any time during the term of the contract. 	<p>Britannica does not require an SCC Identification Number. Also please note:</p> <p><i>Britannica is not required to be authorized to transact business in the Commonwealth as a foreign business entity under Title 13.1 or Title 50 because (1) Britannica is not "transacting business in Virginia" per VA Code Section 13.1-757(B)(6), which states as follows: "The following activities, among others, do <u>not</u> constitute transacting business within the meaning of subsection A: ... (6) Soliciting or obtaining orders, whether by mail or through employees or agents or otherwise, if the orders require acceptance outside this Commonwealth before they become contracts...;" and (2) Title 50 does not apply to EB, Inc. because EB, Inc. is a corporation and not a partnership</i></p>

ofic. República del Perú

País del oeste de América del Sur. Superficie: 1.285.216 km² (496.225 mi²). Población (est. 2011): 29.249.000 hab. Capital: Lima. Casi la mitad de la población es de origen **quechua** y cerca de un tercio es **mestizo**; la mayor parte restante es de ancestro aymara y europeo. Idiomas: español, quechua y aymara (todos oficiales). Religiones: cristianismo (predominantemente católica [oficial]; también protestante). Moneda: nuevo sol. Perú es el tercer país más extenso de América del Sur y puede ser dividido en tres regiones geográficas de oeste a este: la costa, que consiste en una larga y estrecha faja de tierras bajas desérticas; la sierra (tierras altas), correspondiente a la porción peruana de la cordillera de los **Andes**; y la Amazonia, extensas estribaciones y llanuras boscosas orientales, compuestas principalmente por selva lluviosa tropical de la cuenca del **Amazonas**. El país tiene una economía mixta en vías de desarrollo, basada principalmente en servicios, manufactura, agricultura y minería. La mayor parte de las industrias, entre ellas la petrolera, fueron nacionalizadas a fines de la década de 1960 y comienzos de la siguiente, pero varias se privatizaron nuevamente en la década de 1990. Es una república unicameral; el jefe de Estado y de Gobierno es el presidente. Fue el centro del Imperio **Inca**, cuya capital, **Cuzco**, fue establecida en el s. XI o s. XIII. En 1533, la región fue conquistada por **Francisco Pizarro** y dominada por España por casi 300 años, bajo jurisdicción del virreinato del **Perú**. Declaró su independencia en 1821 y obtuvo su libertad en 1824. Fue derrotado por Chile en la guerra del **Pacífico** (1879-83). En 1941, una disputa fronteriza con Ecuador desató una guerra, que otorgó a Perú el control de una parte mayor de la cuenca amazónica; otras disputas se sucedieron hasta que en 1998 la frontera se demarcó definitivamente. El gobierno fue depuesto por una junta militar en 1968; el régimen civil se restauró en 1980. El gobierno de **Alberto Fujimori** disolvió el congreso en 1992 y promulgó una nueva constitución al año siguiente. Su gobierno combatió con éxito los movimientos revolucionarios **Sendero Luminoso** y **Túpac Amaru**. Fujimori fue elegido para un segundo período presidencial en 1995, pero hubo acusaciones de fraude durante las elecciones para su postulación a un tercer período en 2000; ese mismo año cayó su gobierno. Fue sucedido en el cargo por **Alejandro Toledo** (2001-06), primer presidente de origen quechua elegido democráticamente.

De-Identifiable Information (DI): De-Identification refers to the process by which the Provider removes or obscures any Personally Identifiable Information (“PII”) from student records in a way that removes or minimizes the risk of disclosure of the identity of the individual and information about them. Anonymization or de-identification should follow guidance equivalent to that provided by U.S Department of Education publication “Data De-identification: An Overview of Basic Terms” or NISTIR Special Publication (SP) 8053 De-Identification of Personally Identifiable Information. Some potential disclosure limitation methods are blurring, masking, and perturbation. De-identification should ensure that any information when put together cannot indirectly identify the student, not only from the viewpoint of the public, but also from the vantage of those who are familiar with the individual. Information cannot be de-identified if there are fewer than twenty (20) students in the samples of a particular field or category, *i.e.*, twenty students in a particular grade or less than twenty students with a particular disability.

Indirect Identifiers: Any information that, either alone or in aggregate, would allow a reasonable person to be able to identify a student to a reasonable certainty

RE: RFP No. 22-2326-3EMF Library Databases

Dear Mr. Knott and Ms. Falcone,

Henrico County Public Schools (HCPS) seeks school library research databases to support research and inquiry by its nearly 50,000 students, across all grade levels. Resources must be easy to use, accessible, and support multiple reading levels.

As the district's database provider for more than ten years, Encyclopaedia Britannica (Britannica) is pleased to submit a proposal that includes multiple Britannica Digital Learning resources to support HCPS learners of all ages. Our proposal includes the district's currently subscribed resources—Britannica School and Britannica ImageQuest—as well as two Spanish language resources—Britannica Escolar and Britannica Moderna.

Britannica has been empowering the way the world teaches and learns for over 250 years. We have become a powerhouse multimedia educational brand at the forefront of the information revolution, with proven digital learning solutions that meet the evolving needs of lifelong learners today. Our mission is to encourage discovery, spur exceptional academic performance, and inspire curiosity and the joy of learning.

There is no comparable solution that has the amount of trusted content and multimedia that Britannica offers HCPS, or our frequency of updates. Britannica provides daily content updates and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media annually across our three easy-to-use, age-appropriate Britannica School interfaces. Our resources support the Virginia Standards of Learning, provide leveled articles, and meet requirements for accessibility.

We look forward to a continued partnership with HCPS. By integrating Britannica's rigorous academic content, millions of rights-cleared images for educational use, and native Spanish resources, HCPS will be providing world-class digital resources to HCPS educators and students. Feel free to contact me directly with questions regarding this submission.

Best regards,

Tab 2 – Statement of the Scope

In this tab, Offerors, in concise terms, shall state their understanding of the Scope of Services requested by this RFP in Section II.

II. Scope of Services

A. General Requirements

1. A solution for PK-12 coverage for general encyclopedia databases including, but not limited to dictionary, thesaurus, almanac and atlas.

We are pleased to propose four databases for access by Henrico County Public Schools (HCPS) staff, teachers, and students. These resources include:

- Britannica Online School Edition (Britannica School) – Digital encyclopedia for K–12 audience
- ImageQuest – Database of 3.4 million rights-cleared images for K–12 education use
- Britannica Escolar – Digital encyclopedia for K–8 audience, in native Spanish
- Britannica Moderna – Digital encyclopedia for High School audiences, in native Spanish

We describe each of these resources on the following pages.

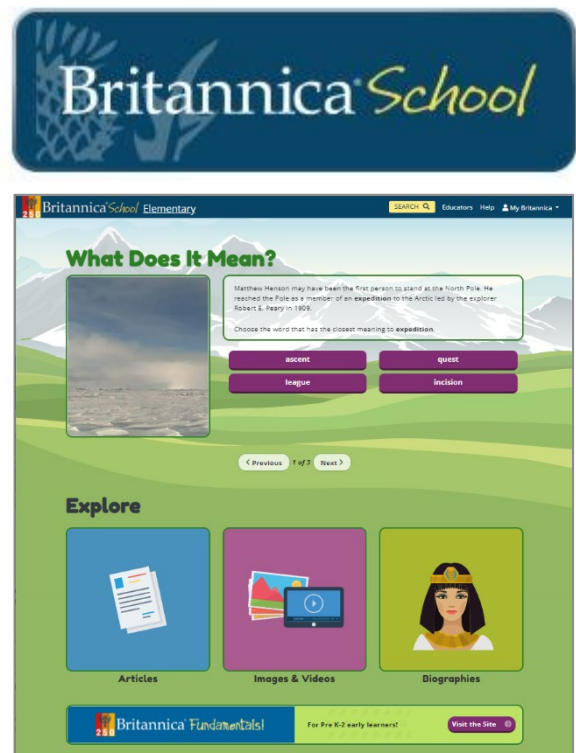

Britannica School

Britannica School includes unique encyclopedia content for HCPS elementary, middle, and high school students. More than 133,000 full-text encyclopedia articles are complemented by full-text magazine articles, student-friendly web sites, and rich multimedia (photos, illustrations, videos, animations, infographics, maps, and more).

