De-Identifiable Information (DII): De-Identification refers to the process by which the Provider removes or obscures any Personally Identifiable Information ("PII") from student records in a way that removes or minimizes the risk of disclosure of the identity of the individual and information about them. Anonymization or de-identification should follow guidance equivalent to that provided by U.S Department of Education publication "Data De-identification: An Overview of Basic Terms" or NISTIR Special Publication (SP) 8053 De-Identification of Personally Identifiable Information. The Provider's specific steps to de-identify the data will depend on the circumstances, but should be appropriate to protect students. Some potential disclosure limitation methods are blurring, masking, and perturbation. De-identification should ensure that any information when put together cannot indirectly identify the student, not only from the viewpoint of the public, but also from the vantage of those who are familiar with the individual. Information cannot be de-identified if there are fewer than twenty (20) students in the samples of a particular field or category, *i.e.*, twenty students in a particular grade or less than twenty students with a particular disability.

WeVideo Technical Proposal

Scope of Services

General Requirements and User Interface:

WeVideo for Schools is a cloud-based SAAS, which provides *access for all students, teachers and staff on any device* (Chromebook, Chrome tablet, Windows PC, MacIntosh, iOS, Android). The account can be managed by the school district. Rostering and provisioning of licensing can easily be done by district staff via the application (various options including SSO). Our solution is fully compliant with COPPA and FERPA laws as well as the more stringent GDPR regulations as well as many specific state laws. WeVideo is a dynamic solution that will be able to accommodate a school district's evolving IT infrastructure and device ecosystem. Our engineering team is agile, has education as a priority, and is proactive on meeting the needs of our school customers both in the classroom and at the district level.

WeVideo allows for deep and highly engaging multimedia creativity for all students. The application supports (among other things) slideshows, digital storytelling, video creation and editing, green screen activities, screen recording, explainer videos, voice over narration, podcasting, audio and music activities and elements that combine all of the above mixed with animation, text, and images. WeVideo is the only COPPA compliant and cloud based creativity tool with such a broad array of creativity opportunities. It is the only such application that is built for schools and includes a backend administration area for managing the account and its members.

WeVideo for Schools supports best instructional practices in the classroom and helps support self-direction and other "success skills" as an integral part of learning. WeVideo enhances learning by providing all students (of any age or ability) opportunities to express ideas around any topic with results that are purposeful, sensory-rich, and inspiring; and that are easy to share, and are in a medium with which a student's facility makes them college and career ready (video). It is this emphasis on critical thinking, collaboration, self-management and making learning visible that provides even more opportunity for students as they strive toward independence in their journey through primary, secondary and post-secondary.

Teaching and Learning Impact - Alignment with Standards WeVideo for Schools supports best instructional practices in the classroom and helps support self-direction and other "success skills" as an integral part of learning. WeVideo connects to research around Constructivist thinking, Bloom's Taxonomy, student-driven learning environments, and meaningful project-based learning experiences. When students use technology tools like WeVideo to scaffold learning, they not only connect more deeply to new content, they interact with content in meaningful ways through inquiry, collaboration, and communication with others within the classroom and outside the classroom. WeVideo supports learning across grade levels, subject areas, and differentiated student needs. It provides a canvas upon which students collect research and drive insights. They are empowered to reveal novel insights they make by establishing connections across content areas.

WeVideo aligns to the "5 Cs" that comprise the *Virginia's Digital Learning Integration Standards of Learning*. Students will display critical thinking, creative thinking, collaboration, communication, and citizenship through the process of video creation.

Video Creation with WeVideo connects to every student *ISTE standard*. Video creation allows students to choose (empowered learner) how they will create, researching the internet responsibly (digital citizen). Using the design

process (innovative designer) students construct new knowledge (knowledge constructor), building higher levels of thinking complexity through a synthesis of ideas to solve relevant problems (computational thinker). Students collaborate (global collaborator) with each other and with others across the globe to learn new perspectives and the video creation process provides students with opportunities to communicate clearly (creative communicator) and express themselves creatively.