Content is differentiated at four levels:

- K–2 Fundamentals
- 3–5 Elementary Level
- 6–8 Middle School Level
- 9–12 High School Level

This resource was created to meet HCPS students where they are on the learning spectrum. The Fundamentals level is a self-contained database that offers text, games, and activities for the youngest learners. The interface is colorful and engaging. The Elementary, Middle, and High School levels are all part of a single site with each having its own age-appropriate interface. Students can access lower and higher reading-level content without leaving the interface.

Britannica School provides many features that support teaching and learning in HCPS. Database articles have been aligned to the Virginia Standards of Learning so educators can search for a standard and see content that will support that standard. Our Quick-Click Dictionary allows students to click on any word to retrieve its definition, audio pronunciation, and Spanish translation. The included translation tool can translate any article into over 80 different languages. The articles include Lexile levels, and search results can be filtered by Lexile range. Users also can increase or decrease font size on any article or have the article read aloud. Additional functions include a variety of search methodologies, the ability to print and save documents, classroom activities, research support, specific features that provide instructional support, etc.

Britannica School integrates with classroom tools such as Google Drive and/or Google Classroom as well as One Drive. Britannica School also integrates with many popular school and library technologies including:

- Single Sign On (SSO) tools like Clever and ClassLink
- Learning Management Systems like Canvas and Schoology
- Library Management and Discovery services like Follett Destiny, Mackin Via, and EBSCO Discovery Services

There is no comparable resource that has the amount of content and multimedia that Britannica offers or our frequency of updates. Britannica provides daily content updates, and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media annually.

Britannica ImageQuest

Britannica ImageQuest provides HCPS students, educators, and staff with access to more than 3.4 million rights-cleared images from one convenient site. More than 55 of the best image providers in the world—including the Bridgeman Art Library, DK Images, Getty Images, the National Portrait Gallery of London, and the Natural History Museum of London—have joined with Britannica to provide the best and broadest collection of proprietary educational imagery (not freely available on the web).

All images in Britannica ImageQuest are rights-cleared for non-commercial, educational use—great for HCPS school curriculum materials, teacher lesson plans, assignments, activities, and whiteboards; student reports and projects; or school websites, newsletters, newspapers, flyers, and bulletins. As a fully searchable resource, Britannica ImageQuest provides a unique collection from trustworthy sources. With images of every topic in one convenient site, users don't have to spend time combing through multiple Web sites looking for reliable images.

Each image comes with complete metadata, including the source, the copyright holder, caption, and keywords. Each image is downloadable and includes proper citations in MLA, APA, Harvard, and Chicago Manual of Style formats.

Britannica Escolar

Britannica Escolar is the leading knowledge-building resource that is universally trusted for accurate and age-appropriate content in Spanish. Britannica Escolar has two distinct levels of unique content for HCPS students and educators—Primaria (Elementary) and Secundaria (Middle School)—offering information of interest to every age. The program’s features make it an invaluable resource to add for HCPS’s native Spanish speakers, bilingual students, and students learning Spanish.

Features and benefits include:

- engaging home pages at each level that are entry points to thousands of articles, images, videos, maps, and tables, many of which are added daily.
- Reino Animal (Animal Kingdom) and Sabías que...? (Did You Know?) features, which pique students’ curiosity and the desire to dig deeper.
- Mi Britannica (My Britannica), which offers a convenient place to save, organize, and share collections of content that users find in Britannica Escolar.
- a responsive design that provides access to the site anytime, anywhere, and on any device, including tablets, smartphones, and laptops.

Britannica Escolar also offers HCPS students a bank of interactive learning activities where they can practice basic math and language skills, Spanish grammar and reading skills, geography, history, and math.

Britannica Moderna

Britannica Moderna is the definitive Spanish-language resource, complete with age-appropriate content for older HCPS students and their teachers. Britannica Moderna provides access to nearly 47,000 articles, as well as more than 13,000 images, maps, audiovisual materials, a dictionary, and atlas. Articles from BBC World News provide patrons with international news, features, and analysis within the same platform. The program’s features make it an invaluable addition for HCPS’s older native Spanish speakers, bilingual students, and students learning Spanish.

Like the other editions described above, Britannica Moderna offers the ability to save resources for quick access again in the future. The program’s responsive design provides an optimal viewing experience across a variety of devices (e.g., smartphone, tablet, computer) and is accessible via web browser from wherever HCPS teachers and student seek to connect.

2. The ability to print and/or email and/or transfer to Google Drive accounts of full text, abstracts, and graphics and does not require email access on the searching computer.

HCPS teachers and students can print articles and graphics, email links to articles and graphics (without email logging into email to send) and save full-text articles to Google Drive accounts. Saving to Google Drive requires logging into Google.

3. Lesson plans and/or resources tied to Virginia SOL.

The Teaching Tools (**Figure 1**) section of Britannica School includes a space where HCPS educators can browse for content aligned to Virginia Standards of Learning and create and save lesson plans.

Figure 1. Search for articles aligned to Virginia state standards.

4. Copy ready citations, format tools, compatible with citation builder such as Noodle Tools.

Britannica’s resources have copy ready citations in MLA, APA, Harvard, and Chicago Manual of Style formats that can be copied and pasted. Citations do not export to Noodle Tools.

5. Translation for ELL students and language classes and audio for students.

Britannica School’s translation tool can translate any article text into over 80 different languages. We have also proposed Britannica Escolar and Britannica Moderna which are databases developed in Spanish with Spanish audio.

6. A variety of formats (video, audio, ebook, reference, periodical, transcript, etc.) which include primary and secondary source documents.

The resources we propose will provide HCPS students and teachers with resources in a variety of formats including more than 133,000 full-text encyclopedia articles in Britannica School complemented by primary sources such as access to letters, and speeches; full-text magazine articles; student-friendly web site links; rich

multimedia (photos, illustrations, videos, animations, infographics, maps, and more). Our solution also includes more than 60,000 articles in Spanish and more than 3.4 million rights-cleared images for educational use.

7. Reading, vocabulary, and conceptual level appropriate for age level of students.

Britannica School includes articles at multiple levels and delivered in interfaces appropriate to students' age levels as described below:

- K–2 Fundamentals
- 3–5 Elementary Level
- 6–8 Middle School Level
- 9–12 High School Level

8. Articles that can be linked to Schoology and/or other district platform programs.

Articles from Britannica articles can be cut and pasted for sharing elsewhere.

9. Searches multiple encyclopedias/articles/etc.

Britannica School allows users to search three databases of content at different levels (elementary, middle, and high school). Britannica Escolar searches Spanish articles from our Spanish elementary and middle school databases, while Moderna searches our high school level Spanish database.

10. Ease of access. No more than 3 clicks from initial search to get to information.

Britannica's proposed databases are easy to use and generally do not require more than 3 clicks from initial search to get to information.

11. Multiple reading levels preferred (single articles that can be leveled for reading ability).

Britannica School includes articles at three different ranges of reading level and articles can be filtered by Lexile Level.

12. Graphic friendly, colorful interface, and are ADA compliant and comply with the Information Technology Accessibility Act Code of Virginia- 2-2-3500)

Each proposed resource has its own graphic-friendly, colorful interface that is ADA compliant (described later in this tab) and complies with the Information Technology Accessibility Act Code of Virginia- 2-2-3500.

As described above, Britannica School has three user-friendly interfaces to serve the needs of all HCPS students. After navigating to the Britannica School homepage, students select to enter or search one of the following three interface options (**Figure 2**, on the next page):

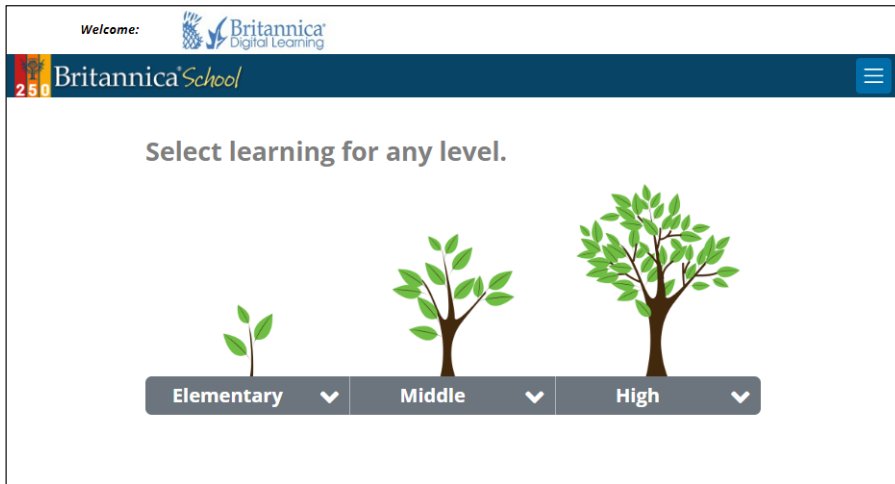

Figure 2. Guide students to the best interface and resources for them based on their desired content level or use-case.

Once users have selected their interface, they will access the content and tools associated with that level of experience as shown in **Figure 3**. In every interface, users can search using keywords in the search bar at the top of the page or can explore by reference type (e.g., articles, media, biographies) or subject.

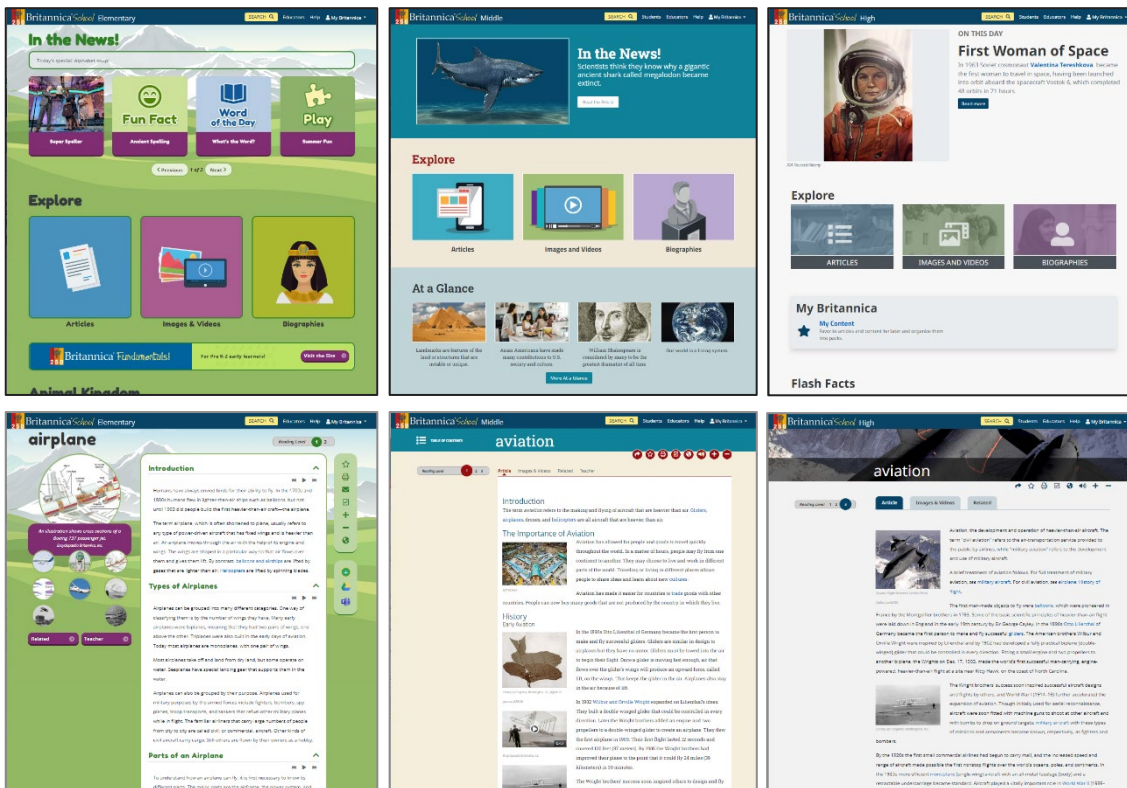

Figure 3. Engage users with user interfaces and leveled content that meets their needs and interests.

Below is a brief summary of each interface. Please note that content at different reading levels is available throughout these interfaces as noted below.

- **Fundamentals** – Designed for early learners, grades Pre-K–2, this interface (**Figure 4**, below) keeps kids on a single page with all navigation occurring within a single pane. It combines bright colors and active animations to engage younger students and provide a fun introduction to online learning.
- **Elementary**– The Elementary interface for grades 3–5 includes bright colors and visual browsing options for students. From the Elementary interfaces, students can search all content levels and choose to move up to the Middle interface.
- **Middle** – The Middle interface provides a more grown-up look and feel and allows students to change the content to lower and higher reading levels while staying in the interface that is right for them. Searching is done across all levels with a default at Level 2 (middle school).
- **High** – A still more mature look is combined with more advanced features and content sets in the High interface. As with the middle school level, students can adjust the reading level of the content displayed as needed without having to move to a page with a younger look and feel.

Figure 4. Provide Pre-K–2 students with a fun introduction to online learning with Fundamentals like biomes, read-aloud informational stories, math and literacy games, and a creative space.

Britannica Escolar

After accessing the Britannica Escolar website, HCPS users can choose between two interface levels: Primaria (Elementary) or Secundaria (Middle) as shown in **Figure 5**, next page. Once users have selected their interface, they will access the content and tools associated with that level of experience. In every interface, users can search using keywords (in Spanish) in the search bar at the top of the page or can explore by reference type (e.g., articles, media, biographies) or subject.

Figure 5. Allow users to select the interface that delivers age-appropriate content and features.