Teachers have the option to create an individual or a group project. In both cases, teachers are able to monitor and comment on student work via markers left on the student's timeline. Students are able to respond back to the teacher with their comments. If a group project is assigned, students can collaborate with each other via marker comments. The teacher can review student comments and add their own comments when appropriate.

The WeVideo for Schools application facilitates creativity and collaboration using media of all types, including a massive library of content, and many tools for learners to add media of themselves and their learning activities (video, slide decks, images, music, voice over recording, etc.). As a cloud application, students from the same school district account can be put into work to collaborate and work together throughout the creative process. *Virginia's Digital Learning Integration Standards of Learning* are supported on all fronts, as are the ISTE standards (see above).

WeVideo for Schools enables easy documenting, archiving and sharing of student work in the app itself (through student folders, class galleries, etc.), via embedding in other apps (SeeSaw, Book Creator, LMS, etc.), or by syncing and saving student work through G Suite (Classroom or Drive) or download. Finished work can be published as video in the cloud, exported as media to a drive, or shared via link. Various media elements can be exported for publishing in various media specific formats or for printing (in some cases - printing is not optimal: eg video). In all of the above scenarios - WeVideo gives teachers and school leaders the power to set permission and decide if sharing will be internal (inside the district's WeVideo account) or external (family, community and beyond). We encourage schools to leverage the power of sharing student work as that increases the sense of student agency and ownership as well as creates strong connections outside the classroom. In many cases - student work is shared outside the school with real impact.

WeVideo for Schools education templates can be used with existing projects, lessons and rubrics. Teachers and instructional coaches can also create re-usable and repeatable templates that might include project guides, lesson plan, miscellaneous helper text, rubrics, pre-selected media, and creative space layout. Projects can be assigned by teachers electronically from within the app or through G Suite. Staff can also organize their projects and media into folders or set up class groups. Additionally - the WeVideo website Educator Resource Hub has an ever growing list of lesson plans, ideas and templates (some are common core or ISTE standards aligned).

As a cloud application, WeVideo provides in-app usage metrics for administrators (and teachers if a role is created for teachers to access that data). Reports can be shared with families by the district's account administrators. WeVideo is on call to assist and support additional utilization and other metrics. Also - WeVideo provides out of the box support for Canvas. Other integrations can be implemented or engineered.

Integration

WeVideo is a public cloud-based SAAS solution hosted on Amazon Web Services in the US. No installation of software is required, but a Chrome browser extension is needed for webcam and screen recording capability.

WeVideo offers a turnkey solution for school district use that does not require extensive implementation. The technical deployment at a typical school district can be accomplished within one hour.

Upon initial purchase, the product is provisioned to a central district administrator. This individual has access to an Admin panel, which offers several license-distribution mechanisms: distributing a join code, adding users via invitation link, importing members via CSV, or initiating a domain sync.

For an all-district implementation, WeVideo highly recommends the domain-sync method, which enables students and teachers to use the single sign-on option on wevideo.com/sign-in to access the product and places them in the administrator-defined roles and relevant organizational units.

From that point on, the product adoption curve is contingent on the district's internal dynamics, capacity-building process, and level of readiness among its teachers. A typical successful deployment will reach a level of 15-20% utilization of the allocated license capacity within 3 months from the subscription start date. Usage then continues to grow as teachers and coaches embed WeVideo in their instructional practices.

WeVideo offers several LTI/LMS integrations such as Schoology and Canvas.

Reporting

WeVideo provides a reporting tool that will provide schools with monthly and yearly group and individual usage data for users as well as total license, storage and time use. Teachers can see how much time students spend on projects, the number of projects assigned, and the number of completed videos.