Britannica Moderna

Upon accessing Britannica Moderna, HCPS users can use the search bar to search using a word written in Spanish (**Figure 6**). Users can also search alphabetically, browse through biographies of prominent figures, check out the video library or use the Atlas del Mundo (World Atlas) to explore different regions of the world. At the bottom of the homepage users will see the latest news from the BBC Mundo newsfeed. Clicking on the phrase Mi investigación in the top right corner of the interface allows users to quickly access the Britannica Moderna content they have previously saved by favoriting (clicking on the star) an article.

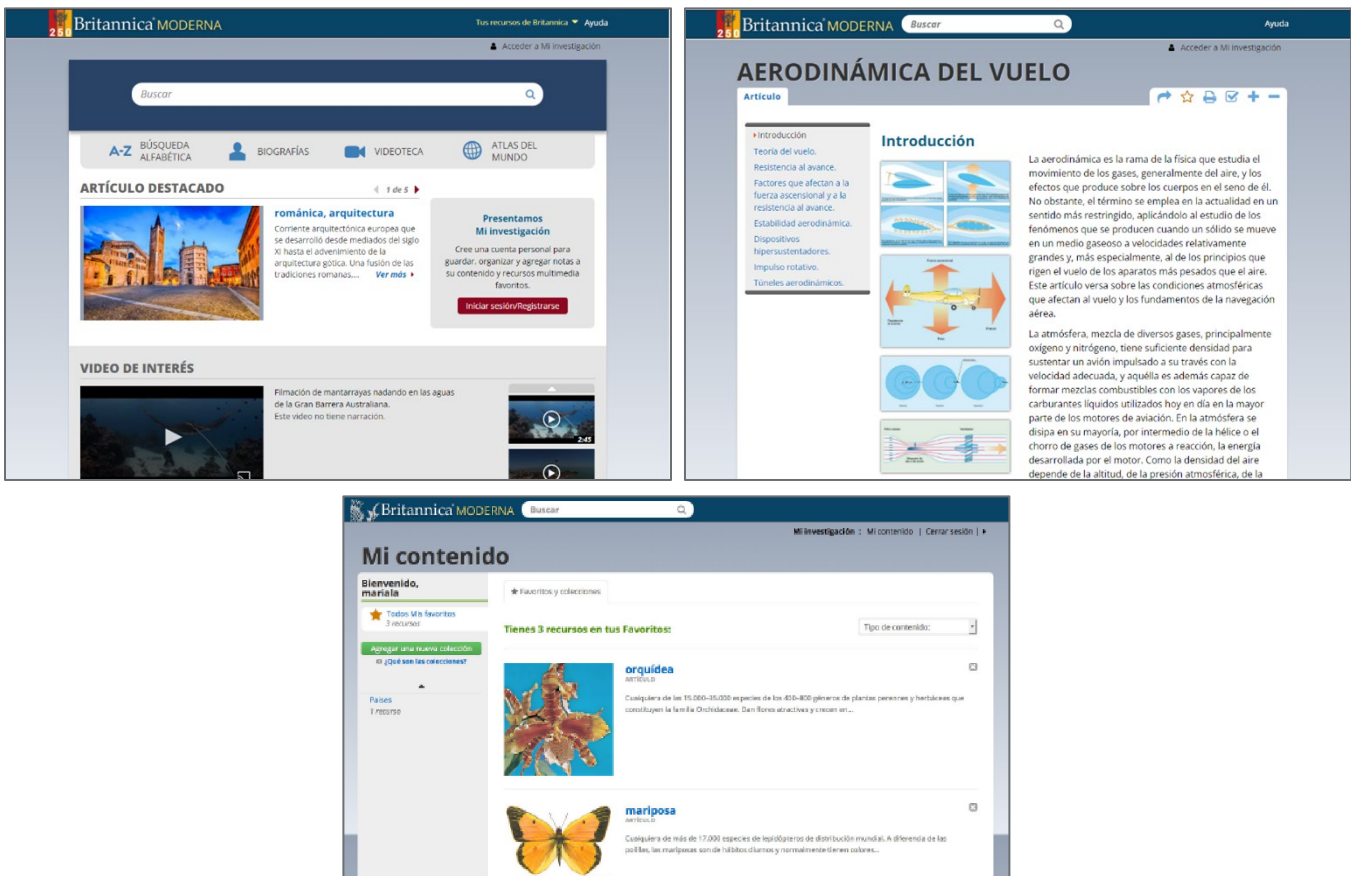

Figure 6. Provide Spanish speaking users an interface and articles in Spanish.

We describe our metrics and provide sample reports in *Tab 7 – Reporting and Monitoring*.

D. Training and Support

1. Offerors should include a description of the optional or required training for implementation of programs as well as options for continued training (on-site, webinar, and printed materials) for all users. Offerors should provide pricing for training and Professional Development.

Our optional paid professional learning is described in *Tab 8 – Training and Professional Development*.

2. The Successful Offeror shall offer a toll-free service number for help desk support to HCPS at a minimum from 8:00 am to 5 pm EST, Monday-Friday.

Toll-free customer support is available during the hours of 9 AM to 6 PM Eastern Standard Time, Monday–Friday.

III. Technology Requirements

A. User Interface

1. Browser Support – the proposed solution shall:

a. Have compatibility with the current versions of multiple browsers- at minimum, current versions of Edge, Safari, and Chrome browsers.

Our products are available to use on demand, on any device using a standard browser. Britannica's online products are built with a responsive design, so content adjusts to fit the user's display without losing content or degrading the user experience. Whether HCPS teachers and students need to work at school, at home, or from another remote location, our educational products will be accessible wherever they have Internet.

To maximize performance, we recommend using an up-to-date version of Google Chrome, Apple Safari, Mozilla Firefox, or Microsoft Edge.

b. Maintain compatibility with listed browsers and future versions/updates/releases of the listed browsers for the duration of the contract.

Britannica will maintain compatibility with the listed browsers and any future versions/updates/releases of these browsers for the duration of the contract.

c. Only require standard browser plugins.

The proposed databases may contain resources that require a PDF reader to view. A default viewer is included with most operating systems and web browsers. If missing, your browser may prompt you to download one to view certain content. We advise using an up-to-date version, and Adobe Acrobat Reader can be downloaded for free.

2. The proposed solution will be compliant with the Americans with Disabilities Act requirements for accessibility.

To fulfill the objectives of our accessibility commitment, we have adopted as our primary guidelines the Section 508 website accessibility standards set forth by the U.S. General Services Administration and also the Web

Content Accessibility Guidelines (WCAG) 2.0 recommended by the World Wide Web Consortium (W3C). We continuously test Britannica sites for compliance with the accessibility standards set forth above and try our very best to remain compliant.

The accessibility of Britannica sites, however, depends on third-party technologies provided by the operating systems, hardware platforms, and assistive technologies, all of which can affect the level of accessibility of Britannica sites.

We will continue to enhance the accessibility of our online products as greater functionality becomes available to ensure ongoing usefulness to all users, including those with different abilities.

We also are committed to addressing issues that prevent the use of our software by people with different abilities. We welcome user feedback and suggestions. If HCPS users have any comments or questions about our online products and the accessibility thereof, they can contact Britannica Customer Support at 1-800-621-3900, ext. 7160 or go to the Britannica Customer Support form.

3. The proposed solution shall be cloud-based and delivered via the Internet over wireless LANs to the client's browser.

Our proposed solution is cloud-based and accessed via an internet browser.

4. The proposed solution shall provide an intuitive user interface that allows for ease of use by teachers and students.

As described in response to general requirement number 12, above, Britannica's solutions provide intuitive user interfaces for ease of use by teachers and students.

5. The proposed solution shall support mobile technology including but not limited to the specific mobile devices currently used in HCPS (iOS, Chromebooks and Android Platforms).

Our products are available to use on demand, on any device using a standard browser. Britannica's online products are built with a responsive design, so content adjusts to fit the user's display without losing content or degrading the user experience.

B. Integration

1. The proposed solution shall provide methods for user account administration that are easy to use and maintain.

Britannica's proposed solutions do not require user accounts, authentication takes place at the district or building level.

2. The proposed solution shall support a single sign-on solution that does not require staff or students to have a separate account or password for accessing the vendor's application.

Our proposed solution does not require staff or students to have an account and password. Optionally, should the district desire, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

3. The proposed solution shall allow for LTI, Azure Active Directory or LDAP as a method of authentication and authorization.

Currently the district uses IP authentication to access Britannica solutions. Britannica School also supports LTI authentication through Schoology, Classlink, Canvas, Safari Montage. Britannica ImageQuest, Britannica Escolar, and Britannica Moderna also support those same authentication methods with the current exception of not supporting Schoology.

4. The proposed solution shall provide a means to identify the individual or client using the application, authenticate the individual and determine the authorities and rights granted to that individual as well as a reporting engine for tracking usage and progress.

Through the offered authentication methods, the proposed Britannica resources identify users as belonging to a HCPS account and provide access to the subscribed-to resources.

Britannica usage can be reported down to the building level if authentication methods are set up to support such reporting. Currently HCPS usage is set up to report all elementary schools together as one category and the remainder of schools as a separate category.

5. Any requirements for student, staff, course, roster or school information must be supported through a common specification. The exchange of data must be through a common protocol and not require the installation of vendor-specific software in the HCPS internal infrastructure. HCPS currently supports the following means of exchanging student information in order of preference but will accept other non-vendor specific protocols:

- a) LTI integration as a Tool Provider (TP) with our LMS Solution (Schoology)**
- b) SIF - Student Information framework**
- c) Exchange of information through Clever - a third party vendor for exchanging common data for school systems; the Successful Offeror is responsible for any costs incurred with Clever implementation.**
- d) File exchange via the IMS OneRoster format to a vendor supported sFTP server**
- e) File exchange to a vendor-supported sFTP server. If this option is used the vendor must provide all specifications for file requirements in their proposal.**

Student, staff, course, roster or school information is not required for use of the proposed Britannica resources, but, optionally, should the district desire, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

Britannica School supports LTI authentication through Schoology, Classlink, Canvas, Safari Montage. Britannica ImageQuest, Britannica Escolar, and Britannica Moderna also support those same authentication methods with the current exception of not supporting Schoology.

6. No additional fees may be charged to HCPS for data integration

Britannica acknowledges this requirement.

7. The proposed data exchange solution must be described in detail in the Offeror's response. The proposed solution must also include limitations the Offeror has such as the number of teachers for a class and the number of schools associated with teachers and students.

We describe data exchange in *Tab 5 - Technical Administration, User Interface, and Integration*.

8. Solutions that allow for seamless integration of their product through the IMS Global interoperability standards are preferred. The proposal shall provide a detailed description of the implementation and support the solution has for LTI version 1.1 ® or higher certified as a Tool Provider (TP) with our LMS Solution (Schoology).

We describe data exchange in *Tab 5 - Technical Administration, User Interface, and Integration*.

C. Infrastructure and System Administration

1. The proposed solution will provide a secure, web-based system for data in transit and at rest.

The proposed solution includes secure, web-based databases hosted on the AWS platform.

2. Successful Offeror(s) will document compliance with all local, state, and federal laws related to student data privacy.

Britannica is dedicated to ensuring the security and privacy of our customer data, we describe the administrative and technical safeguards we maintain in *Tab 6 – Infrastructure and System*.

The subscribed-to products are compliant with laws regarding child and student privacy and protection including provisions of the Children's Online Privacy Protection Act (COPPA), the Family Educational Rights and Privacy Act (FERPA), and the Protection of Pupil Rights Amendment (PPRA).

Britannica obtains consent from the subscribing school/district. as permitted by law, by entering into a subscription license agreement for each subscribed-to product with the consenting school/district. The agreement permits Britannica to collect certain personal information solely for the use and benefit of the subscribing institution and for no other commercial purpose.

Types of personal information that may be collected by use of the products (as permitted by agreement with the subscribing institution) include: IP addresses of users; meta data on user interaction with the subscribed-to product; student grade level; homeroom; student school enrollment; student scheduled courses; teacher names; local and state school ID numbers; assigned student ID number; student app username; student first and/or last name; student responses to surveys or questionnaires; and student generated content. This data is stored for the length of time permitted by and agreed upon in our agreements (including data protection agreements) with the subscribing institution and at the direction of the subscribing institution or as otherwise required by applicable laws. Certain data may be shared solely with a Britannica-approved third-party service provider solely as may be necessary to deliver the product and its services in the manner described and as contracted for by the subscribing institution.

Our accredited and experienced data privacy team oversees the policies, procedures, and systems that ensure security and privacy. This would be happy to answer specific questions related to compliance with specific local, state, and federal laws related to student data privacy.

3. The proposed solution shall contain neither commercial content nor serve as a vehicle to market goods and services.

Our proposed solutions are developed specifically for K–12 school use and do not contain commercial content nor do they serve as a vehicle to market goods and services to students.

4. Web Accessibility

a. The solution shall be accessible to persons with disabilities, including: i. Blindness, color blindness, visual impairment

ii. Deafness, hearing impairment

iii. Speech impairment

iv. Mobility, strength, dexterity or reach impairment

b. The solution shall support the use of commonly available screen readers.

c. The solution shall comply with Federal Web Accessibility Standards (part of Section 508 of the Rehabilitation Act).

d. The solution shall meet Level A and Level AA guidelines as specified by the W3C's WCAG 2.0 guidelines.

To fulfill the objectives of our accessibility commitment, we have adopted as our primary guidelines the Section 508 website accessibility standards set forth by the U.S. General Services Administration and also the Web Content Accessibility Guidelines (WCAG) 2.0 recommended by the World Wide Web Consortium (W3C). We continuously test Britannica sites for compliance with the Level AA accessibility standards set forth above and try our very best to remain compliant.

The accessibility of Britannica sites, however, depends on third-party technologies provided by the operating systems, hardware platforms, and assistive technologies, all of which can affect the level of accessibility of Britannica sites.

We will continue to enhance the accessibility of our online products as greater functionality becomes available to ensure ongoing usefulness to all users, including those with different abilities.

We also are committed to addressing issues that prevent the use of our software by people with different abilities. We welcome user feedback and suggestions. If HCPS users have any comments or questions about our online products and the accessibility thereof, they can contact Britannica Customer Support at 1-800-621-3900, ext. 7160 or go to the Britannica Customer Support form.

5. The proposed solution shall be able to handle at least 60,000+ concurrent HCPS users with less than 30 ms latency. Offeror(s) must provide comprehensive documentation to evidence the ability to accommodate concurrent users based on data collected from a similar environment.

As the nature and content of our databases generally do not require the full student population of a school district to log on at the same time, Britannica does not currently have any evidence from which we can draw to specifically demonstrate support for 60,000 concurrent users. As far as we are aware, HCPS has not experienced latency or bandwidth issues resulting from current usage.

6. If the solution is reliant on LDAP authentication, HCPS will only accept a defined external IP address to allow Firewall transactions and will not accept the allowance of entire network segments.