Accessibility

We view accessibility as an ongoing effort. We are taking a variety of steps and devoting resources to further enhance the accessibility of our website, including partnering with Allyant (formerly Accessible360) to conduct a comprehensive audit of both our website and product in order to identify areas where accessibility can be improved. Whether you are using assistive technologies like screen reader, a magnifier, voice recognition software, or captions for videos, we want to make your use of WeVideo's website and mobile app a successful and enjoyable experience.

Training Support

To support the initial rollout, WeVideo will offer an implementation webinar to the district-designated license super-administrator within a week from the initial purchase. Subsequently, WeVideo will work with the district's central administration to schedule a one-hour train-the-trainer instructional webinar, which is normally included with a district purchase, and to outline an extended training plan (depending on the scope of training services agreed upon in the purchase order).

WeVideo offers a comprehensive list of on-demand professional learning offerings. These can be delivered both on-site and virtually (in webinar format), depending on the district's preferences and budget parameters.

In addition to its live training services, WeVideo maintains a database of support and training resources. This includes:

- WeVideo Academy - a bank of brief video product tutorials;
- Educator Resource Center with teacher-sourced lesson plans, tutorials, and video examples;
- Comprehensive online written guides for administrators and teachers;
- An in-product guided video editing tutorial for students; and
- WeVideo Support Center with help articles and technical workflow documentation.

Unique Qualifications

WeVideo is unique in offering the benefits below:

Access Anywhere, Anytime, on Any Device. WeVideo works with different operating systems (PC, Mac, Linux, iOS, Android) and devices (laptops, Chromebooks, mobile phones and tablets). Video projects are stored in the cloud so students can work from home on videos they didn't complete in class. Students don't have to worry about having access to a single computer at school or the correct software installed at home.

Personalized Learning. To suit varying levels of experience, WeVideo editing options come in two versions – Storyboard and Timeline - wrapped in a user-friendly interface. Students of all ages and video editing skill level can start in the Storyboard editor where they learn to assemble and structure their story. The Timeline editor takes video editing to the next level, where students can synchronize media on a timeline and enjoy full creative control.

Collaborative Learning and Peer-Review. Students and teachers, in different locations, can work together on the same video project, make edits, and provide feedback with comments and markers to explain their thinking during the creation process. This opens up for a wide range of options for collaborative video projects.

Privacy Control. WeVideo protects the privacy of students. Students and teachers create media and video projects with other members of the same multi-user account in a fully FERPA-compliant workspace. WeVideo offers a powerful system of administration and functionality organized in a tiered-permissions manner so that video files are being stored in a safe and secure environment.

Seamless Digital Classroom Integration. WeVideo integrates with Google Apps for Education, Google Drive and Learning Management Systems. This makes it easy to deploy and manage large-scale WeVideo implementations with one-click launching and reviewing of video assignments.

Consolidate Licensed Software. WeVideo also provides premium features like green screen, slow motion and screencasting (screen capture) across all devices, eliminating the need for specialized third-party tools. These features are not limited to selected workstations, they also work on low-powered devices such as Chromebooks.

In addition to its distinctive product offering, WeVideo has a dedicated Customer Success team organized to support district implementations and maintains a staff with a combined total of over 50 years of experience in K-12 education.

Company Profile/Demonstration of Prior Work

WeVideo has offered a dedicated K-12 solution since 2013. Around that time, a number of U.S. school districts became early adopters, including Merced Union High School District (CA), Chesterfield County Public Schools (VA), Richland County School District Two (SC). WeVideo's presence in K-12 education has grown continuously since then. The company is proudly serving more than 2 million students in the United States alone. Furthermore, the country of Denmark deployed WeVideo for every student in their K-12 population.

WeVideo Inc. was founded in 2011 and has 22M+ registered users worldwide (including our education and non-education customers and users). Currently WeVideo has 41 employees - 25 in the US, 2 in Norway, 14 in Romania. WeVideo's business has been growing at a rapid pace. The sales bookings in 2016 and 2017 were \$5.1M and \$6.8M respectively.