LDAP authentication is not applicable to our solution.

7. HCPS shall have the ability to submit requests for an alteration of the digital content (including additional supporting data, modification of current data, or removal of data deemed inappropriate by HCPS) via email or web-based forms embedded in the digital content.

There is no comparable resource that has the amount of content and multimedia that Britannica offers or our frequency of updates. Britannica provides daily content updates, and all major events in history are chronicled in real time. Britannica posts approximately 13,000 new and updated encyclopedia articles and media to the Britannica School databases annually. HCPS is welcome to send requests for additional supporting data or modifications of current data via email and our editorial team will review and consider if such requests meet our editorial policies and content guidelines.

All Britannica School content that was developed by our editorial team aligns with Britannica's editorial policies and guidelines for developing and providing content at appropriate audience levels. Should HCPS contest the appropriateness of specific content for a specific age or audience, Britannica will review the material in question to ensure it aligns with our editorial policies and guidelines. Whether or not the material will be edited or removed will be dependent on the extent to which we find the material aligns to our policies, the findings of which will be explained in our response to HCPS. Should Britannica find the material in question does not meet our policies and guidelines, we will edit the content to meet our guidelines.

For Britannica School content provided by our 3rd party content providers, the following controls may apply (dependent of the type and source of content):

1. An account setting may be offered that allows us to turn off content entirely at the individual account level, as long as they've been set up in our system as independent accounts.
2. We may ask the content provider to delete an entire title from our collection
3. We may entirely remove an individual website link from our database.

D. Computer, Software, and Network Specifications

Tab 5 - Technical Administration, User Interface, and Integration

In this tab, offerors should describe, in detail, how the proposed solution meets the technical requirement of the RFP. Offerors shall provide, at a minimum, documentation to support:

a. Evidence of their ability to accommodate concurrent users based on data collected from a similar environment;

As the nature and content of our databases generally do not require whole school districts of students to log on at the same time, Britannica does not currently have any evidence from which we can draw to specifically demonstrate support for 60,000 concurrent users. As far as we are aware, HCPS has not experienced latency or bandwidth issues resulting from current usage.

b. How accounts are maintained in their system and how they support automated provisioning of users and accounts;

Britannica's proposed solutions do not require user accounts, authentication takes place at the district or building level. Optionally, should the district want users to have individual user accounts for saving resources, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

c. Describe the data exchange process in detail;

Our proposed solution does not require rostering. Currently, HCPS's authentication happens through IP address. Optionally, should the district want users to have individual user accounts for saving resources, accounts can be provisioned automatically via LTI SSO. We require only a unique user id and the role (student or teacher) to be able to create the user in our system. Upon the user creation, the user will be granted access to our product(s).

d. Describe any limitations the proposed solution may have such as the number of teachers for a class and the number of schools associated with teachers and students;

There are no such limitations.

e. Provide per user bandwidth requirements for the proposed solution;

About 10 Mbps per user for best performance.

f. Provide the average bandwidth per student required; and,

A page weight of a Britannica School site is around 2 Mbytes compressed, with ImageQuest, Moderna, and Escolar being lighter.

g. Provide a detailed description of the implementation and support the solution has for LTI version 1.1 or higher certified as a toll Provider (TP) with our LMS Solution (Schoolology).

Britannica School is a certified Schoolology app and supports LTI version 1.1. Britannica ImageQuest, Britannica Moderna, and Britannica Escolar are not currently certified.

10. Provide all documentation for each piece of software equipment, or software, including copyright information, all operator and user manual, training materials necessary for the proper and successful use of the software where an installation or configuration on HCPS network or devices are required.

The proposed solutions are websites hosted by Britannica on the AWS cloud. As such, no installation on the HCPS network or devices will be required.

This page intentionally left blank.

Tab 6 – Infrastructure and System Administration

In this tab, offerors shall provide information regarding infrastructure and system administration as described in the Scope of Services as well as the following information:

a. Details of the hosting environment including hosting provider, service level agreements between the offeror and the hosting provider, and length of the relationship between the offeror and the hosting provider.

Britannica's solutions and related data are hosted on the Amazon Web Services (AWS) cloud and have been since 2020. AWS is the most popular, powerful, and secure public cloud hosting service. As a cloud-hosted solution, Britannica manages all matters related to hosting. Product patches and updates are automatically applied, freeing HCPS staff from having to manually manage these updates. We have a standard AWS Service level agreement.

b. Specifics of structures in place to ensure high availability including redundant Internet paths, hardware failover, scalability, and protection against denial of service attacks or other network threats.

Britannica's applications are available 24 hours a day, 365 days per year. Updates do not typically involve downtime for customer access. Britannica's applications reported more than 99.9% availability over the past twelve months. In addition, all application solutions have full redundancies and Britannica provides for the backup/recovery, data retention, and disaster recovery of such application solutions using strategies available to us within AWS (our cloud-services provider) and internal policies and procedures. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly. We also employ Cloudflare, which is a DDoS protection tool. Britannica performs vulnerability assessments across its products and digital environment on no less than a quarterly basis and performs penetration testing across its products and digital environment on a daily basis.

c. Specifics of security measures in place to ensure that district data is secure during both storage and transit.

Britannica is dedicated to ensuring the security and privacy of our customer data. We maintain administrative and technical safeguards for protection of the security, confidentiality, and integrity of customer data. These safeguards include, but are not limited to, measures for preventing access, use, modification, or disclosure of customer data by Britannica personnel, except to provide services and prevent or address service or technical problems; as compelled by law; or as expressly permitted by the customer in advance, in writing. Britannica uses best efforts to adopt data security and privacy policies and controls that align with NIST 800-171 Rev. 1, including the use of access and storage controls, privacy and security awareness training, audits, authentication, maintenance, risk assessments, and various other controls. Our documented security and privacy policies provide a framework for maintaining effective and efficient internal security and privacy controls and practices as described below.

Employee Training, Policies, and Procedures

All Britannica employees receive data security and privacy training materials upon onboarding. In addition, Britannica employees are required to attend an annual, in-person privacy and security awareness training session, and complete monthly, third-party provided and verifiable privacy or security training modules and related

assessments. Britannica's IT policies and procedures, including its information and network security and data breach notification policies (among others) are posted for access and reference by Britannica's U.S. employees and representatives on Britannica's intranet site and shared with all Britannica employees and representatives globally during onboarding and in connection with Britannica's annual security and privacy awareness training sessions. In addition, all employees and representatives sign confidentiality agreements by which they commit to maintain and continuously ensure the confidentiality, both during and after their engagement with the Britannica, of all data or information learned, received or otherwise processed by such employee or representative that relates to or is controlled by Britannica or its customers and that is non-public, contains personally identifiable information, or pertains to confidential or proprietary business matters.

Britannica maintains role-based, least-privileged access to our customer data. Only those individuals with direct responsibilities for creating/deleting user accounts, providing technical support or otherwise providing the subscribed-to services as requested by a customer have access to this data and we use a ticketing system with extensive audit trails to follow through. Britannica ensures that any of its employees who have access to personally identifiable information (PII) receive training on the federal and state laws governing confidentiality of such information. For those who have privileged access, they must use an individual VPN connection to access customer data when working remotely. All transactions are performed on TLS with secure authentication. Our Information Security policies contain strict policies for employees who need to transport customer data on portable devices. If an employee is switching to a new (non-privileged) role at Britannica, or are leaving the company, we revoke their access on the same day.

Building and Physical Security

Our building entrance is staffed with 24x7 security guards. Beyond that, our office entrance doors are always locked with receptionist(s) attending to the entrances. Every employee must use a security pass (fob) to unlock the door to enter the premises. We also maintain security cameras and monitor all the entrances and hallways. Our internal data center has an additional lock with a separate security access card—issued only to a few IT staff, along with an additional security camera. We use a cloud-based inventory control software to keep close inventory of our company technology assets. When needed, we wipe all the hard disks using DoD 3-pass technique. When hardware reaches the end of life, we use a 3rd party professional firm to destroy disks in a secure way.

User security and privacy

Britannica is dedicated to maintaining user privacy and a link to our privacy policy appears on every page of our websites. As specifically stated in our privacy policy and confirmed in applicable data protection and licensing agreements, Britannica guarantees the confidentiality of our institutional customers' (e.g., libraries, educational institutions) individual users (e.g., patrons, students, staff), including that no user's personal data is used or sold without the user's permission except as may be required by law.

Britannica's posted privacy policy is located at <https://corporate.britannica.com/privacy-policy/>.

At the transaction level all data is transmitted over secure transmission (TLS) protocol and data is encrypted while in transit. At the database level, data is protected by firewall and username/password and other access control requirements. Personal data is stored in a secure encrypted database behind web applications protected by strong firewalls. Britannica conducts ongoing reviews in an effort to ensure the maintenance of its database security and conducts ongoing vulnerability management scanning, among other processes.

Audit and Risk Assessment

Britannica conducts internal risk assessment and audits periodically to discover any information security gaps and test our policies and procedures. This includes:

- Reviewing web server access and error logs, and internal process logs stored in AWS CloudWatch.
- Using TrustedSite (Qualys Security Scan) to check security of our websites daily and review the results.
- Using OneTrust software to run an internal security and privacy assessment on our company regularly, at least once a year.
- Using Netsparker for pen testing on our websites on a regular interval.
- Running Vipre on all the devices to protect malwares.
- Using up-to-date and secure system configurations, and regularly apply necessary security patches when they become available.

Our accredited and experienced data privacy team oversees the policies, procedures, and systems that ensure this security and privacy.

d. SOC 2 compliance status (certification documentation should be provided)

Britannica is not SOC 2 certified.

e. Specifics of structures in place to ensure acceptable disaster recovery including backup schedules and redundancy.

As described above, we use redundant AWS services for every Britannica website at every level. Britannica solutions maintain 99.9% availability. The database has a high-availability warm standby with automatic failover. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly.

f. Internet Bandwidth requirements and provide a per-user bandwidth usage specification of the software product.

The proposed solutions require about 10 Mbps per user for best performance. A page weight of a Britannica School site is around 2 Mbytes compressed, and Britannica ImageQuest, Britannica Escolar, and Britannica Modera are lighter.

g. Specifics of the availability of remote access to the district's data outside of the web-based application.

Britannica's solutions are only available as web-based applications.

h. Specifics on the frequency and duration of operating system and application updates including the procedures used to inform the district of maintenance windows and system downtime for these tasks.

For more than 250 years, Britannica has been a leading innovator in education and educational technology, creating engaging and effective solutions for educators, students, and learners whether they are at the library, in a classroom, or at home. Our cloud-based solutions deliver continual editorial updates that ensure our database articles are reliable, factual, and up to date. Our editorial team provides daily content updates using our push to publish technology that publishes without interrupting service access. We post approximately 13,000 new and updated encyclopedia articles and media annually and major events in history are chronicled in real time.

Our product and system architecture teams deliver regular product, accessibility, and security updates, as needed, to ensure that our solutions stay functional, accessible, responsive, and secure. Additionally, the

Britannica team regularly seeks feedback from customers to understand where our products can provide additional value and responds by developing new functionality where possible. Examples of this sort of update in the past have included adding support for integrations with single sign-on and learning management systems. In the unlikely event of scheduled downtime, Britannica subscribers are notified in advance via email. We update customers on new product features using our listserv.

i. Any tools available to measure system responsiveness.

Britannica uses CatchPoint to measure website performance, and AWS CloudWatch to monitor system responsiveness

j. Any limits on data storage (i.e. user quotas, access to previous year data, database size, etc.).

There are no limits on storage.

k. Details about how visitor operations and student check-in/check-out can continue in the event of an internet or system outage. The proposed solution shall be deployed on servers and equipment hosted or administered by the Successful Offeror. Hosting the solution on a 3rd party, such as Amazon or Azure, is acceptable.

As described above, Britannica solutions maintain 99.9% availability. Our stringent disaster recovery policy and procedure provide backups and tests disaster recovery in regular intervals. The database has a high-availability warm standby with automatic failover. Snapshots are taken daily and replicated to a separate AWS region. If needed, the database is restored by a predefined restore procedure. We test the backup and restore procedures regularly.

Britannica's solutions are hosted by Amazon Web Services.

Tab 7 – Reporting and Monitoring

In this tab, offerors shall provide the following information regarding reports and monitoring

a. Provide samples and descriptions of reports offered and the ability to customize content and reports.

HCPS will access standard reporting on-demand through our Britannica Usage Statistics website. Britannica statistics count each text-based resource viewed in the “Documents” category and each multimedia resource in the “Multimedia” category. Together, these two usage categories will provide the total number of assets viewed. Multimedia statistics are recorded only when a user selects a specific image, map, video, or interactive lesson for viewing. It does not include the rich multimedia embedded in articles and feature pages.

We provide a sample of this standard report for HCPS’s last calendar year of usage on the following page. The district has currently chosen to report elementary level access as one segment, and all other school levels as another. Britannica statistics and reporting can be granular to the institution level, depending on authentication methods used by the district.

Britannica’s statistics also comply with the COUNTER Codes of Practice, currently COUNTER5. Britannica statistics are counter compliant with some derivations. All statistics reports include Queries, Documents and Sessions as required by the Counter Protocol. In addition, Britannica provides separate reporting on multimedia when it is viewed on its own. This includes video and audio files, interactive lessons, and images when not embedded in a document.

Britannica COUNTER5 reports include statistics and reporting granular to the institution level, depending on authentication methods used by the district. Counter5 reports are not standard for our district level customers but are available if required and would be delivered monthly via email.

The following pages provide a sample of a standard report and COUNTER5 report.

Tab 8 – Training and Professional Development

In this tab, offerors shall describe training and professional development that is included with the proposed solution. Offerors shall include a description of the required training for implementation of the program as well as options for continued professional development at either the district or school level. Pricing shall be clearly defined in the proposal submission. Include pricing for county-wide, train-the-trainer model as well as resources and professional development options available to schools at no additional cost.

Britannica solutions are easy to use and require minimal training for educators to begin using the databases with their students. As experienced users of Britannica School and ImageQuest, HCPS educators are already familiar with the interfaces of our solutions and the tools available to maximize value to both teachers and students. As such, we have not included any required training or professional development with our proposed pricing in Tab 9. HCPS staff are always welcome to access the free asynchronous and live webinar trainings our educational consultants host monthly.