DIRECT CONTACT WITH STUDENTS

Name of Offeror: WeVideo, Inc.

Pursuant to Va. Code § 22.1-296.1(E), as a condition of awarding a contract for the provision of services that require the contractor or employees of the contractor to have direct contact with students on school property during regular school hours or during school-sponsored activities, the contractor shall provide certification of whether any individual who will provide such services has been convicted of any violent felony set forth in the definition of barrier crime in subsection A of Va. Code § 19.2-392.02; any offense involving the sexual molestation, physical or sexual abuse, or rape of a child, or the solicitation of any such offense; or any crime of moral turpitude.

Any individual making a materially false statement regarding any such offense is guilty of a Class 1 misdemeanor and, upon conviction, the fact of such conviction is grounds for the revocation of the contract to provide such services and, when relevant, the revocation of any license required to provide such services. School boards shall not be liable for materially false statements regarding the certifications required by Va. Code § 22.1-296.1(E).

Va. Code § 22.1-296.1(E), shall not apply to a contractor or his employees providing services to a school division in an emergency or exceptional situation, such as when student health or safety is endangered or when repairs are needed on an urgent basis to ensure that school facilities are safe and habitable, when it is reasonably anticipated that the contractor or his employees will have no direct contact with students.

For purposes of this certification, “services” means any work performed by an independent contractor wherein the service rendered does not consist primarily of acquisition of equipment or materials, or the rental of equipment, materials and supplies.

The contractor is responsible for affirming certification information for his subcontractors.

Pursuant to Va. Code § 22.1-296.1(F), no school board shall award a contract for the provision of services that require the contractor or his employees to have direct contact with students on school property during regular school hours or during school-sponsored activities when any individual who provides such services has been convicted of any violent felony set forth in the definition of barrier crime in subsection A of § 19.2-392.02 or any offense involving the sexual molestation, physical or sexual abuse, or rape of a child, or the solicitation of any such offense.

Pursuant to Va. Code § 22.1-296.1(G), any school board may award a contract for the provision of services that require the contractor or his employees to have direct contact with students on school property during regular school hours or during school-sponsored activities when any individual who provides such services has been convicted of any felony or crime of moral turpitude that is not set forth in the definition of barrier crime in subsection A of § 19.2-392.02 and does not involve the sexual molestation, physical or sexual abuse, or rape of a child, or the solicitation of any such offense, provided that in the case of a felony conviction, such individual has had his civil rights restored by the Governor.

As part of this submission, the contractor certifies the following:

- ☒ **None of the individuals who will be providing services that require direct contact with students on school property during regular school hours or during school-sponsored activities have been convicted of a violent felony set forth in the definition of “barrier crime” in Va. Code § 19.2-392.02(A) or an offense involving the sexual molestation, physical or sexual abuse, or rape of a child, or the solicitation of any such offense;**

And (select one of the following)

☒ **None of the individuals who will be providing services that require direct contact with students on school property during regular school hours or during school-sponsored activities have been convicted of any felony or any crime of moral turpitude.**

or

☐ **One or more individuals who will be providing services that require direct contact with students on school property during regular school hours or during school-sponsored activities has been convicted of a felony or crime of moral turpitude that is not set forth in the definition of "barrier crime" in Va. Code § 19.2-392.02(A) and does not involve the sexual molestation, physical or sexual abuse, or rape of a child, or the solicitation of any such offense. (In the case of a felony conviction meeting these criteria, the contractor must submit evidence that the Governor has restored the individual's civil rights.).**

Some potential disclosure limitation methods are blurring, masking, and perturbation. De-identification should ensure that any information when put together cannot indirectly identify the student, not only from the viewpoint of the public, but also from the vantage of those who are familiar with the individual. Information cannot be de-identified if there are fewer than twenty (20) students in the samples of a particular field or category, *i.e.*, twenty students in a particular grade or less than twenty students with a particular disability.