Should HCPS seek additional professional development to further expand usage and value, or to support the addition of the Spanish resources option we have proposed, we have provided pricing for such services in Tab 9. Britannica professional learning consultants are experienced facilitators and bring with them best practices in facilitating in-person, virtual, and asynchronous professional learning. Paid options available to Henrico County Public Schools include:

- **In-Person Workshops** – Britannica’s highly engaging workshops empower educators to build competencies in specified areas to impact their teaching and improve student outcomes. Using a variety of collaborative and hands-on learning experiences, educators develop research-based instructional practices and have the opportunity to apply and reflect on what they’ve learned.
- **Virtual Sessions** – Britannica’s virtual sessions provide interactivity for participants through the facilitation of best practices in online learning. Virtual sessions can be recorded for viewing later.
- **Asynchronous Training** – Britannica provides asynchronous training modules to support the knowledge building for resources. The training modules are self-paced, and educators can complete them in a sequential path or use them to better understand specific features of resources by interacting with specific modules.

Tab 9 – Pricing

In this tab, offerors shall provide a detailed pricing schedule. The price shall include all costs associated with providing the services and materials outlined in Sec. II of this RFP.

a. List all categories separately, itemized for evaluation such as license per student, teacher, classroom and site, material cost, training of County staff, projected man-hours, hourly rates, and reimbursable expenses

b. Provide all costs as it relates to the proposed solution for the Scenario on Attachment H and the breakdown of pricing on Attachment I.

Britannica is pleased to provide HCPS with a comprehensive database solution including the district's currently subscribed resources, Britannica School and ImageQuest as well as two Spanish resources that would be new to the district, Britannica Escolar and Britannica Moderna. We believe HCPS will find value in adding these resources which can be leveraged by native Spanish speakers, bilingual students, and students learning Spanish. There are two separate pricing options and scenario forms attached, one to account for our complete proposed solution inclusive of Spanish, and a second reflecting the district's current Britannica resources.

Subject: Reference for Britannica

Frederick County Public Schools has been using Britannica Schools and Britannica Image Quest since the 2013 school year. We made the switch when we realized that Britannica offered our high school students' content at a higher reading level compared to what we were currently subscribing too. That, combined with their Image Library provided our district with a nice solution that has proven over time to be a valuable digital solution for us. There are also other products included with our subscription that just make it an incredible value.

We have had very consistent performance from Britannica with this digital product. It has rarely, if ever, given us trouble. I remember one time finding an image in the product that didn't seem school appropriate and after questioning the image it was removed from the platform. I also inquired if Britannica would consider adding Clip Art to their image library and within a year they did so. This was a very valuable asset to be added for our front office staff's convenience when building school newsletters.

Staff at Britannica has been very easy to work with for almost a decade. Please reach out to me at the contact information in the header of this memo if you have any questions.

Tab 11 – Exceptions

Britannica respectfully submits the following exceptions for review by HCPS.

Clause Location	Concern	Proposed Verbiage
<p>RFP, Section V(R) General Terms and Conditions, Ownership of Deliverable and Related Products</p>	<p>Ownership of Deliverable and Related Products</p> <p>1. The County shall have all rights, title, and interest in or to all specified or unspecified interim and final products, work plans, project reports and/or presentations, data, documentation, computer programs and/or applications, and documentation developed or generated during the completion of this project, including, without limitation, unlimited rights to use, duplicate, modify, or disclose any part thereof, in any manner and for any purpose, and the right to permit or prohibit any other person, including the Successful Offeror, from doing so. To the extent that the Successful Offeror may be deemed at any time to have any of the foregoing rights, the Successful Offeror agrees to irrevocably assign and does hereby irrevocably assign such rights to the County.</p> <p>2. The Successful Offeror is expressly prohibited from receiving additional payments or profit from the items referred to in this paragraph, other than that which is provided for in the general terms and conditions of the Contract.</p> <p>3. This shall not preclude Offerors from submitting proposals, which may include innovative ownership approaches, in the best interest of the County.</p> <p>however, Contractor licenses its Contractor Intellectual Property for use for educational purposes only, including as permitted by the fair use doctrine of the Copyright Act.</p>	<p>The services covered by the RFP are not work-made-for-hire services. Rather, If Britannica is chosen as a Successful Offeror, the County will purchase a license to access and use (on a subscription basis) the subscribed-to, proprietary and Britannica-owned applications, including the content contained therein, for educational purposes only, including as permitted by the fair use doctrine of the Copyright Act.</p> <p>In other words, Britannica’s applications, including the content contained therein, are proprietary to Britannica and if selected as a Successful Offeror, ownership by Britannica (or its licensors) of the same will not and cannot be implied to transfer to the County.</p> <p>Vendor requests that this provision be revised to make clear that Contractor Intellectual Property means “work, ideas, that have been or will be in the future created by Contractor prior to, during, and after entering into this Contract (“Contractor Intellectual Property”).”</p> <p>Please note that the Contractor Intellectual Property is licensed for educational purposes/fair use only - no commercial use. If awarded the contract it will not entitle the County to own pre-existing Contractor Intellectual Property or Contractor Intellectual Property developed (a) outside of this Contract with no assistance from County or (b) by Contractor in its normal course of business operations.</p>
<p>RFP, Attachment D, Section 7.2(i)</p>	<p>In general.</p>	<p>Please note, Vendor’s e-resource solutions are provided as is.</p>
<p>RFP, Attachment D, Section 7.2(ii)</p>	<p>Access and use is confirmed provided the services are paid for and used by the State in accordance with the contract.</p>	<p>Provided the State has paid for access to the services, Contractor will use best efforts to not interfere with the State’s access to and use thereof</p>

An Offeror organized or authorized to transact business in the Commonwealth pursuant to Title 13.1 or Title 50 of the Code of Virginia must include in its proposal the identification number issued to it by the State Corporation Commission (Attachment C). Any Offeror that is not required to be authorized to transact business in the Commonwealth as a foreign business entity under Title 13.1 or Title 50 of the Code of Virginia or as otherwise required by law must include in its proposal a statement describing why the Offeror is not required to be so authorized. 3. An Offeror described in subsection 2 that fails to provide the required information shall not receive an award unless a written waiver is granted by the Purchasing Director, his designee, or the County Manager. 4. Any falsification or misrepresentation contained in the statement submitted by the Offeror pursuant to Title 13.1 or Title 50 of the Code of Virginia may be cause for debarment by the County. 5. Also please note:</p> <p><i>Britannica is not required to be authorized to transact business in the Commonwealth as a foreign business entity under Title 13.1 or Title 50 because (1) Britannica is not "transacting business in Virginia" per VA Code Section 13.1-757(B)(6), which states as follows: "The following activities, among others, do <u>not</u> constitute transacting business within the meaning of subsection A: ... (6) Soliciting or obtaining orders, whether by mail or through employees or agents or otherwise, if the orders require acceptance outside this Commonwealth before they become contracts...;" and (2) Title 50 does not apply to EB, Inc. because EB, Inc. is a corporation and not a partnership</i></p>

At the bottom of the callout box is a video player with a play button and a 1:41 duration. To the right, a zoomed-in view of the article text is shown, with a 'Read Aloud' feature overlaid. The text reads: 'The smallest unit of living matter that can exist by itself is the cell. Some organisms, such as bacteria, consist of only a single cell. Others, such as plants and animals, consist of many cells. Every organism, or living thing, is made up of structures called cells. The cell is the smallest unit with the basic properties of life. Some tiny organisms, such as bacteria and yeast, consist of only one cell. Large plants and animals have many billions of cells. Human beings are made up of more than 75 trillion cells. The study of cells is a branch of biology.' The zoomed-in view also shows a 'Reading Level' indicator with levels 1 and 2, and a vertical toolbar with icons for share, star, print, checkmark, globe, and speaker.
